PROCEEDINGS AND DEBATES OF THE 109th CONGRESS, SECOND SESSION

HOUSE OF REPRESENTATIVES—*Friday, September 29, 2006*

The House met at 9 a.m. and was called to order by the Speaker pro tempore (Mr. BONNER).

DESIGNATION OF THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, DC,
September 29, 2006.

I hereby appoint the Honorable JO BONNER to act as Speaker pro tempore on this day.

J. DENNIS HASTERT,
Speaker of the House of Representatives.

PRAYER

The Reverend Dr. Barry C. Black, Chaplain, United States Senate, offered the following prayer:

Almighty God, high and lifted up, Your ways are often beyond our understanding.

Today, guide the leaders of our Nation and world.

When they cannot discern Your purposes, open their eyes.

Lead them away from the valleys of discouragement and pessimism to the high ground of faith and cheer.

Through Your power, direct them when clouds obscure the light of Your countenance.

May they do Your work when there are none to applaud and encourage.

Give them the wisdom to strive simply to please You.

Remind them that in everything You are working for the good of those who love You and are called according to Your purposes.

We pray in Your holy name, Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

PLEDGE OF ALLEGIANCE

The SPEAKER pro tempore. Will the gentlewoman from New York (Mrs. KELLY) come forward and lead the House in the Pledge of Allegiance.

Mrs. KELLY led the Pledge of Allegiance as follows:

I pledge allegiance to the Flag of the United States of America, and to the Republic for which it stands, one nation under God, indivisible, with liberty and justice for all.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. The Chair will entertain up to five 1-minute requests on each side.

DO-NOTHING CONGRESS??

(Ms. FOXX asked and was given permission to address the House for 1 minute.)

Ms. FOXX. I rise today to object to a phrase that has been said all too often lately, "the do-nothing Congress." The Democrats are speaking for themselves as they have not put forth any constructive ideas or sound policy.

As for our side of this aisle, this Republican-led Congress has taken major steps in the advancement of our Nation. I am honored to be a part of the 109th Congress and its accomplishments.

This Republican-led Congress has voted to permanently end the death tax and voted for additional tax cuts. The results: The economy is strong. The unemployment rate is at 4.7 percent, its lowest average over the past three decades. Home ownership is up. And just yesterday the Dow Jones industrial average reached its highest level in 6 years.

But most notably is all the legislation that has been passed to support our troops and protect our homeland. We have listened to the American people and focused on their priorities. Our constituents wanted border security, and we passed several border security bills. In addition, Congress has passed numerous bills that will prevent terrorist attacks and give our military and intelligence forces the tools they need to win the global war on terror.

Mr. Speaker, this Republican-led Congress has taken tremendous steps in growing our economy, protecting our homeland, and fighting the global war on terror.

HEALTH CARE

(Ms. SCHWARTZ of Pennsylvania asked and was given permission to address the House for 1 minute.)

Ms. SCHWARTZ of Pennsylvania. Every day, Americans work hard to meet their responsibilities, to pay their mortgage, to send their children to college, to save for retirement, and every day Americans worry about the health and safety of their family, friends, and loved ones. Yet, under the policy of the Bush administration and the Republican Congress, access to health care has gotten harder.

The number of untreated Americans is on the rise; 47 million are currently without insurance. Health insurance premiums are skyrocketing, a 73 percent increase over the last 5 years. And medical research is stifled because politics, not science, dictates public policy.

Democrats have a plan to make health care more affordable and to advance lifesaving medicine. Democrats will enable small businesses to join together to negotiate more affordable rates for their employees. Democrats will negotiate lower prices for seniors and eliminate overpayments to HMOs, and Democrats will work towards cures for diseases that affect all of our families by investing in the promise of stem cell research and innovative biotechnologies.

Our plan prioritizes the health of people, not the profits of special interests. Our plan will reduce costs and will find cures.

It is time for a new direction in health and science, one that Democrats can deliver.

LONE STAR VOICE—MAC GARRISON

(Mr. POE asked and was given permission to address the House for 1 minute.)

Mr. POE. Mr. Speaker, the gunning down of the Houston police officer by an illegal who shot him in the back has sparked new immigration safety concerns. Although the "open borders crowd" doesn't want to talk about it, normal citizens are speaking the truth anyway. Mac Garrison of Kingwood, Texas writes, "The murder of Houston Police Officer Rodney Johnson must serve as a wakeup call to all concerned citizens regarding the huge problem of illegal immigration.

"Our borders are nonexistent, our language is deteriorating, and our culture is melting away.

"Those that come here illegally, simply by the nature of their first act on American soil, breaking the law, have no respect for our laws and our social structure. Anarchy seems to rule the day now.

"The Federal Government has failed miserably to protect the border. And local law enforcement agencies are being denied the ability to work closely with other Federal agencies to stop this problem.

"We as a law abiding society must demand more accountability of elected leaders and our citizens. Now, more than ever is the time to get extremely serious about putting a complete halt to illegal immigration before more lives are lost and before our country is completely financially and morally bankrupt."

Mr. Speaker, Mac Garrison speaks for many Americans.

And that's just the way it is.

REGARDING IRAQI OIL REVENUES

(Mr. EMANUEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EMANUEL. Mr. Speaker, in March of 2003, Deputy Secretary of Defense Paul Wolfowitz said: We are dealing with a country, Iraq, that can really finance its own reconstruction, and relatively soon.

Well, I guess 3 years doesn't count as relatively soon. According to a new report by the Iraqi Special Inspector General, the Iraqi oil industry lost $16 billion because of violence, theft, and corruption. In fact, 3 years after Secretary Wolfowitz's confident predictions, Iraq is actually paying billions of dollars to import refined petroleum. Iraq is importing refined petroleum products.

In the words of Secretary of Defense Donald Rumsfeld, "stuff happens."

Maybe if this Congress had questioned Wolfowitz on his calculations a little closer, maybe if the President had given the commanders on the ground the troops they needed, maybe if this Congress had conducted and sought accountability into Iraq's reconstruction, we wouldn't be dealing with quite so much "stuff." But I guess under Republican leadership, you end up with the leadership you have, not the one you want.

TAX RELIEF/SMALL BUSINESS

(Mrs. KELLY asked and was given permission to address the House for 1 minute.)

Mrs. KELLY. Mr. Speaker, I rise today in opposition to the false argument by the Democrats that the tax relief this Republican Congress has provided the American people during the last 5 years isn't helpful.

Democrats are vowing to repeal these tax cuts and are running around with a terribly false sound bite that tax cuts are for the rich.

So I ask them: Do only rich people have children? Because we increased the tax credit to $1,000 per child for every American family.

So I ask them: Do only rich people get married? Because we fixed a major flaw that punished every American married couple by charging them higher taxes for filing jointly.

And I ask them: Do rich people have a family income of $14,000 a year? Because it was for them that we created an income range, a new 10 percent tax bracket to specifically cut their tax rates. It cuts taxes for 6.1 million low-income taxpayers in New York alone.

Finally, I ask them: Are you labeling every small business owner in America as rich? Because we on the Small Business Committee worked very hard to ensure the majority of these tax cuts specifically helps small businesses.

When I walk down the main streets of Hudson Valley and visit the small businesses, the owners tell me they are certainly not rich. They tell me they need tax cuts to pay their workers, to serve their customers, and create new jobs.

Mr. Speaker, the truth is in the numbers. The Treasury Department shows that a family of four, making $50,000 a year, would experience a 132 percent tax increase in 2011 if Congress repealed these tax cuts.

Let's remain a Congress that votes in favor of the taxpayer.

TIME FOR A NEW DIRECTION

(Mr. KUCINICH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KUCINICH. A war based on lies. An administration lost in ideological fantasies, stubbornly ignoring the best advice of military commanders. Getting ready for the next war. A President who refuses to see a situation collapsing around 130,000 young men and women he sent into battle. A global war on terror has become a war of errors, undermining our security around the world and here at home. A national security state has emerged, and America is immersed in lying, spying, and dying.

It is time for a new direction. It is time for a new direction in international relations, achieving security through cooperation. It is time for a new direction here at home in health care, Medicare for all. It is time for a new direction in job creation and infrastructure bill. It is time for a new direction.

We are homeward bound, America. We are coming home. We are coming back to take care of things that matter to people here at home, jobs and health care and education. Time for a new direction.

FOOTY'S BUBBLES AND BONES GALA

(Ms. ROS-LEHTINEN asked and was given permission to address the House for 1 minute.)

Ms. ROS-LEHTINEN. Mr. Speaker, I would like to recognize south Florida Y-100 radio station, and especially John Kross, known to our south Florida community as "Footy," for this year's sixth annual Anti-Drug Bubbles and Bones Gala. Proceeds benefit Here's Help, a private, nonprofit, comprehensive rehabilitation agency that caters to inner-city youth with substance dependency and addiction.

In my congressional district, programs such as these have been instrumental in saving the lives of many teenagers and young adults by helping them cope with their addictions.

I ask my colleagues to join me in congratulating Footy on this wonderful drug rehab program. This event will provide assistance to so many young people in need to make sure that they one day can live in a Nation where drug and alcohol addictions are no longer a fact of their lives.

AMERICANS WANT A NEW DIRECTION

(Mr. McDERMOTT asked and was given permission to address the House for 1 minute.)

Mr. McDERMOTT. Mr. Speaker, the Republicans are shutting down the debate in Congress today. They don't want the American people to hear anything other than Republican press releases. They have nothing else to show and offer the American people.

November will be a referendum on the President's failed diplomacy, disastrous war in Iraq, and governing America by telling the American people to be afraid.

Now, maybe Aesop was wrong 3,000 years ago in his fable. Maybe you can shout, "Wolf, wolf, wolf," and win an election. But you can't stifle democracy and cling to power. The American people have had enough.

The Republican leadership believes that they are going to have the last word today, but, fortunately, on November 7, the American people are going to choose a new direction. They don't want any more of this. They have watched it, they have given the President support, they have given him leeway, and what have they gotten? A war that is making more unsafe our world, and Americans want a new direction. They are going to get it on November 7.

GOP PREPARES TO LEAVE WITHOUT HOLDING ADMINISTRATION ACCOUNTABLE ON IRAQ

(Mr. PALLONE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PALLONE. Mr. Speaker, despite countless assurances from the President that we are safer now than we were before 9/11, this past week we learned the truth: The world is more dangerous today than it was pre-9/11, and the war in Iraq is the main reason why.

This weekend on "60 Minutes," Bob Woodward will report that our intelligence agencies predict that 2007 is going to be more deadly for American troops than 2006. That is a dire prediction considering that insurgent attacks against our troops are now occurring every 15 minutes.

These reports from our intelligence agencies should serve as a wake-up call to House Republicans who for 3 years have sat on the sidelines neglecting their oversight responsibility of the war in Iraq.

How bad do things have to get in Iraq before this Republican do-nothing Congress actually takes action? When will they finally begin asking questions? When will they finally begin to hold Secretary Rumsfeld and others in the President's War Cabinet accountable for their incompetence?

Mr. Speaker, the American people deserve a Congress that will take its oversight responsibilities seriously. It is time for a change here in Congress, and it is coming this November.

WAIVING POINTS OF ORDER AGAINST CONFERENCE REPORT ON H.R. 5441, DEPARTMENT OF HOMELAND SECURITY APPROPRIATIONS ACT, 2007; PROVIDING FOR CONSIDERATION OF S. 3930, MILITARY COMMISSIONS ACT OF 2006; PROVIDING FOR CONSIDERATION OF H.R. 4772, PRIVATE PROPERTY RIGHTS IMPLEMENTATION ACT OF 2006

Mr. SESSIONS. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 1054 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 1054

All points of order against the conference report and against its consideration are waived. The conference report shall be considered as read.

SEC. 2. SEC. 3. Upon the adoption of this resolution it shall be in order without intervention of any point of order to consider in the House the bill (H.R. 4772) to simplify and expedite access to the Federal courts for injured parties whose rights and privileges under the United States Constitution have been deprived by final actions of Federal agencies or other government officials or entities acting under color of State law, and for other purposes. The SPEAKER pro tempore. The gentleman from Texas (Mr. SESSIONS) is recognized for 1 hour.

Mr. SESSIONS. Mr. Speaker, for the purpose of debate only, I yield the customary 30 minutes to the gentlewoman from New York (Ms. SLAUGHTER), pending which I yield myself such time as I may consume. During consideration of this resolution, all time yielded is for the purpose of debate only.

Mr. Speaker, the rule before us today will provide for consideration of three measures of vital importance to our Nation: The conference report for Fiscal Year 2007 Homeland Security Appropriations bill, the Private Property Rights Implementation Act of 2006 and the Military Commissions Act of 2006. This rule will enable the House to consider these bills and complete this important work on behalf of the American people.

Mr. Speaker, I rise today in strong support of this rule and the underlying legislation. These three bills address some of our Nation's most pressing priorities. First, the Homeland Security Appropriations Conference Report funds our most important Federal programs aimed at securing the Nation against terrorist attacks. It provides $34.8 billion for the operations and activities of the Department of Homeland Security in fiscal year 2007, an increase of $2.3 billion over fiscal year 2006 and $2.7 billion above the President's request.

The conference agreement aggressively addresses our most critical homeland security needs, including border and immigration security; nuclear detection; port, cargo and container security; transportation security; natural disaster preparedness and response; and support to State and local first responders.

This legislation secures our homeland first and foremost by protecting our borders and revitalizing immigration enforcement, because border security is homeland security. It provides over $21 billion for border protection, immigration enforcement and related activities. It includes an increase of $2.1 billion over funding in 2006. This includes $5.2 billion for the Secure Border Initiative and additional funding to support technology, personnel and infrastructure to prevent terrorists and other criminals from exploiting our borders and immigration system.

Among other security-enhancing measures, this funding includes $2.77 billion for Border Patrol, adding 1,500 new Border Patrol agents, for a total of 14,800. It includes $1.2 billion for border fencing, vehicle barriers, technology and infrastructure; $4.2 billion for immigration and customs enforcement; $1.38 billion for Immigration and Custody Enforcement custody operations, adding 6,700 detention beds, for a total of 27,500; and $28.2 million to assist State and local efforts to enforce immigration laws.

This conference report also recognizes the need to enhance port, container and cargo security by providing the funds necessary to secure our ports and inbound cargo in order to prevent terrorists and criminals from exploiting the international commerce system.

It supports our first responders by paying attention to the needs of high-threat areas, firefighters and emergency management. It supports ongoing efforts to enhance the current inventory of our Nation's critical infrastructures, develop secure communication systems with Federal, State and local entities, and it continues to work with the private sector to implement protective measures around the Nation's infrastructure.

This agreement continues ongoing efforts to enhance security for all modes of transportation, including ports, rails and aviation with a focus on developing and installing next-generation technology to inspect cargo, baggage and passengers. And it supports traditional missions, such as drug interdiction, law enforcement, maritime safety and Presidential protection.

Finally, this conference report provides for the necessary and appropriate oversight of the Department of Homeland Security. It fences off $1.6 billion from being spent until DHS meets certain planning and management requirements. Under these requirements, DHS must develop a comprehensive strategy and plan for port, cargo, container security, and for the Secure Border Initiative. Department of Homeland Security must also provide expenditure plans for the border security system, U.S.-VISIT, Federal Protective Service, business transformation for CIS, explosive detection systems in airports, Customs information technology systems, and overall better financial data throughout the department, and in particular, science and technology.

Finally, the agreement directs the preparedness Directorate and FEMA to improve its capacities in communications, training and other capacity assessments, including management logistics, emergency housing, debris removal and victim registration.

Second, this rule provides for consideration of the Military Commissions Act of 2006 as modified by the other body. The House version of this legislation passed the House on Wednesday by a vote of 253–168 and was sent to the other body. Today's legislation again provides congressional authorization for military commissions to try alien unlawful enemy combatants for war crimes committed before, on or after 9/11/2001. It amends the War Crimes Act to criminalize grave breaches of Common Article 3 of the Geneva Conventions, while fully satisfying U.S. treaty obligations. It also authorizes the establishment of military commissions to try alien unlawful enemy combatants, which is the legal term used to define international terrorists and those who aid and support them, for war crimes. While this new chapter is based upon the Code of Military Justice, it also creates an entirely new structure for these trials.

These commissions will only be used to try alien terrorists for war crimes. Any U.S. citizen will be tried within the Federal United States judiciary. These alien terrorists acquitted of a war crime will still be detained as enemy combatants according to the principle in international law that there exists an undisputable right to keep the enemy from returning to the battlefield. Thus, an acquittal at a war crime trial will not result in terrorists being released. This legislation also provides for an independent certified military judge to preside over all proceedings.

This agreement creates the process necessary to prosecute terrorists effectively and fairly, while also protecting American troops and intelligence agents fighting the global war on terror.

I would like to thank Chairman DUNCAN HUNTER and Chairman SENSENBRENNER for all of their hard work in reaching an agreement with the other body that keeps Americans safe while observing the rule of law.

Third, this rule provides for the consideration of legislation to give private property owners the ability to litigate cases in Federal court when local and State regulations deprive owners the use of their own land.

Although this legislation already passed the House this week with the support of the majority of its Members, it did not achieve the support of the super majority needed to pass under the suspension of the rules.

So, today, the House will once again have the opportunity to support this commonsense bill to ensure that property owners have the same access to Federal courts as other plaintiffs claiming a violation of their constitutional rights.

It removes the judicial détour of forcing claimants raising solely Federal claims to first pursue their litigation in State court on the very same case and dramatically reduces the amount of time that property owners must spend in negotiation and litigation before takings claims that can be heard on their merits.

I congratulate the gentleman from Ohio (Mr. CHABOT) for all of his hard work in constructing and perfecting this legislation, and I look forward to supporting his efforts on the floor later this afternoon.

Mr. Speaker, I am proud of this work product that the majority has brought to the floor today. I encourage all of my colleagues to support this rule and the underlying legislation that will keep Americans safer, uphold the rule of law and protect the private property rights of citizens. I encourage each of my colleagues to join me in supporting this rule and the three underlying bills.

Mr. Speaker, I reserve the balance of my time.

Ms. SLAUGHTER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I thank the gentleman from Texas for yielding me this time.

Mr. Speaker, these are not the circumstances under which we should be considering this legislation. The bills before us deal with nothing less than the security of our homeland and the fundamental nature of our Nation. Our citizens deserve better than to have their elected representatives rush to pass all of these bills in one day, bills that say a great deal about who we are as a society and where we are headed as a country.

The Homeland Security Appropriations Conference Report and the Military Commissions Act before us are manifestations of how this country has chosen to respond to the challenges that confront us, challenges to our safety and our peace of mind.

□ 0930

Will we respond with flawed acts that undermine our economic vitality and sacrifice the very liberties we are theoretically fighting to protect? Or will we be measured in our response and do what is necessary to preserve our liberty from both threats abroad and the consequences of fear and mistrust here at home?

Mr. Speaker, this homeland security legislation means a great deal to my constituents in western New York and to the tens of millions of Americans who live in northern border communities throughout our country.

Our relationship with Canada is truly a unique one. Ours is the longest unguarded border in the world, a demonstration of the spirit of trust and openness shared by our two great nations. That spirit has produced and sustained a thriving cross-border tourism industry and hundreds of billions of dollars in trade between our two countries every year.

Border economies on both sides of the divide depend on that trade and tourism. So it would be shortsighted and self-destructive to permit a flawed border security plan to cut off such a lifeline. Unfortunately, the Western Hemisphere Travel Initiative, put forth with so much fanfare by the Department of Homeland Security and the Department of State, threatens to do just that. In the name of heightened security, this plan, if implemented in its current form, will mean that millions of tourists from both countries will stay home and businesses will stop shipping their goods across the border. In its current form, this plan is a disaster waiting to happen. And considering that Canada is our largest trading partner, we have no choice but to fix it before it is too late. And what we need first is an extension of the WHTI implementation deadline, which I am relieved to see is still in this bill. Backing up the implementation until June or at least January of 2009 will give us the time we need to fix this program where it is broken.

My colleague and good friend from New York Representative McHUGH and I have fashioned a bipartisan, commonsense bill that will correct the most egregious failings of WHTI and make it work for our constituents instead of against them. The Protecting American Commerce and Travel Act, or PACT Act, has gained the support of a wide range of Representatives in this body. It will ensure border security while at the same time keeping it open to travel and trade. I urge all of my colleagues to consider and pass the PACT Act in the months ahead. We don't have to choose between economic security and physical security. We can and we must have both.

Mr. Speaker, the Western Hemisphere Travel Initiative was a flawed reaction to a perceived threat and today threatens the liberty and prosperity of our country more than those it supposedly protects us from.

In the same way, the Military Commissions Act before us represents a shocking assault on the fundamental freedoms and liberties that we have been told we are fighting to defend. This bill will dramatically increase the President's right to detain men and women the world over and to hold them indefinitely without charge. What is more, it will serve as a backdoor legalization of all but the most brutal of interrogation methods, taking our Nation down a path that we have chastised so many other countries for following.

Yesterday in the Senate, my friend and New York delegation colleague, Senator HILLARY CLINTON, told a story about our country's first great military leader, a man who went on to become our first great political leader.

On Christmas Day in 1776, in the midst of the Revolutionary War, General George Washington launched a daring raid that culminated in the capture of numerous Hessian soldiers. They were foreign mercenaries known for their brutality and who were fighting for the British. Despite what they had done to American soldiers, he ordered his men to treat them humanely. He said, "Let them have not reason to complain of our copying the brutal example of the British Army."

George Washington, the man who so influenced our national consciousness, who was so deeply responsible for who we are as a people, wanted the world to know that the new American Army did not abuse its prisoners of war. He also wanted to do whatever he could to win the hearts and minds of the Hessians. If even one came to see the virtue of America and lay down his arms, that would be a victory in the fight for our Nation's freedom and independence.

Mr. Speaker, I think we have heard some of the best arguments against this bill from General Washington's successors: the men and women who have held top positions of responsibility in our Armed Forces. They have told us over and over again that if we ignore our country's longstanding commitment to the rules of war and international treaties like the Geneva Conventions, we will be putting our own soldiers and our own Nation at risk. Opening the door to detainee abuse and indefinite detention will make our soldiers more likely to be tortured and dehumanized so that they fall into enemy hands, and that means our own country will be less safe.

A world based on the rule of law is more safe, not less safe, than a world based on power alone. To argue that those who oppose this detainee bill want to let terrorists roam free is both wrong and illogical. Suspected terrorists who have evidence against them will be convicted by courts of law. They will stay behind bars. At the same time, a steadfast commitment to due process will both defend our most cherished freedoms and free the innocent from unwarranted punishment. Doing so will protect our liberty and deprive our enemies of one of the main tools that they are using to recruit their new followers.

We will show the world that the United States practices what it preaches about freedom and democracy and human dignity. We will bring others over to our side and make them less likely to take up arms against us.

There is a reason why Colin Powell recently warned us that the world is beginning to doubt the moral basis of our fight on terrorism. He said it because it is true and because such a reality is a truly dangerous one. What is more, humane interrogation methods will prevent us from chasing after ghosts, from following the fleeting leads of false confessions born not from knowledge but from desperation.

General Washington saw the value of a world based on law and principle over 200 years ago, and he saw it at a time when his fledgling Nation was truly in a fight for its very survival. And for us to pass a bill today that abandons some of the most fundamental principles of the civilization that we have sworn to defend would be an insult to all those who came before us, to all those who fought and struggled so that we could live free.

Mr. Speaker, it is such a respect for law and eternal principles that this administration and far too many in this Republican leadership lack. The proof lies in a provision of this bill which has received so little notice it is shameful but that is profoundly revealing about its true nature.

Ten years ago Congress passed a law called the War Crimes Act. Under that bill violating the Geneva Conventions is a crime in the United States. The administration argued that the Convention does not apply to enemy combatants, a term of its own invention. But the Supreme Court disagreed. In other words, the administration officials who have spent the last 5 years creating and directing our torture policy, as well as the government employees who have carried it out, could be liable for criminal prosecution for violating the War Crimes Act.

And so they have decided in this bill to go back in time to 1997 and to rewrite the War Crimes Act to make their actions legal. And that is exactly what this bill does. To call this strategy cynical and self-serving, Mr. Speaker, is an understatement. When President Bush signs this bill, he will be signing away any responsibility for the potentially criminal policies that he and those in his administration have enacted during the past 5 years. When he signs this bill, he will be signing a pardon for himself and for all other architects of these disastrous, self-defeating, and immoral policies.

But we have a choice here today. We can take a principled stand on behalf of the principles that make us great. We can choose to reject a future in which America can no longer honestly claim that it respects human rights, a future in which our own shortsighted, selfish, and immoral retreat into fear and suspicion has left us less safe and more isolated than ever before. We can choose to embrace our true nature and, in so doing, take a great step toward the creation of a world led by law and free from fear.

It is our choice, Mr. Speaker. And I implore all of my friends in this body, please, let us today make the right one.

Mr. Speaker, I reserve the balance of my time.

Mr. SESSIONS. Mr. Speaker, during the last few years, Members of Congress have spoken very plainly and openly to this administration about our thoughts and ideas and hopes and dreams, about how we can better protect not only this country and our borders but the rule of law, and this administration has been very open to hearing from Members of Congress about these thoughts and concerns.

Our next speaker is a gentleman who has engaged the administration, has talked about how important border initiatives are, to make sure that not only are we secure on our border but to make sure that we deal effectively and carefully with people who have come to this country, to make sure that they are safe, to make sure that they are not harmed in that process. If they have broken the law, they will take the full measure of law as it is given, but that we do so in a compassionate way.

Our next speaker is the chairman of the Rules Committee, the gentleman from California (Mr. DREIER), and I yield to him such time as he may consume.

Mr. DREIER. Mr. Speaker, I thank my friend for his very kind words, but we do want to adjourn by this evening; so I appreciate the fact that he kept it relatively brief. And I want to thank him for his typical superb management of this very important rule and to say that I am very pleased that we have been able to work in a bipartisan way.

At least two of the three provisions in this rule deal with the single most important issue that we face: the security of the American people. Our Homeland Security appropriations bill and I believe this tribunal bill, which will be made in order under this rule, is critical to the security of the United States of America, and that is our top priority.

I guess I should begin, since he is looking so relaxed there, by saying time and time again in the Rules Committee, my colleague Ms. SLAUGHTER and others said that it was MARTIN SABO's last appearance before the Rules Committee. Well, I had every confidence, when people joked about the prospect of bringing a conference agreement back on the Homeland Security appropriations bill, that it would happen. And many people rolled their eyes. But thanks to the leadership of MARTIN SABO and HAROLD ROGERS and, of course, DAVID OBEY and JERRY LEWIS, we have been able to come together with a very important Homeland Security appropriations conference report.

So I would like to join in extending great appreciation to MARTIN SABO for his stellar service to this body over the years and for his commitment to dealing with transportation issues and now homeland security and to say that we will miss him greatly.

This measure, Mr. Speaker, that we are going to consider, the appropriations bill itself, is absolutely essential if we are going to focus on the security of our borders and deal with it in a responsible way. And I am happy that Ms. SLAUGHTER was able to work on her compromise. Again, it is a bipartisan compromise, as she just said in her statement, that we have been able to deal with.

And similarly, I am proud of another item that is included in this bill that is once again a bipartisan measure, and that is legislation that was introduced in the Senate by my California colleague, DIANNE FEINSTEIN, and I was privileged to introduce it here in the House. We had an actual unanimous recorded vote on this measure, and it was to recognize that we have a problem at our border; that being since September 11, 2001, the discovery of 38 tunnels, one of which came from Canada into the United States, 37 from Mexico into the United States. And what we discovered is that there is actually no criminal penalty for people who are tunneling or the utilization of property here in the United States for tunnels to come up. And what has happened? Through those tunnels we have seen tremendous problems with both human and narcotrafficking.

So in this measure that we pass, we will be actually implementing criminalization of that kind of action, once again demonstrating our commitment to securing our Nation's border.

Similarly, we obviously are very concerned about the fact that in heavy urban areas and in five particular areas, we have seen just across the border, above ground, large problems of human and narcotrafficking, and for those areas we are going to see the construction of border fences.

I do not like the idea of fences. I really do not like the idea of fences at all. But our empirical evidence, Mr. Speaker, has shown that for the 14 miles along the border between Tijuana, Mexico, and San Diego, California, we have seen a great improvement in the standard of living and quality of life because of this border fence which has been established.

□ 0945

In fact, there has been a 50 percent reduction in the crime rate in San Diego, in large part attributed to the fact that we have this fence here.

I look forward to the day when we will be able to take down all of these fences. But, frankly, as long as we have human trafficking and narcotrafficking the way it is today, I do not believe that we as a Nation have a choice. And so in those areas where we have heavy urban populations on both sides the border, I think it is essential that we do this.

There are other areas where utilization of 21st century technology, using motion detectors, using unmanned aerial vehicles and other things will be very beneficial in our quest to ensure that we secure our Nation's borders.

Now, as we look at our items in this bill, I believe that the funding that is provided is going to help us deal with the overall global war on terror. Again, if you think about the preamble of the U.S. Constitution, I always argue that, in that preamble, the five most important words of the preamble are: Provide for the common defense.

And those five words, I believe, are addressed very successfully with this Homeland Security Appropriations Conference Report. So, Mr. Speaker, I am very proud of the work that has been done in a bipartisan way, Democrats and Republicans coming together, to do the right thing.

I hope it can be used as a model for many of the things that we proceed with in the future.

Ms. SLAUGHTER. Mr. Speaker, I yield 6 minutes to the gentleman from Minnesota (Mr. SABO).

Mr. SABO. Mr. Speaker, I thank the gentlewoman for yielding me time. Thank you for your great service on Rules Committee.

And to the chairman, I thank him for his kind remarks.

Mr. Speaker, I am a strong supporter of the base bill on homeland security funding. But there is one part of that bill which I think we could significantly improve. So I would ask Members today to vote against the previous question so that we can offer a separate concurrent resolution to the conference report which would delete from the bill four provisions as it relates to the regulation of chemical plants that, in my judgment, significantly weaken the legislation.

As background, the whole question of setting security standards for chemical plants is an issue that has concerned me for a long time. We have had a void in the ability of the Secretary to act to adopt any regulation as it impacts most chemical plants in this country.

This year, while we were considering the appropriations bill, we offered and adopted in committee an amendment that gave authority to the Secretary to adopt regulations relating to the security of chemical plants.

We envisioned that as being a temporary solution, while the authorizers had time at some point to pass regular authorizing legislation. That was stricken by a point of view on the House floor. In the Senate, fortunately, in an amendment by BOB BYRD, adopted that same amendment. And that is what we had in conference.

There then proceeded negotiations between the authorizers. And it ended up being a partisan negotiation between majority Members in the House and Senate which produced the recommended plan for the regulation of chemical plants, which the conference committee substituted for the Byrd amendment.

That more detailed recommendation has not been subject to debate in either the House or the Senate or considered in that form by any of our committees. And it has four provisions which I think significantly weakens the authority of the Secretary to adopt regulations. I think we should strike them.

The first one is a provision that states that: The Secretary may not disapprove a site security plan submitted under this section based on the presence or absence of a particular security measure.

What that means, I frankly do not know. The reality is that any security measure is going to deal with a whole series of particular security measures. Some are going to be more important than the other. Why we limit the authority of the Secretary in this fashion is beyond me. I do not know what it means. There must be some relevance to it. But it clearly would seem to limit the ability of the Secretary to adopt a comprehensive security measure.

Then we have another provision which is rather strange. And it says that if we proceed in court and any information is provided on plants to that court, then that unclassified information becomes classified when it reaches the courtroom. I know of no other instance in our government where unclassified information becomes classified because it goes to court.

I have no idea what the precedent for any such action is. It is unique. It is new. And we should not have it in this bill. I do not know, as I read this bill, whether the States have the ability to adopt security standards which are stricter than the Federal law. Some read this language to say it prohibits the States from having stricter standards.

I read it as being unclear, and where we turn that issue over is not to our judgment but to the courts. As I read the language, if a State adopts stricter standards and the Secretary approves them, I expect it will be challenged in court. If they adopt stricter standards and the Secretary rejects them, that will be challenged in court.

In my judgment, the States should have that ability. But whether we think they should or should not have it, it is a decision we should make and not simply leave it to the vagaries of what a particular court might decide.

Another provision in this bill simply says that it prohibits the public from filing any suit to enforce the provisions of this law. Again, that makes no sense to me and goes contrary to what we normally do in this country.

I am glad we are finally moving forward with chemical plant security. However, the negotiations, not by the conferees on the appropriation bill but by the negotiators from the two authorizing committees, have produced a version of chemical security regulation that in my judgment is much weaker than it need be, and we should clarify it and strike those provisions. Not add anything new, but simply make sure that the Secretary has greater authority and to make sure that States have the right to adopt stricter regulation if they so desire.

So I urge the rejection of the previous question so that we can offer such an amendment.

Mr. SESSIONS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, in the month of August, I had an opportunity with several other Members to go to Laredo, Texas, to visit our border to see the border operations and to see the things that were happening there. I had a chance to run across Texas Army National Guard personnel who were attempting to not only work but work successfully with Border Patrol and other Customs and Immigration enforcement personnel.

I wanted to draw attention to how important our National Guard has been from each of our States in protecting our borders, working on border security and doing those things that are necessary. This came as a result of a plan that happened with input from Congress, that happened through the great work that was done not only with the President but also with local Governors and people who are interested in doing this.

I had a chance to go with the Honorable JO BONNER from Alabama down to Laredo. And both he and I together had a chance to see firsthand how the Army National Guard worked with Border Patrol. We went out that night to see firsthand their needs.

Mr. Speaker, that is what is in this bill, the ability that we have to protect our border, to provide the necessary resources, to make sure that our men and women who are with official law enforcement and also those who are with the Guard are able to make sure that this country is protected.

That is what is in this bill. I am proud of it. I am going to ask for everyone's vote for not only the rule but also the underlying legislation.

Mr. Speaker, I reserve the balance of my time.

Ms. SLAUGHTER. Mr. Speaker, I yield 2 minutes to the gentleman from New Jersey (Mr. PALLONE).

Mr. PALLONE. Mr. Speaker, I rise in strong opposition to this rule because the legislation would seriously undermine efforts to secure chemical facilities across the country. I want to join in the comments made by the ranking member, Mr. SABO.

Back in July, the Homeland Security Committee passed by voice vote a bill that would go a long way towards fixing the chemical security problem in the aftermath of 9/11. This is one of the most glaring problems in our post-9/11 security efforts that has been neglected here in Washington by the Congress and by the administration.

Yet rather than moving forward with this bill out of the Homeland Security Committee, bringing to it the floor and having an open debate; Republicans have decided to craft an industry-friendly proposal behind closed doors and stick it in the Homeland Security Appropriations Conference Report.

Now, this is no way to deal with such a serious security issue. EPA data indicates that there are more than 100 chemical plants across the country that could put over 1 million people at risk in the event of a serious accident or terrorist attack. More than 7,000 chemical plants could put 1,000 people or more at risk.

Yet under the cover of a conference report, the Republican leadership has seriously undermined our efforts to secure these chemical facilities. The language here exempts thousands of chemical plants not deemed "high risk" by the Department of Homeland Security, along with 3,000 drinking water and wastewater facilities that use large quantities of chlorine.

It also prohibits the Department of Homeland Security from doing anything to move towards the use of inherently safer technologies or substances. And it fails to protect the rights of States like my own, New Jersey, to implement stronger security requirements at chemical plants.

Mr. Speaker, the consequences of an incident at a chemical facility could be dire for residents of my State of New Jersey. We saw this last Tuesday when an accidental release of sulfur dioxide sent 59 people to the hospital. If that is what happens from one simple mistake, I shudder to think of the consequences of an attack by determined terrorists.

We need to reject this rule. Strip this weak chemical security language from the conference report and move ahead with strong legislation like what the Homeland Security Committee already passed here in the House.

Mr. SESSIONS. Mr. Speaker, here we are talking about the rule for Homeland Security, and yesterday, the Rules Committee had an opportunity to speak very plainly with the appropriators who were responsible for this Homeland Security appropriations bill. We spoke with them about several matters. One of them was about the air marine operation under the CBP, Customs and Border Protection.

I would like for my colleagues to know, who have joined me and others in the effort to talk about the air interdiction program that we have about drugs that come into this country, that this bill provides $600 million for their border and air space protection.

Secondly, we had an opportunity to talk about the fugitive operation teams that nationwide are gathered together under Customs and Border Protection to make sure that the apprehension of those people who are illegal aliens that are in our country here who are fugitives and who are dangerous are picked up and dealt with by our judicial system in this country.

Over and over and over, the things that we have talked about that were necessary and needed throughout the years are contained with funding in this bill. I am very happy to say that I am proud of what this administration has done by listening to us, and perhaps more importantly, our appropriators, like HAL ROGERS who brought this bill, who listened and who have done something about it.

☐ 1000

Mr. Speaker, I yield 5 minutes to the gentleman from Georgia (Mr. GINGREY).

Mr. GINGREY. Mr. Speaker, I thank my Rules Committee colleague for yielding the time.

I rise in support today for this rule and, of course, the underlying conference report, H.R. 5441, the Department of Homeland Security Appropriations Act for Fiscal Year 2007. I would like to commend Chairmen Lewis and Rogers and, of course, our dear friend Martin Sabo for their tireless effort in keeping our homeland safe.

H.R. 5441 is one more piece of pro-security legislation advanced by this Congress, and its passage prior to our adjournment, Mr. Speaker, is critical to ensuring funding for homeland security programs that do keep our Nation safe.

This is a comprehensive bill. It addresses several aspects of our porous border problem. It provides increased technologies for use in explosion detection. It beefs up maritime and chemical security and, most importantly, overhauls FEMA.

As we know a big part of keeping our homeland safe is protecting these borders. The bill includes $1.8 billion in emergency funding for border and maritime security. It includes $1.2 billion for the construction of a border fence, and it provides for the hiring of an additional 1,500 border patrol agents and includes a commonsense provision brought forth by our chairman of the Rules Committee criminalizing the construction of border tunnels.

However, Mr. Speaker, despite the great things in this legislation, I realize that it is not a perfect bill. One of the most notable problems is securing our ports of entry with better background check technology. As you remember, we passed language in the 9/11 bill and in the REAL ID Act last year to require biometric passports by a certain deadline, along with the proper equipment to read the high-tech identification. The deadline was extended 6 months, and with this appropriation bill, unfortunately, it is extended another 17 months because someone in the other Chamber from a northern border State put language in there to further delay this crucial, crucial program. We cannot afford to keep extending the deadline when our security is at stake.

Mr. Speaker, shoe bomber Richard Reed, we all remember him, entered our country on an unsecured visa waiver. This visa waiver program allows 28 countries, their folks, to come into this country with nothing, really, to prove their identification. He came in with a visa waiver. We have to know who is coming into our country to prevent terrorists from having a free pass.

Despite all the improvements made in this appropriations bill, they are meaningless without securing our ports of entry.

Mr. Speaker, all week long we have witnessed this Congress passing legislation to fund critical Department of Defense programs, to try terrorist detainees in military courts and to listen in on the communications of terrorist operatives plotting our destruction. Heather Wilson from New Mexico explained that so well yesterday on this floor.

It is unfortunate that throughout this week we have witnessed obstructionism on just about every front and some on the other side advocating for a cautious approach to fighting terrorism out of concern of treating the terrorists fairly. In my opinion, Mr. Speaker, this is the wrong approach, and we must remain aggressive in our efforts to keep America safe.

I encourage all of my colleagues on both sides of the aisle to keep this in mind, to ensure we give our government the tools it needs to protect our homeland.

I urge support of this rule and the underlying legislation.

Ms. SLAUGHTER. Mr. Speaker, I yield 3½ minutes to the gentleman from Oregon (Mr. BLUMENAUER).

Mr. BLUMENAUER. Mr. Speaker, I appreciate the gentlewoman's courtesy and her leadership.

This is sort of a bizarre rule that is limiting debate on three very critical areas, but I would like to just focus on one because under the guise of protecting property rights, H.R. 4772 is back before us, and it will undermine the quality of life for most Americans.

I find no small amount of irony that our friends on the Republican side of the aisle who say that they support local control are now going to gut some of the most basic protections for neighborhoods, businesses, and the environment to make sure that they are decided at the State and local level. Remember, these are our same friends who have come to us with provisions to strip away from these same Federal courts being able to rule on the Pledge of Allegiance or on marriage. Those are too important to be given to the Federal courts, but you are going to take away opportunities for people to be able to deal with the most fundamental of issues in terms of neighborhood quality and throw that into the Federal courts without having an opportunity to work it through at the State and local level.

The Supreme Court itself has recognized that State and local courts are the best way to deal with things that are inherently local in nature. I spent 10 years as a commissioner of public works in the city of Portland. I watched development proposal after development proposal come over the transom. If your rules were in place, it would not help the little developer because they would not have the firepower to be able to go through the Federal process, but it would have been an amazing club for big developers to have their way for proposals that were incomplete, inadequate, or not carefully thought through. In some cases, there were things that were making mistakes. In others, they were trying to do something that would have threatened adjacent businesses, adjacent homeowners. What we did was work with them, going through the process, and as a result, time after time, we had better results.

This would undercut that effort. That is why 36 attorney generals, including Mr. CHABOT's attorney general, says that this is an unnecessary Federal intrusion and it ought to be resisted.

Mr. SESSIONS. Mr. Speaker, I yield myself such time as I may consume.

Our previous speaker has just hit on probably one of the most important aspects of freedom in America, and that is the right of a person to be able to own property, the ability that we have to have our house to be our castle. Yet as we talk about the issue, I would like to add my dimension to it.

The bottom line is that we are engaged in this on behalf of people who own property, people who own property who have grown weary of having local government take their property without due compensation for the benefit of local government, and we are going to protect the private property owner. We believe private property rights are very important, and that is why we are getting engaged, because we have seen local communities do for their own best interest those things that they wanted to do by taking private property from a person.

We believe it is a simple part of what the Constitution is about. We believe that private property rights are important. I do understand the argument, and it is related to a person who cannot fight government even in their own local community when that is what government wants to do.

We are going to give a level playing field to those individuals because we believe that the individualist who owns his own property should have equal rights also, not just to be taken advantage of by local communities.

Mr. Speaker, that is also in this rule. We support the underlying legislation.

Mr. Speaker, I reserve the balance of my time.

Ms. SLAUGHTER. Mr. Speaker, I am pleased to yield 5½ minutes to the gentleman from Massachusetts (Mr. MARKEY).

Mr. MARKEY. Mr. Speaker, I thank the gentlewoman very much, and this rule is just another appalling case of Republican leadership siding with special interests over the security interests of our country.

In July, the Homeland Security Committee reported a bipartisan chemical security bill. We know that al Qaeda wants to hit huge chemical facilities in our country that could cause between 10,000 and hundreds of thousands of injuries. That was a good bill. It was bipartisan.

It required that there be mandatory enforceable security provisions that apply to all chemical facilities in America. It required the company shift to safer chemicals and methods to reduce the consequences of a terrorist attack. The bill ensured that the States could set higher security standards. The bill contained red teaming exercises to test whether or not security around these chemical facilities was, in fact, adequate. It contained worker training provisions to upgrade workers' ability to protect against an al Qaeda attack. It contained civil and criminal provisions, and it contained whistleblower protections for chemical industry workers if any Paul Revere-like figure would rise up to warn that there was a danger at a chemical facility.

Democrats and Republicans alike praised the committee's work, and Republicans promised to protect the language as it came out on to the House floor.

But instead, the House Republican leaders refused to allow it to be considered for a vote on the House floor. Instead, the Republicans on the Homeland Security Committee and on the Energy and Commerce Committee acquiesced to the wishes of the chemical industry behind closed doors to negotiate the weak, inadequate language contained in the conference report.

In public, the Republicans profess their support for strong chemical security legislation, but in private, they provided their chemical industry allies with an early Christmas present, the weak legislation the industry had been pursuing all along, and that is what we are now going to debate on this House floor; not the bipartisan secure chemical bill, but the chemical industry-written bill that the Republicans are now bringing out here in a closed rule that will not have any debate at all.

And by the way, if back home you have a Governor, you have a mayor that is very concerned about the ability of their hometown or their State to put stronger security measures around a chemical facility, well, after today you can just tell your Governor, your mayor, it is up to the Department of Homeland Security. They are not going to be able to increase it back at home. This bill is going to make it possible for the chemical industry to keep the local governments and the State governments wrapped up in red tape forever as those local communities, those local heroes, and by the way, if there is an al Qaeda attack, people are not going to call the Department of Homeland Security. They are going to call the local police, the local fire, the local emergency medical personnel. They are going to be the ones that have to respond, and when this bill is passed their hands are going to be tied behind their back in terms of their ability to put stronger, tougher protections around these chemical facilities, especially in urban areas.

It also reduces the number of facilities that have to be covered. Instead of all of the facilities that could cause upwards of 10,000 fatalities or injuries, they eliminate 90 percent of the facilities from having to be covered by the provisions of the legislation that we are talking about here today. And by the way, the Department of Homeland Security is prohibited from disapproving of a facility's security plan because of the absence of any specific security measure.

So the Department of Homeland Security looks at a chemical facility, sees that there is a problem, they still cannot disapprove that plan. How in the world can the Department of Homeland Security be effective if their hands are tied behind their back? This is an area that we know is at the top of the al Qaeda terrorist target list, chemical facilities; and on the last day, professing to care about homeland security, and by the way, if al Qaeda is going to attack today, all the wiretapping, everything else that you want to do, if there is a secret group already in America poised to hit a chemical facility, then you better have the protection that is built around it.

What you are doing today in this bill is you are making it infinitely more likely that al Qaeda can make a successful attack against a chemical facility. You are gagging the Democrats. You are handing it over to the chemical industry for them to decide on their bottom line cost-basis analysis of the type of security they want to put in place.

Right now, it is harder to get into some nightclubs in New York City than it is for al Qaeda to get into a chemical facility in the United States of America. That is the bottom line on the bill the Republicans are bringing out here today.

Vote "no" on this Republican rule.

□ 1015

Mr. SESSIONS. Mr. Speaker, I want to thank the gentleman for bringing this up as an issue, because I think, once again, it shows clearly the differences between our parties and the way we think about this.

It is true that the Republican Party would be accused of having a balanced approach not only to making sure that these chemical companies have taken care of their responsibility for security but making sure also that we protect the jobs that come with those and the security of the towns in which they are located in.

We heard the gentleman use words like stronger, tougher, harder and making it more difficult. Everything he talked about was to simply make it harder for these companies to operate in America, Tougher sanctions, more rules, more regulations and being tough on the chemical companies. Yes, we get it, run them out of town. Run them out of the country. Take the jobs and leave.

Mr. Speaker, we are not going to do that in this bill. We are going to bring a balance, a balance that says that these chemical companies are a natural asset to the United States of America. As a part of our ability not only to make sure that we can receive the things that we need, technology and these things which chemical companies provide, that make our lives better every day, we are not going to run them out of town and we are not going to run them out of the country.

They have a responsibility to make sure that their internal elements are safe and the controls they put in place are doing the right thing. They want to take care of their responsibilities, and we are going to make sure that that is balanced. So we are not going to allow the tougher sanctions, the tougher things that our friends on the other side of the aisle want to do. We are going to strike a balance, a balance for safety, a balance for comprehension that what we want is to make sure that they are good corporate citizens and that they look closely at where their own frailties exist.

That is why this bill is going to pass today, because we are not going to run them out of town. We are not going to speak from a position of weakness; we are going to speak from a position of strength. That is another one of the differences between the Republican Party. We are going to balance it out and do the right thing.

Mr. Speaker, I reserve the balance of my time.

Ms. SLAUGHTER. Mr. Speaker, I will use my remaining time to close, but, first, I wish to insert for the RECORD an editorial from this morning's New York Times called, "More Comfort for the Comfortable." That is the way they describe the Private Property Rights Implementation Act. They say it is a deeply misguided giveaway for big real estate developers.

[From the New York Times, Sept. 29, 2006.]

MORE COMFORT FOR THE COMFORTABLE

Congress, which has done so little this session to address the nation's real problems, is expected to vote today on a deeply misguided giveaway for big real estate developers. The bill would create new property rights that could in many cases make it difficult, if not impossible, for local governments to stop property owners from using their land in socially destructive ways. It should be defeated.

The Private Property Implementation Act would make it easier for developers challenging zoning decisions to bypass state courts and go to federal court, even if there was not a legitimate federal constitutional question. Zoning regulations are quintessentially local decisions. This bill would cast this tradition aside, and involve the federal government in issues like building density and lot sizes.

The bill would also make it easier for developers to sue when zoning decisions diminished the value of their property. Most zoning does that. Developers would make more money if they could cram more houses on small lots, build skyscrapers 200 stories tall, or develop on endangered wetlands. The bill would help developers claim monetary compensation for run-of-the-mill zoning decisions on matters like these. It would also make it easier for them to intimidate local zoning authorities by threatening to run to federal court.

Zoning is not an attack on property rights. It is an important government function, and most Americans appreciate that it helps keep their own neighborhoods from becoming more crowded, polluted and dangerous. If more people knew the details of this bill, there would be wide opposition. As it is, attorneys general from more than 30 states, of both parties, have joined the U.S. Conference of Mayors, the National Conference of State Legislatures and leading environmental groups in opposing it.

The bill does a lot of things its supporters claim to abhor. House Republicans were elected on a commitment to states' rights and local autonomy, and opposition to excessive litigation and meddling federal judges.

It is remarkable how quickly they have pushed these principles aside to come to the aid of big developers.

Mr. Speaker, I will be asking Members to vote "no" on the previous question. If the previous question is defeated, I will offer an amendment to the rule to instruct the enrolling clerk to strike from the conference report several last-minute provisions that may compromise chemical plant security.

Mr. Speaker, I ask unanimous consent that the text of the amendment be printed in the RECORD immediately before the vote on the previous question.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from New York?

There was no objection.

Ms. SLAUGHTER. Mr. Speaker, these provisions were not in either the House or Senate-passed versions of the Homeland Security bill. They were drafted in secret and slipped into the conference report without the input of any Democrats in the conference. Even worse, these provisions may make chemical facilities more vulnerable to security problems and not less.

When we talk about balance, I think Homeland Security was supposed to be about rules and regulations. The new language weakens the Homeland Security Secretary's ability to enforce chemical facility site security plans. It takes the authority away. It allows the Secretary to preempt tougher State laws to ensure chemical facility security, and it severely restricts the rights of citizens to take any legal action to enforce chemical facility security requirements. Securing our chemical plants is far too important to be compromised by a secretive and inadequate security plan.

I want to stress that a "no" vote on the previous question will not stop consideration of the conference report, but a "no" vote will allow the House to remove these inadequate and dangerous provisions. Again, please vote "no" on the previous question.

Mr. Speaker, I yield back the balance of my time.

Mr. SESSIONS. Mr. Speaker, I want to join my colleagues in thanking the Honorable MARTIN SABO for his service to this House and for his additions of the things he has brought forth in this legislation, not only working in a bipartisan basis but also his leadership on behalf of making sure that the next generation understands things like port security and other things which the gentleman has specialized in.

Mr. Speaker, I would also like to thank our Speaker, DENNIS HASTERT, and majority leader, JOHN BOEHNER, for their vision and hard work to bring this bill forward today. They worked very closely with Chairman HAL ROGERS and Chairman JERRY LEWIS of the Appropriations Committee, DUNCAN HUNTER of the Armed Services Committee, Chairman JIM SENSENBRENNER of the Judiciary Committee, and certainly STEVE CHABOT of the Judiciary Committee.

This bill we bring forward today is a negotiated product, one where we have worked hard with not only members of the administration, but we have taken, as Members of Congress, trips to see our borders wherever they might be, the northern border or the southern border. We have our appropriators, who have taken time to understand the intricate details and the needs of this great Nation. We have engaged with the Department of Defense to talk about those things that will be necessary to protect our men and women on the battlefield. We have taken time to make sure that we have talked to our CIA, Central Intelligence Agency, about the way that they need to do business and those attributes about who they engage across the world and how we can treat fairly, yes, but treat properly those who would engage in killing Americans and bringing down reigning terror in our cities.

Mr. Speaker, I want to say that this underlying legislation is very important to America's learning lessons from the prior years and bringing those lessons to bear to protect this great Nation. We will speak from a position of strength, not fear. We will not worry about the things that we cannot get done but the things that we can get done. We will learn from our mistakes, and we will learn that, as terrorism in the 21st century evolves, we will, too. That is what these bills are all about.

I am proud of our country, and I say God bless America. Mr. Speaker, I ask for all the Members to support this bill.

THE VOTE ON THE PREVIOUS QUESTION: WHAT IT REALLY MEANS

This vote, the vote on whether to order the previous question on a special rule, is not merely a procedural vote. A vote against ordering the previous question is a vote against the Republican majority agenda and a vote to allow the opposition, at least for the moment, to offer an alternative plan. It is a vote about what the House should be debating.

Mr. Clarence Cannon's Precedents of the House of Representatives, (VI, 308–311) describes the vote on the previous question on the rule as "a motion to direct or control the consideration of the subject before the House being made by the Member in charge." To defeat the previous question is to give the opposition a chance to decide the subject before the House. Cannon cites the Speaker's ruling of January 13, 1920, to the effect that "the refusal of the House to sustain the demand for the previous question passes the control of the resolution to the opposition" in order to offer an amendment. On March 15, 1909, a member of the majority party offered a rule resolution. The House defeated the previous question and a member of the opposition rose to a parliamentary inquiry, asking who was entitled to recognition. Speaker Joseph G. Cannon (R-Illinois) said: "The previous question having been refused, the gentleman from New York, Mr. Fitzgerald, who had asked the gentleman to yield to him for an amendment, is entitled to the first recognition."

Because the vote today may look bad for the Republican majority they will say "the vote on the previous question is simply a vote on whether to proceed to an immediate vote on adopting the resolution * * * [and] has no substantive legislative or policy implications whatsoever." But that is not what they have always said. Listen to the Republican Leadership Manual on the Legislative Process in the United States House of Representatives, (6th edition, page 135). Here's how the Republicans describe the previous question vote in their own manual: Although it is generally not possible to amend the rule because the majority Member controlling the time will not yield for the purpose of offering an amendment, the same result may be achieved by voting down the previous question on the rule * * * When the motion for the previous question is defeated, control of the time passes to the Member who led the opposition to ordering the previous question.

That Member, because he then controls the time, may offer an amendment to the rule, or yield for the purpose of amendment."

Deschler's Procedure in the U.S. House of Representatives, the subchapter titled "Amending Special Rules" states: "a refusal to order the previous question on such a rule [a special rule reported from the Committee on Rules] opens the resolution to amendment and further debate." (Chapter 21, section 21.2) Section 21.3 continues: Upon rejection of the motion for the previous question on a resolution reported from the Committee on Rules, control shifts to the Member leading the opposition to the previous question, who may offer a proper amendment or motion and who controls the time for debate thereon."

Clearly, the vote on the previous question on a rule does have substantive policy implications. It is one of the only available tools for those who oppose the Republican majority's agenda to offer an alternative plan.

Mr. SESSIONS. Mr. Speaker, I yield back the balance of my time, and I move the previous question on the resolution.

The SPEAKER pro tempore. The question is on ordering the previous question.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Ms. SLAUGHTER. Mr. Speaker, I object to the vote on the grounds that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

Pursuant to clause 9 of rule XX, the Chair will reduce to 5 minutes the minimum time for electronic voting, if ordered, on the question of adoption of the resolution.

The vote was taken by electronic device, and there were—yeas 221, nays 186, not voting 25, as follows:

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (during the vote). Members are advised that there are 2 minutes remaining in the vote.

☐ 1100

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Stated for:

Mr. EHLERS. Mr. Speaker, on rollcall No. 505 I could not vote because the First Lady, Mrs. Laura Bush, and I were dedicating the new National Garden at the Botanic Gardens, and I was not able to return to the House Chamber in time to register my vote. Had I been present, I would voted "yea."

PERSONAL EXPLANATION

Mr. WOLF. Mr. Speaker, on rollcall Nos. 504 and 505 I am not recorded because I was absent due to my attendance at former congressman Joel T. Broyhill's funeral. Had I been present, I would have voted "yea."

PRIVATE PROPERTY RIGHTS IMPLEMENTATION ACT OF 2006

Mr. SENSENBRENNER. Mr. Speaker, pursuant to House Resolution 1054, I call up the bill (H.R. 4772) to simplify and expedite access to the Federal courts for injured parties whose rights and privileges under the United States Constitution have been deprived by final actions of Federal agencies or other government officials or entities acting under color of State law, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Pursuant to House Resolution 1054, the amendment in the nature of a substitute printed in the bill is adopted and the bill, as amended, is considered read.

The text of the bill, as amended, is as follows:

H.R. 4772

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Private Property Rights Implementation Act of 2006".

SEC. 2. JURISDICTION IN CIVIL RIGHTS CASES CONCERNING REAL PROPERTY.

Section 1343 of title 28, United States Code, is amended by adding at the end the following:

"(c) Whenever a district court exercises jurisdiction under subsection (a) in an action in which the operative facts concern the uses of real property, it shall not abstain from exercising or relinquish its jurisdiction to a State court if the party seeking redress does not allege a violation of a State law, right, or privilege, and no parallel proceeding is pending in State court, at the time the action is filed in the district court, that arises out of the same operative facts as the district court proceeding.

"(d) In an action in which the operative facts concern the uses of real property, the district court shall exercise jurisdiction under subsection (a) even if the party seeking redress does not pursue judicial remedies provided by a State or territory of the United States.

"(e) If the district court has jurisdiction over an action under subsection (a) in which the operative facts concern the uses of real property and which cannot be decided without resolution of an unsettled question of State law, the district court may certify the question of State law to the highest appellate court of that State. After the State appellate court resolves the question so certified, the district court shall proceed with resolving the merits. The district court shall not certify a question of State law under this subsection unless the question of State law—

"(1) is necessary to resolve the merits of the Federal claim of the injured party; and

"(2) is patently unclear.

"(f)(1) Any claim or action brought under section 1979 of the Revised Statutes of the United States (42 U.S.C. 1983) to redress the deprivation of a property right or privilege secured by the Constitution shall be ripe for adjudication by the district courts upon a final decision rendered by any person acting under color of any statute, ordinance, regulation, custom, or usage, of any State or territory of the United States, which causes actual and concrete injury to the party seeking redress.

"(2) For purposes of this subsection, a final decision exists if—

"(A) any person acting under color of any statute, ordinance, regulation, custom, or usage, of any State or territory of the United States, makes a definitive decision regarding the extent of permissible uses on the property that has been allegedly infringed or taken, without regard to any uses that may be permitted elsewhere; and

"(B) one meaningful application to use the property has been submitted but denied, and the party seeking redress has applied for but is denied one waiver and one appeal, if the applicable statute, ordinance, regulation, custom, or usage provides a mechanism for waiver by or appeal to an administrative agency.

The party seeking redress shall not be required to apply for a waiver or appeal described in subparagraph (B) if such waiver or appeal is unavailable or can not provide the relief requested, or if pursuit of such a mechanism would otherwise be futile.".

SEC. 3. UNITED STATES AS DEFENDANT.

Section 1346 of title 28, United States Code, is amended by adding at the end the following:

"(h)(1) Any claim brought under subsection (a) that is founded upon a property right or privilege secured by the Constitution, but was allegedly infringed or taken by the United States, shall be ripe for adjudication upon a final decision rendered by the United States, which causes actual and concrete injury to the party seeking redress.

"(2) For purposes of this subsection, a final decision exists if—

"(A) the United States makes a definitive decision regarding the extent of permissible uses on the property that has been allegedly infringed or taken, without regard to any uses that may be permitted elsewhere; and

"(B) one meaningful application to use the property has been submitted but denied, and the party seeking redress has applied for but is denied one waiver and one appeal, if the applicable law of the United States provides a mechanism for waiver by or appeal to an administrative agency.

The party seeking redress shall not be required to apply for a waiver or appeal described in subparagraph (B) if such waiver or appeal is unavailable or can not provide the relief requested, or if pursuit of such a mechanism would otherwise be futile.".

SEC. 4. JURISDICTION OF COURT OF FEDERAL CLAIMS.

Section 1491(a) of title 28, United States Code, is amended by adding at the end the following:

"(3) Any claim brought under this subsection founded upon a property right or privilege secured by the Constitution, but allegedly infringed or taken by the United States, shall be ripe for adjudication upon a final decision rendered by the United States, that causes actual and concrete injury to the party seeking redress. For purposes of this paragraph, a final decision exists if—

"(A) the United States makes a definitive decision regarding the extent of permissible uses on the property that has been allegedly infringed or taken, without regard to any uses that may be permitted elsewhere; and

"(B) one meaningful application to use the property has been submitted but denied, and the party seeking redress has applied for but is denied one waiver and one appeal, if the applicable statute, ordinance, regulation, custom, or usage provides a mechanism for waiver by or appeal to an administrative agency.

The party seeking redress shall not be required to apply for a waiver or appeal described in subparagraph (B) if such waiver or appeal is unavailable or can not provide the relief requested, or if pursuit of such a mechanism would otherwise be futile.".

SEC. 5. CLARIFICATION FOR CERTAIN CONSTITUTIONAL PROPERTY RIGHTS CLAIMS.

Section 1979 of the Revised Statutes of the United States (42 U.S.C. 1983) is amended by adding at the end the following: "If the party injured seeks to redress the deprivation of a property right or privilege under this section that is secured by the Constitution by asserting a claim that concerns—

"(1) an approval to develop real property that is subject to conditions or exactions, then the person acting under color of State law is liable if any such condition or exaction, whether legislative or adjudicatory in nature, including but not limited to the payment of a monetary fee or a dedication of real property from the injured party, is unconstitutional;

"(2) a subdivision of real property pursuant to any statute, ordinance, regulation, custom, or usage of any State or territory, or the District of Columbia, then such a claim shall be decided with reference to each subdivided lot, regardless of ownership, if such a lot is taxed, or is otherwise treated and recognized, as an individual property unit by the State, territory, or the District of Columbia; or

"(3) alleged deprivation of substantive due process, then the action of the person acting under color of State law shall be judged as to whether it is arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law.

For purposes of the preceding sentence, 'State law' includes any law of the District of Columbia or of any territory of the United States.".

SEC. 6. CLARIFICATION FOR CERTAIN CONSTITUTIONAL PROPERTY RIGHTS CLAIMS AGAINST THE UNITED STATES.

(a) DISTRICT COURT JURISDICTION.—Section 1346 of title 28, United States Code, is amended by adding at the end the following:

"(i) If a claim brought under subsection (a) is founded upon a property right or privilege secured by the Constitution that concerns—

"(1) an approval from an executive agency to permit or authorize uses of real property that is subject to conditions or exactions, then the United States is liable if any such condition or exaction, whether legislative or adjudicatory in nature, including but not limited to the payment of a monetary fee or a dedication of real property from the injured party, is unconstitutional;

"(2) a subdivision of real property pursuant to any statute, ordinance, regulation, custom, or usage of any State or territory, or the District of Columbia, then such a claim against an executive agency shall be decided with reference to each subdivided lot, regardless of ownership, if such a lot is taxed, or is otherwise treated and recognized, as an individual property unit by the State or territory, or the District of Columbia, as the case may be; or

"(3) an alleged deprivation of substantive due process, then the United States shall be judged as to whether its action is arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law.

In this subsection, the term 'executive agency' has the meaning given that term in section 105 of title 5.".

(b) COURT OF FEDERAL CLAIMS JURISDICTION.—Section 1491 of title 28, United States Code, is amended by adding at the end the following:

"(4) If a claim brought under subsection (a) is founded upon a property right or privilege secured by the Constitution that concerns—

"(A) an approval from an executive agency to permit or authorize uses of real property that is subject to conditions or exactions, then the United States is liable if any such condition or exaction, whether legislative or adjudicatory in nature, including but not limited to the payment of a monetary fee or a dedication of real property from the injured party, is unconstitutional;

"(B) a subdivision of real property pursuant to any statute, ordinance, regulation, custom, or usage of any State or territory, or the District of Columbia, then such a claim against an executive agency shall be decided with reference to each subdivided lot, regardless of ownership, if such a lot is taxed, or is otherwise treated and recognized, as an individual property unit by the State, or territory, or the District of Columbia, as the case may be; or

"(C) an alleged deprivation of substantive due process, then the United States shall be judged as to whether its action is arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law.

In this paragraph, the term 'executive agency' has the meaning given that term in section 105 of title 5.".

SEC. 7. DUTY OF NOTICE TO OWNERS.

(a) IN GENERAL.—Whenever a Federal agency takes an agency action limiting the use of private property that may be affected by the amendments by this Act, the agency shall, not later than 30 days after the agency takes that action, give notice to the owners of that property explaining their rights under such amendments and the procedures for obtaining any compensation that may be due them under such amendments.

(b) DEFINITIONS.—For purposes of subsection (a)—

(1) the term "Federal agency" means "agency", as that term is defined in section 552(f) of title 5, United States Code; and

(2) the term "agency action" has the meaning given that term in section 551 of title 5, United States Code.

SEC. 8. SEVERABILITY AND EFFECTIVE DATE.

(a) SEVERABILITY.—If any provision of this Act or the amendments made by this Act or the application thereof to any person or circumstance is held invalid, the remainder of this Act, the amendments made by this Act, or the application thereof to other persons not similarly situated or to other circumstances shall not be affected by such invalidation.

(b) EFFECTIVE DATE.—The amendments made by this Act shall apply to actions commenced on or after the date of the enactment of this Act.

The SPEAKER pro tempore. The gentleman from Wisconsin (Mr. SENSENBRENNER) and the gentleman from Michigan (Mr. CONYERS) each will control 30 minutes.

The Chair recognizes the gentleman from Wisconsin.

GENERAL LEAVE

Mr. SENSENBRENNER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include extraneous material on H.R. 4772 currently under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. SENSENBRENNER. Mr. Speaker, I yield myself such time as I may consume.

I rise in support of H.R. 4772, the Private Property Rights Implementation Act. Members will recall that this bill was debated on Monday and failed under suspension of the rules, and this is the same bill that is being brought up today under a rule.

I would thus hope that all of the debate that we had for and against the bill would be incorporated by reference into the RECORD, and that Members could kind of modulate their arguments because we have heard them all before and we don't need to repeat them, as will I.

Mr. Speaker, the vast majority of Americans were outraged by a recent Supreme Court decision that severely undermined constitutionally protected property rights. The case of course is the notorious Kelo v. City of New London. In Kelo, the Supreme Court held that a city can take private property from one citizen and give it to a large corporation for economic development purposes.

I, along with Judiciary Committee Ranking Member CONYERS, led the charge to correct that terrible decision by introducing H.R. 4128, the "Private Property Protection Act" which passed the House of Representatives by the overwhelming bipartisan margin of 376-38. However, that bill now languishes in the other body despite overwhelming public support.

In any case, the Supreme Court's recent disregard for constitutionally protected private property is unfortunately not confined to the Kelo decision. In the case of Williamson County

v. Hamilton Bank, which was reaffirmed last term in the case of San Remo Hotel v. City and County of San Francisco, the Supreme Court upheld a set of procedural rules that effectively prohibit private property owners from ever getting into Federal court to have their Federal property rights claims heard on the merits.

I congratulate again the gentleman from Ohio (Mr. CHABOT) for authoring this vitally important legislation that will finally allow property owners to defend their Federal property rights in Federal court.

This bipartisan legislation was reported out of the Judiciary Committee by a voice vote on July 12. I hope it will receive the same bipartisan support on the floor today, and urge my colleagues to support the bill.

Mr. Speaker, I reserve the balance of my time.

Mr. CONYERS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I don't want to be controversial, but H.R. 4772 has nothing to do with Kelo. What the chairman said about it, and our agreement about it is correct; but the reason why H.R. 4772 has nothing to do with homeowners like those in Kelo is that the bill has nothing to do with eminent domain abuses. H.R. 4772 has everything to do with land developers and corporations and regulatory takings claims, and I include for the RECORD four editorials from The Washington Post, the New York Times, the Atlanta Journal Constitution and the Sacramento Bee.

Take It Back

THE HOUSE MOVES A RADICAL BILL TO HOBBLE LOCAL LAND-USE RULES

The House of Representatives is scheduled to take up today a terrible piece of legislation designed to strengthen the hands of developers in their battles with government. Congress considered and rejected a similar bill in 1997 and again in 2000. Now it's back—only worse.

The bill deals with legal claims under the "takings" doctrine—a requirement of the Fifth Amendment under which government has to compensate property holders when it seizes their land. Under current law, landowners must give local governments a chance to resolve such disputes and state courts a fair chance to adjudicate them before bringing the federal courts into the picture. The House bill would let developers make federal courts their first stop. This would give developers a big club to wield over local policymakers, gum up the federal courts with local land-use disputes, and diminish the rightful autonomy of state and local governments on the most local of questions.

Then—and here's where this year's bill is even worse than its predecessors—the substantive rules concerning takings and other constitutional challenges to land-use regulations also would be changed in developers' favor. Right now, federal courts are leery of such challenges in land-use cases, generally deferring to local authorities. Under this proposal, however, they would have to invalidate as a violation of due process any local decision that was "arbitrary, capricious, [or] an abuse of discretion." The bill, in short, would make it easier for landowners to get into court and, once there, easier to block regulations or to demand payment for compliance with them.

Conservatives often style themselves as champions of federalism, and some conservative judges—including Justice Samuel A. Alito Jr. while he served on the U.S. Court of Appeals for the 3rd Circuit—have taken principled stands on preserving local authority over land use. In 1994, Judge Frank H. Easterbrook of the 7th Circuit wrote in frustration: "Federal courts are not boards of zoning appeals. This message, oft-repeated, has not penetrated the consciousness of property owners. . . ." It's time for it to penetrate the consciousness of members of Congress.

More Comfort for the Comfortable

Congress, which has done so little this session to address the nation's real problems, is expected to vote today on a deeply misguided giveaway for big real estate developers. The bill would create new property rights that could in many cases make it difficult, if not impossible, for local governments to stop property owners from using their land in socially destructive ways. It should be defeated.

The Private Property Rights Implementation Act would make it easier for developers challenging zoning decisions to bypass state courts and go to federal court, even if there was not a legitimate federal constitutional question. Zoning regulations are quintessentially local decisions. This bill would cast this tradition aside, and involve the federal government in issues like building density and lot sizes.

The bill would also make it easier for developers to sue when zoning decisions diminished the value of their property. Most zoning does that. Developers would make more money if they could cram more houses on small lots, build skyscrapers 200 stories tall, or develop on endangered wetlands. The bill would help developers claim monetary compensation for run-of-the-mill zoning decisions on matters like these. It would also make it easier for them to intimidate local zoning authorities by threatening to run to federal court.

Zoning is not an attack on property rights. It is an important government function, and most Americans appreciate that it helps keep their own neighborhoods from becoming more crowded, polluted and dangerous. If more people knew the details of this bill, there would be wide opposition. As it is, attorneys general from more than 30 states, of both parties, have joined the U.S. Conference of Mayors, the National Conference of State Legislatures and leading environmental groups in opposing it.

The bill does a lot of things its supporters claim to abhor. House Republicans were elected on a commitment to states' rights and local autonomy, and opposition to excessive litigation and meddling federal judges. It is remark how quickly they have pushed these principles aside to come to the aid of big developers.

[From the Atlanta Journal-Constitution, Sept. 29, 2006]

Federal Courts Not for Zoning Cases

In the past, Congress has wisely rejected efforts to force local zoning disputes into federal court. But politically powerful developer groups armed with campaign cash have once again managed to resurrect the idea, and lawmakers in Congress should once again reject it.

Proponents of House Resolution 4772 claim it would help developers subjected to "takings" of their land thanks to overly restrictive zoning ordinances passed by local governments. Their dubious proposal would sanctify the right of property owners to do what they wish with their property over the right of communities to protect themselves through zoning against traffic congestion, massage parlors and other problems.

Such disputes are currently settled through negotiation or, failing that, by state court judges who are easily accessible to plaintiffs and defendants. But if passed, the bill would effectively sidestep state courts and grant developers special rights to take their appeals directly to federal courts.

The bill is also intended to intimidate local governments from daring to challenge developers who are often armed with better legal and financial resources.

A majority of the Georgia congressional delegation who favored the bill in a procedural vote taken this week would be wise to reconsider their support. Usurping the authority of county zoning boards certainly won't sit well in a state where the rallying cry of "local control" over land use and other issues is especially loud.

A lobbyist for the National Association of Home Builders, a trade group pushing hard for the bill, once bragged that passage of an earlier version would be a "hammer to the head" of state and local governments that tried to thwart developers. If Congress votes to pass the bill as the NAHB hopes, the hammer will wielded by voters angered at special-interest legislation that literally strikes them very close to home.

[From the Sacramento Bee, Sept. 29, 2006]

Regulating Land Use

HOUSE BILL WOULD BE GIFT TO DEVELOPERS

Here we go again. Since 1994, some members of Congress have introduced bills to redefine local land-use regulations as "takings" and to give developers a special fast-track to the federal courts. Currently, developers have to go first to local zoning boards and state courts.

Now a rehash of a failed 2000 bill is being rushed the House floor. Proponents claim it is about stopping eminent domain abuses, but H.R. 4772 is really about hampering the ability of local communities to enforce their zoning and environmental protection rules. Members of Congress should reject this bill, again.

Since 1791, the U.S. Constitution has required government to pay just compensation if it takes private property for public use. So if you own 100 acres and the government takes 98 acres to build a school, it must pay you. But if government rules say developers can only build one house per half acre, that's not a taking. Or if government rules allow development on 98 acres, but not on 2 acres of wetlands, that's not a taking.

H.R. 4772 would change that. Courts no longer would be able to look at the 100-acre parcel as a whole, but would have to look at each lot. So, local government would have to pay developers not to build on every inch in the 100-acre parcel. Taxpayers would pick up the tab for this extortion. If developers didn't get what they wanted from local zoning boards, they'd be able to bypass state courts and go to federal court. Judge Frank Easterbrook, a Reagan appointee in the 7th U.S. Circuit Court of Appeals, dismissed such special pleading in a 1994 case. "Federal courts are not boards of zoning appeals," he wrote. Those who "neglect or disdain" their state remedies should be thrown out of court, period.

Congress has turned back bills like H.R. 4772 before, and it should do so again. This bill, like Proposition 90 on the California ballot in November, radically expands "takings" and should be rejected.

Mr. Speaker, what we are doing now is undermining longstanding interpretations of the fifth amendment. As we discussed on Monday, on two separate occasions, the Supreme Court has ruled that landowners must pursue remedies for just compensation from the State, and the court has confirmed that a Federal court cannot properly consider a takings claim unless or until a landowner has been denied an adequate remedy. To do so would make cases unconstitutionally ripe for Federal review and also limit a Federal court's ability to abstain from State questions.

But the most disturbing thing about this measure is that the bill elevates the rights of property owners over all other categories of persons with constitutional claims. I know we do not believe that the rights of real estate developers are more important than the rights of other Americans. Perhaps some in this body might feel that way, which is why we are attempting to give developers special protections under an early Civil Rights Act, now known as section 1983, that has not been substantially altered in two generations.

The bill's proponents would like you to believe that the land developers and corporations are the only constitutional claimants that must start in State courts; not the case. The cases involving constitutional challenges to detention and violation of the sixth amendment require you start in State courts. Confinement of juvenile offenders in violation of the eighth amendment is another example of the claims that must first go to State courts.

Today we have been called to task and must stand up against this assault on the principles of federalism. Please study this measure carefully because the Nation's civil rights laws and our Constitution, as well as the principles of federalism, are involved.

Mr. Speaker, I rise—again—in strong opposition to the Private Property Rights Implementation Act. Just three days ago, this controversial legislation was defeated on suspension. Republican leadership did not like this vote, so here we are today taking up the same bill under a rule. With the election right around the corner, the Majority is determined to get the outcome that it wants.

We first took up this legislation in the 105th and 106th Congresses. This legislation was bad policy then and remains bad policy today. My concerns about this bill have not changed since Tuesday. H.R. 4772 is a forum-shopping bill that will only benefit land developers and corporations. This bill undermines longstanding interpretations of the 5th Amendment. And furthermore, this legislation elevates property owners over all other constitutional claimants.

First, H.R. 4772 singles out developers and corporations for a special fast track into federal court. Though it has been characterized as such, this bill is not a response to the Kelo decision. Last November, this House passed a bipartisan proposal in response to Kelo. At that time, there was no discussion of providing homeowners like those in Kelo with expedited access to federal courts and there shouldn't be one today.

The reason why is because H.R. 4772 has nothing to do with homeowners like those in Kelo. This bill has nothing to do with eminent domain abuses. H.R. 4772 has everything to do with land developers and corporations and regulatory takings claims.

If a developer does not like a state or local land use decision, it now has the ability to bypass state and local administrative procedures and jump right into federal court. To quote Jerry Howard of the National Association of Homebuilders, "This bill will be a hammer to the head of these State and local bureaucracies."

Second, H.R. 4772 undermines long-standing interpretations of the 5th Amendment. As we discussed on Monday, two times the Supreme Court has ruled that landowners must pursue remedies for just compensation from the state, in state court (Williamson County (473 U.S. 172 (1985)) and San Remo (545 U.S. 323) (2005)).

The Court has confirmed that a federal court cannot properly consider a takings claim unless or until a landowner has been denied an adequate remedy. To do otherwise would make cases unconstitutionally ripe for federal review and also limit a federal court's ability to abstain from state questions.

But this is exactly what H.R. 4772 will do. This bill will allow regulatory takings claims into the federal courts prematurely. States and localities will be restricted in their land use decisions at the threat of federal litigation. It will be harder for jurisdictions to protect against groundwater contamination, waste dumps, and adult bookstores.

Finally, and perhaps most disturbingly, this bill elevates the rights of property owners over all other categories of persons with constitutional claims. I know we do not believe that the rights of real estate developers are more important than the rights of other Americans. Perhaps some people in this body do, which is why we are attempting to give developers special protection under the Civil Rights Act of 1871, now known as Section 1983—a statute that has not been substantially altered since 1871 according to CRS.

This bill's proponents would like you to believe that land developers and corporations are the only constitutional claimants that must start in the state courts. However, this is just not true. Cases involving constitutional challenges to detention in violation of the 6th Amendment and confinement of juvenile offenders in violation of the 8th Amendment are just two examples of claims that must first go to the state courts.

Today we all have been called to task, and must stand up against this assault on the principles of federalism, the Nation's civil rights laws, and our Constitution.

Mr. Speaker, I ask unanimous consent that the gentleman from New York (Mr. NADLER) be assigned to the management of this bill on the floor on the side of the minority.

The SPEAKER pro tempore. Without objection, the gentleman from New York will control the time.

There was no objection.

Mr. SENSENBRENNER. Mr. Speaker, I yield 2 minutes to the gentleman from Texas (Mr. CONAWAY).

Mr. CONAWAY. Mr. Speaker, I thank the chairman. In an attempt to adhere to his admonition that brief is better, I will add my voice of support for this bill.

I represent a rural district in Texas. It is 36,500 square miles. It is 14 percent of the land mass of Texas, and so we have a lot of opportunities for takings from various entities.

I support this bill because most landowners, most developers, simply want answers. "Yes" or "no" is better than "wait until tomorrow." Once you get hung up in this regulatory nightmare of waivers and permits and permits and waivers and that body and this body, just knowing the truth and what the ultimate answer is would be better.

This law defines that Federal courts have to begin hearing a case once a final answer has been given under a permit or a waiver, and allows access to the court so that the property owner will then be able to get an answer that they can live with.

I support this bill. I encourage my colleagues to also support this bill to protect private property rights and give landowners and other property owners their day in Federal court.

Mr. NADLER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the Constitution provides for just compensation where government takes property. On that there is general agreement. There is also agreement that the ability of government to take property must be strictly limited to a public purpose and that the power to take property must be used sparingly and judiciously. Those are not controversial points.

This bill is something different, something radically and dangerously different. This bill goes far outside the bounds of the Constitution to reward big developers and polluters whenever local government tries to preserve the quality of life in our communities by controlling the spread of huge landfills or sprawling subdivisions or factory farms or adult bookstores.

Under this bill, a developer could circumvent local government and normal State court consideration, drag our local governments into Federal court, and demand payment every time our constituents want to preserve their health or quality of life.

The threat of Federal court litigation, expensive Federal court litigation, is real and troubling. One representative of the National Association of Home Developers said this bill would be a "hammer to the head" of every local official. That is what this bill does.

It greatly expands the definition of a taking. It would require the government to provide compensation in cases where the Constitution does not. It would allow developers to game the system by arbitrarily dividing their lots to squeeze money out of communities.

Should we have to pay someone to keep them from poisoning our drinking water or ignoring our zoning laws or opening an adult bookstore? That seems to be the claim of developers who want to fill in wetlands at will or build garbage dumps the size of small towns. Is it a taking for which me must compensate the developer if we make them pay their fair share of the cost of the new roads, sewers, water lines and schools that will be needed to support their new subdivision?

Should local taxpayers have to pay a developer whenever any conditions are imposed on a developer before allowing him to move forward? That's what this bill does.

Let's have no doubt this is a big developers' bill. My friend, the sponsor of this bill, has trumpeted the fact that the bill is supported by the home builders, the realtors, the Chamber of Commerce, the National Federation of Independent Business, and the U.S. Farm Bureau.

It is opposed by environmental organizations, the American Planning Associations, consumer organizations, and your mayors, your Governors and your attorneys general of the States. Which side are you on?

One of the majority's witnesses at our hearing on this bill was Mr. Frank Kottschade, a major local developer who complained that he didn't get everything that he wanted from his local government.

Another was an attorney, Joseph Trauth, who represents Wal-Mart, Home Depot and GE in zoning cases. Small developers. He is proud of the fact that he helped the Rumpke landfill in Hamilton, Ohio, expand by 65 acres.

That is who the bill is for, not for homeowners who want to protect their homes and communities.

Let me clear up some confusion. Many Members of this House were outraged by the Supreme Court's Kelo decision which dealt with the use of eminent domain to take private property from one person and give it to another private party in order to promote economic development.

□ 1115

The distinguished chairman spoke of Kelo. This bill has nothing to do with Kelo and nothing to do with eminent domain. It is not about taking property. It is about regulating responsible use of property. It is about stopping the ability of local governments to pass zoning laws, environmental protection laws, to enforce them to protect the local residents against those who would pollute the environment, build every inch and fill our suburban towns with 200-story buildings.

You have heard Kelo discussed in this debate because the real purpose of this bill is simply indefensible. This bill has to do with zoning, environmental protection, and environmental regulation. This is about protecting homeowners from abuse by developers and polluters. The bill, actually, is about stopping the ability of local governments to protect homeowners from abuse by developers and polluters.

I would just note the irony that the Republican leadership the other day moved a bill that would limit the rights of religious minorities under the 1871 Civil Rights Act. This bill expands the rights of developers and polluters under the same 1871 Civil Rights Act and allows them to extort local communities. That is the Republican civil rights agenda.

Mr. Speaker, I reserve the balance of my time.

Mr. SENSENBRENNER. Mr. Speaker, I yield such time as he may consume to the gentleman from Ohio (Mr. CHABOT), the author of the bill.

Mr. CHABOT. Mr. Speaker, I thank the gentleman for yielding.

I want to, first, thank the gentleman from Wisconsin for his leadership and his cosponsorship of this bill, also the 35 other cosponsors and the 234 Members of this body that voted for it. It passed just the other day by a margin of 60 votes. Now, it needed two-thirds, so that is the reason for our being here today. But there is really overwhelming support. I also want to thank the gentleman from Tennessee, BART GORDON, for his leadership as well in support of this legislation.

Just to address a couple of the points that were made before I get into the bulk of my speech here, the gentleman from Michigan mentioned that this elevates property owners above all other constitutional rights and individuals who are trying to establish their constitutional rights. It doesn't do that at all. It puts them on the same level as other people who have a constitutional right that they are trying to enforce. And they should under existing law already have their constitutional rights. This is a fifth amendment right in the Bill of Rights. A person cannot have their property taken without just compensation, without due process of law, and this is just putting them on the same level with all the other constitutional rights that we enjoy in this country.

The gentleman from New York said that this is radical and dangerous. I would venture to say there aren't too many things that this side has tried to pass in the 12 years that I have served with the gentleman that the gentleman hasn't considered to be radical and dangerous, with some exceptions where we have been on the same side. But I think this is not radical nor is it dangerous.

Mr. NADLER. Mr. Speaker, will the gentleman yield?

Mr. CHABOT. I would be happy to yield to the gentleman from New York.

Mr. NADLER. Mr. Speaker, I will concede that when we passed last week my bill to recognize Congress's support for a memorial at the World Trade Center site, after it had been held in committee for 2 years, that was not radical and dangerous.

Mr. CHABOT. Reclaiming my time, Mr. Speaker, as I had indicated, there have been times when the gentleman has not said things we are doing are radical and dangerous, and I agree with that part of what we just talked about.

But the gentleman talks about this being only for big developers and not the little guy, so to speak. I would just note that H.R. 4772, this particular legislation, levels the playing field for small and middle-class property owners and retirees. The expense of bringing a Federal takings claim through the labyrinth of procedures in place today is disproportionately borne by private citizens who cannot draw on the public treasury to defend their rights. This bill, more than any big developer, helps small developers and the middle class, whose finances are particularly strained by the costs of defending their fifth amendment property rights.

This bill helps, for example, elderly retirees who may have all their savings tied up in their home that the government is trying to take away from them for whatever. When their home is unjustly taken by the government, the elderly should not have to spend 10 years paying for expensive lawyers to defend themselves in court. And that is what happens in communities all over this country right now. They should be allowed to go right to the Federal court and defend their federally protected property rights, and this bill would allow them to do just that.

On February 16 of this year, when I authored this, along with the gentleman from Tennessee (Mr. GORDON), this Private Property Rights Implementation Act, and I want to thank the gentleman, as I already did, we introduced this legislation as a result of recent Supreme Court decisions last term, Kelo and San Remo. They, quite frankly, ignored the constitutional rights of property owners.

The fifth amendment to the Constitution, as I stated before, states: No person shall be "deprived of life, liberty, or property, without due process of law, nor shall private property be taken for public use, without just compensation." And that is exactly what we are talking about remedying by this bill.

The House of Representatives acted to correct the Kelo decision by passing a bill, H.R. 4128, by a bipartisan vote of 376–38. Today, Congress has an opportunity to restore the rights taken away by the San Remo decision by passing this bill which will correct that decision.

Now, here is the problem. Strange as it sounds, under current law, property owners are now blocked from raising a Federal fifth amendment takings claim in Federal court. And here is why: The Supreme Court's 1985 decision in Williamson County v. Hamilton Bank requires property owners to pursue to the end all available remedies for just compensation in State court before the property owners can file suit in Federal court under the fifth amendment.

Then just last year, in the case of San Remo Hotel v. City and County of San Francisco, the Supreme Court held that once a property owner tries their case in State court, the property owner is prohibited from having their constitutional claim heard in Federal court, even though the property owner never wanted to be in State court with their Federal claim in the first place. The combination of these two rules means that those with Federal property rights claims are effectively shut out of the Federal court on their Federal takings claims, setting them unfairly apart from those asserting any other kind of Federal right, such as those asserting free speech or freedom of religion or other rights that could be established under the Constitution.

The late Chief Justice Rehnquist commented directly on this unfairness, observing in his concurring opinion in San Remo that "the Williamson County decision all but guarantees that claimants will be unable to utilize the Federal courts to enforce the fifth amendment's just compensation guarantee." The Second Circuit Court of Appeals has also stated that "it is both ironic and unfair if the very procedure that the Supreme Court requires property owners to follow before bringing a fifth amendment takings claim, a State court takings action, also precluded them from ever bringing a fifth amendment takings claim in Federal court.

H.R. 4772, the Private Property Rights Implementation Act, will correct the unfair legal bind that catches all property owners in what amounts to a catch-22. This bill, which is based on Congress's clear authority to define the jurisdiction of the Federal courts and the appellate jurisdiction of the United States Supreme Court, would allow property owners raising Federal takings claims to have their cases decided in Federal court without first pursuing a wasteful and unnecessary litigation detour, and possibly a dead end, in State court.

H.R. 4772 would also remove another artificial barrier blocking property owners' access to Federal court. The Supreme Court's Williamson County decision also requires that before a case can be brought for review in Federal court, property owners must first obtain a final decision from the State government on what is an acceptable use of their land. This has created an incentive for regulatory agencies to avoid making a final decision at all by stringing out the process and thereby forever denying a property owner access to the court. Studies of takings cases in the 1990s indicate that it took property owners nearly a decade of litigation, which most property owners, let us face it, especially a small property owner, can't afford, before takings claims were ready to be heard on the merits in any court, whether it is State or Federal.

To prevent that unjust result, this bill would clarify when a final decision has been achieved and when the case is ready for Federal court review. Under this bill, if a land use application is reviewed by the relevant agency and rejected, a waiver is requested and denied, and an administrative appeal is also rejected, so they have gone through this long process, then a property owner can bring their Federal constitutional claim, and, again, this is a Federal constitutional claim, in a Federal court. The bill would not change the way agencies resolve disputes; rather, H.R. 4772 simply makes clear the steps the property owner must take to make their case ready for court review.

This bill also clarifies the rights of property owners raising certain types of constitutional claims in other ways.

First, it would clarify that conditions that are imposed upon a property owner before they can receive a development permit must be proportional to the impact a development might have on the surrounding community.

Second, it would clarify that if property units are individually taxed under State law, then the adverse economic impact the regulation has on a piece of property should be measured by determining how much value the regulation has taken away from the individual lot affected, not the development as a whole.

Third, the bill would clarify that due process violations involving property rights should be found when the government has been found to have acted in an arbitrary and capricious manner.

This legislation also applies these same clarifications to cases in which the Federal Government is taking the private property. This legislation is endorsed by a number of organizations: the National Association of Homebuilders; the National Association of Realtors; the U.S. Chamber of Commerce; the National Federation of Independent Businesses, which is oftentimes small businesses, most of the time; the United States Farm Bureau; and the Property Rights Alliance.

Again, this legislation passed. A majority of more than 60 votes for this legislation, as opposed to against it just a couple of days ago.

Again, I want to thank the gentleman from Wisconsin (Mr. SENSENBRENNER) for his leadership and also the gentleman from Tennessee (Mr. GORDON) for his leadership.

Mr. NADLER. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from New York.

Mr. BOEHLERT. Mr. Speaker, I rise in strong opposition to this bill. This bill is a bad idea that comes before us periodically but, happily, has never been enacted. And I hope it meets a similar fate this time.

This bill is, quite simply, an effort to take away the rights of each and every property owner who wants to alter or even block an unwanted development. It should really be called the "Private Property Rights Obliteration Act."

If you are a homeowner and you would like a new mall or a new apartment building to be a little smaller so it does not overwhelm your neighborhood with traffic and all the other attendant problems, this bill will make it next to impossible for you to succeed. If you are a homeowner and you don't want a bar to be built right around the corner from your house, this bill will make it almost impossible to succeed. If you are a small businessman and you want to control where a big-box store is going to be built, this bill will make it almost impossible for you to succeed.

In 2000, the last time we debated this, the developers, quite rightly, described this bill as a hammer to the heads of local officials who are trying to guide and manage development. It is a very dangerous bill.

It is also a very odd bill. Here we have supposed conservatives begging Federal courts to intervene in the most local of matters. Why? So that the developers can scare localities into not doing their most fundamental jobs.

Now this time around, the proponents of the bill have come up with some new ingenious arguments for the bill. The only problem is that these arguments are wildly inaccurate. So let me make this clear to my colleagues: This bill does not deal at all with eminent domain or property seizures or the Supreme Court's Kelo decision. Let me restate that, it is so important: This bill does not deal at all with eminent domain or property seizures or the Supreme Court's Kelo decision, which was decided years after the bill was written.

This bill is only about localities exercising their zoning authority. It is not about localities taking property by eminent domain.

And by the way, the substantive problem in Kelo was that a developer was kicking people out of their homes. This bill would only strengthen the hand of developers to an unprecedented degree.

So let us not undermine our Nation's neighborhoods and localities with this unprecedented and radical change in law. Let us listen to all the local governments and environmental groups that have always opposed this bill. Let us make sure our constituents retain their ability to shape their own neighborhoods. Vote "no."

□ 1130

Mr. NADLER. Mr. Speaker, I yield 5 minutes to the gentleman from Oregon (Mr. BLUMENAUER) who has been instrumental in local development, planning efforts in local government.

Mr. BLUMENAUER. Mr. Speaker, I appreciate the gentleman's courtesy. Our friend from New York set the right tone.

Basically I must respectfully disagree with the chairman of the committee. Maybe everything has been said, but I do not think everything has been heard. That is why his attorney general joined with 35 other attorneys general in saying this is flawed, unnecessary, dangerous legislation.

They basically flunk Property Protection 101. It ignores the fact that planning and zoning is to protect everybody's property. Now, the gentleman from Cincinnati would not yield to me. I wonder, if I yielded him 30 seconds, if he would answer a question.

Mr. CHABOT. It is your time.

Mr. BLUMENAUER. Does Hamilton County or the City of Cincinnati have any protective zoning and planning mechanisms that occasionally require more than one decision to be able to reach a rational decision? I yield 30 seconds to the gentleman.

Mr. CHABOT. Mr. Speaker, I thank the gentleman for yielding. We have the same zoning laws that are in many other places around the country. There is an appeals process that we go through, and there is a three-step process under this particular legislation: You have to be denied. You have to then appeal. You have to go a third level. And if you lose at all of those, then the owner has the option to go to either State court or Federal court under this legislation, which seems perfectly reasonable.

Mr. BLUMENAUER. My question is, in Hamilton County or Cincinnati, does it ever occur that there are other activities locally in dealing with the local planning and zoning process that would require an additional step or two? I yield 30 more seconds.

Mr. CHABOT. Of course there are. We have various zoning boards. We have various agencies. We have the same basic things in our community that most of the other communities have. And I was on the community commission. We have appeals of all kinds of nature at all times.

Mr. BLUMENAUER. I appreciate the gentleman's clarification, because I have the same experience you have. I was a county commissioner. I was the commissioner of public works for the City of Portland. I had example after example where there were imperfect applications that were thrown over the transom. I can think of one where there was a massive shopping center that was going to be in an industrial area where they wanted a zone change that required extensive efforts to protect everybody's property protection.

I find it outrageous that you are going to be proposing, under your legislation, short-circuiting that local property protection.

It is ironic that the same committee is telling us that the Supreme Court is not competent to deal with issues of marriage, same-sex marriage. It is not competent to deal with something as complex as the flag amendment. Somehow you are going to be rocketing proposal after proposal into the Federal courts where the Supreme Court has already said that it is not the best place to deal with things that are uniquely local and State in nature.

It is not the small property owner that is going to benefit from this. The little old grandma that you are talking about in the first instance is not filing complex planning and zoning proposals, in the main. This will be utilized by large developers who can wear down communities. And we have seen it happen. When it happens to small communities, where all of the fire power that was arrayed before the Judiciary Committee comes to bear, wearing them down, it is going to make it very difficult to provide those local protections.

Now, Mr. Speaker, that is why unions, planning associations, Clean Water Action, why the Defenders of Wildlife, over a dozen other environmental and conservation groups, including the Trust for Historic Preservation, and as I mentioned 36 attorney generals, including Mr. CHABOT's attorney general in Ohio, say this is flawed and unnecessary legislation.

Mr. Speaker, I would respectfully suggest that rather than trying to drive a wedge into the planning process in local communities, processes that are designed to help to provide protections for everybody, I would strongly suggest that this legislation be rejected.

Mr. SENSENBRENNER. Mr. Speaker, I yield myself 15 seconds just to amplify the fact that my Democratic attorney general was just defeated in the primary, and I reserve the balance of my time.

Mr. NADLER. Mr. Speaker, I yield 45 seconds to the gentleman from Oregon (Mr. BLUMENAUER).

Mr. BLUMENAUER. Mr. Speaker, I would point out that there are 35 other attorney generals that are Republican and Democratic, from Alabama, from Connecticut, from Iowa, Louisiana, Maryland, Massachusetts, Maine, Kentucky, noting the gentleman in the chair, from Idaho—I think he is a Republican—Delaware, Arizona, Alaska, Michigan, Montana, New Jersey, New York, Oregon, Rhode Island, Tennessee, Oklahoma, New Mexico, Nevada, Mississippi, Utah, Vermont, West Virginia, Wyoming. I mentioned Wisconsin, and I do think we ought to reemphasize again Ohio, the home State of the sponsor of this legislation. All these attorneys general oppose this legislation.

Mr. SENSENBRENNER. Mr. Speaker, I yield such time as he may consume to the gentleman from Ohio (Mr. CHABOT) who I think is right, and his attorney general is wrong.

Mr. CHABOT. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, if the gentleman is bringing up statewide office holders in Ohio for credibility purposes, I think the gentleman should probably review the political situation in Ohio and some of the stature that some of those folks hold right now. If you are making an argument to support your side of the case, there are a number of them that are let's say not at the height of popularity as we speak here today.

But just to mention a couple of things that the gentleman touched upon, especially the environmental concerns, for example. There is nothing in this bill that would prohibit the protection of land for environmental, health and safety reasons.

However, if the land is so regulated as to deny the owner any use of it, then, yes, the owner needs to be paid just compensation. The fifth amendment does not have an exemption for environmental laws or any other laws. In fact, the best approach would be to purchase the land, possibly through eminent domain, rather than trying to pull a fast one and harm the property owner or take that person's property without just compensation.

The basic idea is that individual property owners should not bear all of the costs of protecting our communities. A few land owners should not have to sacrifice their own land and economic well being for the betterment of a town or a city; rather, the town should give them just compensation. That is what we are supposed to do in this society.

If we are taking it from a particular individual, and they cannot use their land as they want to see fit, the rest of us, through the appropriate way, should give them just compensation.

The fifth amendment should apply in all taking cases, and we should not be carving out exceptions when it comes to public health and safety, just like in the Kelo legislation we passed; we did not carve out exceptions for the private use of eminent domain because some property is not as desirable to the community at large. All property should be treated the same.

And if there is public health or environmental needs to take the land, owners should be compensated for its taking. There are limits to what the government can do. And that limit is called the Bill of Rights. When the government takes private property, owners must be fairly compensated for their land.

Mr. NADLER. Mr. Speaker, I yield 1 minute to the gentleman from California (Mr. FARR).

Mr. FARR. I thank the gentleman for yielding.

Mr. Speaker, I rise in strong opposition to the bill. I represent some beautiful communities in California: Carmel, many of you know, Pebble Beach, Santa Cruz, communities that have built their aesthetics around regulation. And I sat as a county board of supervisor having to managé these recollections.

The author of the bill is right: We have eminent domain. When there is taking, you get compensated. What his bill is about is protecting developers at the expense of property owners. This is going to decrease property values. Decrease property values.

Because you get them to pay for every kind of regulation. Now, all of us know that when you get a benefit, you do it with a responsibility. You get a driver's license, but that does not allow you to drive over 65 miles an hour. In this case, you would have to pay someone, because they bought a car that can go 100 miles an hour, you have to pay them the difference between 65 and 100.

That is what this kind of bill is about. What is the taking? Is it requiring that the trees be left standing? Is it required to have a little bit of a setback? This bill injures property values and should be defeated.

Mr. SENSENBRENNER. Mr. Speaker, I reserve the balance of my time.

Mr. NADLER. Mr. Speaker, I yield 2 minutes to the gentleman from Washington (Mr. INSLEE).

Mr. INSLEE. Mr. Speaker, it is difficult to understand my friends on the Republican side of the aisle's efforts to stick this burden on the taxpayers and allow developers to do the equivalent of developer's gerrymandering to increase their profits. Why should the taxpayers have to succumb to developers doing to the taxpayers what politicians have done to the voters?

Politicians, what they have done to the voters is carved out these little districts to try to keep their seats safe. If this bill were to become law, which it will not, it will allow developers to carve up their little development, fancy little lines to extract the maximum amount of money from the taxpayers.

Where is the reason to allow developers to decide their own rules, to write their own paycheck from the taxpayers? We have laws on the books enforced by supreme courts that say that, if you have your property taken as a whole, you get compensation. But this bill will game the system, will create this arbitrary system where the developer decides, not the courts, and that is a massive gambit to allow the guy who wants to build a strip club or a gambling spot or a strip mall in your neighborhood to make it impossible for your local community to have meaningful zoning to protect your neighborhood.

And it is done for one single reason, to put money in developers pockets in a way that is not fair. And, by the way, this is not about grandma out in her backyard. It is about people wanting to break up large chunks for a subdivision, and decide that they are going to take a wetlands. Right now, if there is a wetlands, and we have lost humungous amounts of wetlands in the last couple hundred years; whether there is a taking depends on the whole property.

Do not allow this gambit to take place. It is not fair. It is not Constitutional, and it is not going to pass.

Mr. NADLER. Mr. Speaker, how much time is remaining?

The SPEAKER pro tempore (Mr. SIMPSON). The gentleman from New York has 9½ minutes remaining. The gentleman from Wisconsin has 13 minutes remaining.

Mr. NADLER. Mr. Speaker, I yield 1 minute to the gentleman from Oregon (Mr. BLUMENAUER).

Mr. BLUMENAUER. Mr. Speaker, I looked at the website of one of the witnesses that Mr. CHABOT brought from Cincinnati, and looked at a couple of the things that he has been successful in achieving, as significant expansion in a landfill, siting a 1,000-foot radio and TV tower.

These are the sorts of things that I worked on as a county commissioner; I assume Mr. CHABOT worked on when he was a county commissioner. It took years, for example, for us to deal with sitings for radio tower emissions because local people, neighbors and representation from industry were going crazy.

But the lengthy process was worth it; we produced the safest standards in the country that the industry ultimately adopted. Using Mr. CHABOT's approach, it would allow those powerful interests to have bypassed us and gone to Federal court. We could not have stood up to them.

The neighborhood would have been at risk. It is exactly the sort of thing that people elect local officials like we used to be to protect. I think it is outrageous that Congress is going to undermine them.

□ 1145

Mr. SENSENBRENNER. Mr. Speaker, once again I yield such time as he may consume to the gentleman from Ohio (Mr. CHABOT).

Mr. CHABOT. Mr. Speaker, I thank the gentleman for yielding. I just make two quick points.

The gentleman from Oregon disparages the reputation of the gentleman who testified at the committee, Mr. Trauth, who was an attorney, on the types of cases that he takes. I would just note that I oftentimes agree with people who come and testify, disagree. They are lawyers. They represent various sides.

Mr. BLUMENAUER. Mr. Speaker, will the gentleman yield?

Mr. CHABOT. I yield to the gentleman from Oregon.

Mr. BLUMENAUER. Mr. Speaker, I was not disparaging the gentleman. I was talking about his cases that he advertised.

Mr. CHABOT. Reclaiming my time, I happen to know that he also represents people that are at lower income levels that maybe are having their houses taken away by somebody. As all lawyers do, they represent a whole range of cases.

And the other gentleman from Washington talked about how awful this legislation the Republicans are trying to pass is. I would just note to the gentleman that there were 37 Democrats that voted for this legislation just the other day.

I thank the gentleman for yielding.

Mr. NADLER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, it is important to get this debate back on track as to what we are talking about, not what we are not talking about, because the gentleman on the other side keeps bringing up matters that were not debated, that is not before us in this bill.

This bill has nothing to do with Kelo. It has nothing to do with whether there should be compensation for a taking. If the government wants to take your house for a new highway, they have got to pay you. That is the fifth amendment. If the government wants to take your house to give it to somebody else to build something that they judge for public purpose, the Supreme Court said they can do it in Kelo. A lot of people do not like it. That is the Kelo controversy. That is not this controversy.

This controversy has nothing to do with that. This controversy is saying the following: If local government passes regulations legislating land use, you cannot destroy a wetland; you cannot build a building more than 50 stories tall; you cannot build more than five houses on an acre, because it is a suburb and we do not want too much crowding; you cannot build a factory next to the houses; you cannot build a mine in a residential neighborhood. These are limitations on the use of property. It does not say you cannot use your property. It says you cannot build a mine here or you can only build 5 houses on that lot, not 2,500 houses.

Should these kinds of limiting regulations that governments all across our land grant all the time in order to protect local homeowners, in order to protect local property values, in order to protect the quality of life in local communities, should these laws remain possible? This bill says they should not remain possible.

This bill says that in two ways. One, we are going to drag the local community into Federal court where, contrary to the implications of the other side, it is a lot more expensive to litigate generally in Federal court than it is in a local court. So we are going to say that if the megadeveloper who wants to build 300 homes or 50 stories or 100 stories on that local lot next to your house, against the local zoning, he can take you right into Federal court, make you spend a lot of money and not go through the local process and not go through the local court process. That is very dangerous.

That is why the proponents of this bill, the home builders, said this is a hammer to the head of local officials. It is intended to be a hammer to the head of local officials. And who do the local officials represent? The local people who care about their property value, that is who they represent. But we are going to put a hammer to their heads because to hell with the property values of our local communities; to hell with the local planned development; we do not want big developers to be inhibited from building 300 houses on an acre instead of only three or four or whatever the local zoning code says.

Secondly, question: Is it a taking? The big developer buys 100 acres, has a 100-acre plot, two of them are a wetlands. The local government says or the law says you cannot build on the wetlands, you can only build on 98 of your 100 acres. The Supreme Court has always said you look at the totality of the property to determine whether that is a taking requiring compensation, and it is not, because you can build on 98 percent of your property, until this bill comes along and says no you cannot; you can subdivide the lots and if you want to protect that wetland, you have to pay for it.

The bill also says, in effect, that if you want to say that you cannot build 100 houses on that property, you can only build 10, you have to pay the developer for the difference between 10 houses and 100 houses, 90 percent.

Now, Mr. CHABOT says, well, why should the government not pay the property owner if he cannot use his property. Well, the issue is not that. The issue is why should the local government, which wants to regulate or limit use of property in certain ways, have to pay the difference between what they say you can do with your property which they are not taking and everything conceivably you could do?

If the answer is yes, no local government will be able to pay that, no local community can pay that, and you cannot have local land use regulations, you will have to have the 50 story building there because no one can stay the difference between a 10-story limitation in the zoning instead of 50 on every lot.

So this is a question of whether you can have local language regulation, whether you can protect local communities at all.

Finally, let me say that this bill is clearly unconstitutional because this bill says you go right into Federal court. In the Williamson decision in 1985, the Supreme Court held that a takings claim, a claim that you are taking property without due process of law, is not right for Federal court review if the property owner had not obtained a final decision from the appellate administrative agency and the property owner had not first filed the claim in State court to challenge the government action. The court held that these requirements are constitutional requirements, not statutory. We cannot give them the right to go straight into Federal court because the rule, the court said, is compelled by the very nature of the inquiry required by the just compensation, that is, the takings clause, because the fact it is applied in deciding a takings claim simply cannot be evaluated until the administrative agency has arrived at a final decision regarding how it will apply the regulation it issued for the particular land in question.

Just 7 years ago, in 1999, the Supreme Court said again, a Federal court cannot entertain a takings claim under section 1983 or unless or until the complaining land owners are denied an adequate "deprivation remedy," in other words has been denied State court review.

So by forcing the case right into Federal court this is clearly unconstitutional.

Mr. Speaker, I reserve the balance of my time.

Mr. SENSENBRENNER. Mr. Speaker, I yield 2 minutes to the gentleman from Arizona (Mr. FLAKE).

Mr. FLAKE. Mr. Speaker, I thank the gentleman for yielding.

I am pleased to rise in support of H.R. 4772. I am pleased to be an original cosponsor and want to commend Mr. CHABOT and Mr. SENSENBRENNER for shepherding this legislation through.

In Arizona, between State, Federal and Indian reservation, private property extends to less than 20 percent in the State, and so we take private property very seriously there because we cannot afford to lose too much more of it.

So, when we have had the recent Kelo decision and other decisions that have eroded private property rights over the past couple of years, we feel that we need to respond in this way, and if the Federal Government has provisions which erode those private property rights then somebody ought to have a remedy through the Federal courts. And that's what this legislation is about.

I commend the sponsors for pushing it through, and I would encourage support for it.

Mr. NADLER. Mr. Speaker, just to clarify, this bill does not simply deal with sending cases to Federal courts. It deals with the substantive law to be considered there.

Mr. Speaker, I yield 30 seconds to the gentleman from Oregon (Mr. BLUMENAUER).

Mr. BLUMENAUER. Mr. Speaker, I just want to clarify. I find it interesting that my colleague from Cincinnati somehow thinks that, because I noted his witness represents people siting radio towers in landfills, that I was disparaging him. I did not say anything like that. I gave real-life examples of why his bill is going to destroy property values.

If you have a 1,000-foot radio tower next to you or a landfill expansion, in your home town that may make one person more money, but it has the potential of eroding the protections of everybody around them. Those are the real-life examples that they refuse to acknowledge.

Mr. NADLER. Mr. Speaker, I am pleased to yield 1¼ minutes to the gentleman from Washington (Mr. INSLEE).

Mr. INSLEE. Mr. Speaker, there is a lot of anger about eminent domain law right now because of the Kelo decision, and I am one of the people who disagrees with that decision. I do not believe it is wise to allow eminent domain to be used for private purposes, and I think it was a poorly decided decision.

But I want to make sure that the Members understand. This bill does nothing to fix that problem. If you are angry about Kelo, this bill is not medicine. It does nothing to change the standards for when eminent domain can be used by Federal or municipal governments.

So this does not solve the problem, and I want to yield to Mr. CHABOT, if I could, for a moment. I just want to make sure that we are on the same page on this. I have looked diligently through this and can find nothing that changes the eminent domain standard that would overturn the Kelo decision.

Do you agree with me on that assessment?

Mr. CHABOT. Mr. Speaker, will the gentleman yield?

Mr. INSLEE. I yield to the gentleman from Ohio.

Mr. CHABOT. I agree that this is not directly related to Kelo, although there is, I think in many people's minds, some connection, and I think rightfully so.

Mr. INSLEE. Mr. Speaker, I want to make clear it is not the impression in people's minds that counts in Congress. It is what is in people's bills, and in this bill is nothing to solve the Kelo problem.

We should not let anger about Kelo allow developers to game taxpayers. This bill should be rejected.

Mr. NADLER. Mr. Speaker, I yield myself the balance of my time.

Mr. Speaker, this bill deals with when a government exercises zoning power and the big developer disagrees with that, what happens. It says you go into Federal court right away, which is more expensive for the local government to defend, and which is unconstitutional, as I mentioned a few minutes ago, because you have to go through the State remedy.

But second of all, it changes the substantive law to enable the developer to say that any reduction in his use of the property, that says you cannot have more than X number of houses on the property or you cannot destroy all the wetlands on the property, anything that will help preserve the local communities, all the regulations it would depend on to preserve property values, to preserve local communities, they are all gone because you have to pay for them and no local government is going to pay for them.

So nobody is going to be able to go to their local zoning board and complain. They will have to go to the Supreme Court, which will not have time for them.

Mr. UDALL of Colorado. Mr. Speaker, Colorado has been one of the fastest-growing States, and we have our share of contentious land-use disputes—in fact, sometimes it seems we may have more than our share.

And I do think the federal government has a role to play in helping our communities to respond to the problems that come with that rapid growth.

But I don't think the help that's needed is greater involvement of the federal courts in more and more local land-use decisions. And that's what this bill is all about.

This bill does not deal with the questions about use of eminent domain for economic development projects that were involved in the case of Kelo v. New London which attracted so much attention when the Supreme Court issued its decision last year.

I voted for a resolution (H. Res. 340) expressing disapproval of that decision, and for a bill (H.R. 4128) that responded to the decision by barring any state or political subdivision from exercising its power of eminent domain for economic development if that state or political subdivision received federal economic development funds. That bill also would make a state or political subdivision violating that prohibition ineligible for any such funds for two fiscal years, bar the federal government from exercising its power of eminent domain for economic development, and establish a private cause of action for any private property owner who suffers injury as a result of a violation of the bill.

I thought that was an appropriate response to the Kelo decision. But this bill is quite different, and I cannot support it.

I do not think it is needed. The vast majority of land-use disputes, including claims that local regulations or decisions amount to a "taking" of property, are resolved at the local or state level without significant delay.

There is no need to short-circuit the decisionmaking process under local and state law. There is no need to bypass our state courts, because, as noted in a letter signed by Attorney Generals of 32 States, "State courts . . . are ideal forums for resolving disputes involving state and local planning issues [and] . . . the bill thus runs counter to the admonition of Justice Alito . . . that the federal judiciary should avoid procedural rules under which it could be 'cast in the role of a zoning board of appeals.'"

I also don't think the bill is sound policy. I am very concerned that it would severely tilt the field in favor of one interest, developers, and make it even harder for our communities to meet the challenges of growth and sprawl. It would saddle taxpayers of our towns, cities, and counties with the costs of expensive federal litigation. That's one reason it is opposed by the Colorado Municipal League as well as the National League of Cities, the National Association of Counties, the U.S. Conference of Mayors, the National Council of State Legislatures, and the Council of State Governments.

It's also not good for our federal courts. When the House considered similar legislation previously, the Judicial Conference of the United States—the body that speaks for our federal judges—said it "may adversely affect the administration of justice" and "contribute to existing backlogs in some judicial districts."

Finally, as a non-lawyer who takes very seriously the oath we all have taken to support the Constitution, I have listened carefully to the views of the many lawyers—including distinguished Members of the Judiciary Committee—who have concluded that the bill is likely unconstitutional.

Even if I thought the bill was otherwise desirable, that would make me hesitate. But, as I've said, the bill has other serious shortcomings—and the constitutional issues that have been raised mean that enacting this bill would inevitably lead to even more protracted and expensive litigation that would go all the way to the Supreme Court. However the Court might finally rule, that additional litigation is not something that I think is necessary or that Congress should encourage. So, again, I cannot vote for this bill.

Mr. SMITH of Texas. Mr. Speaker, I support this legislation which was introduced by Congressman CHABOT. It protects the Americans' private property.

The Bill of Rights guarantees the right to private property. Such a right lies at the foundation of a democracy where citizens have the freedom to buy, sell, exchange, or make a profit on all forms of property.

In recent years, it has become more and more common for the government to seize private property under the guise of eminent domain for "public" use.

This is something that landowners in my home state of Texas are already frequently faced with under the Endangered Species Act, which prevents a landowner from developing their property if an endangered species is found on the land.

Under last year's Supreme Court decision in Kelo, state and local governments now can take property from a private landowner in order to give or sell it to another private owner. So, we need to make sure Americans can protect their private property ownership.

The Private Property Rights Implementation Act of 2006 clarifies current law in order to give America's property owners those tools.

For instance, H.R. 4772 corrects an anomaly created by two Supreme Court decisions that prevents a property owner from having their federal takings claim decided in Federal Court without first pursuing the case in state court.

And the legislation clarifies that the standard for due process claims in a takings case is "arbitrary and capricious" and not the much higher "shocks the conscience" standard that some courts are using and that almost no property rights case can meet.

The bill also clarifies what constitutes a "final decision" on an acceptable land use from a regulatory agency for purposes of being able to take the claim to federal court.

Some regulatory agencies have avoided making such "final decisions" in order to prevent the property owner from moving forward with the property rights claim.

H.R. 4772 is a good bill that will protect Americans' property rights.

Mr. Speaker, I thank Congressman CHABOT for offering this legislation, and urge my colleagues to support it.

Mrs. MALONEY. Mr. Speaker, I rise today in opposition to H.R. 4772, the "Private Property Rights Implementation Act."

This bill strips local governments of their authority to enforce zoning regulations by allowing real estate developers to bypass the State courts and go directly to Federal courts to challenge local zoning decisions. While I strongly believe in the rights of property owners, zoning is an important tool of local governments to maintain livable communities where residents and businesses can coexist.

The city of New York opposes this legislation because it would intrude upon its authority over local land decisions. Additionally, this bill is opposed by a coalition of groups including the League of Conservation Voters, the National League of Cities, the U.S. Conference of Mayors, and the National Conference of State Legislatures.

I am puzzled about why the Republican Majority feels that this bill should be voted on before we adjourn when there are so many other issues like increasing the minimum wage and implementing the recommendations of the 9/11 Commission that have yet to be considered by this body.

I urge my colleagues to vote "no."

Ms. JACKSON-LEE of Texas. Mr. Speaker, I thank the gentleman for yielding. I appreciate this opportunity to explain my concerns with the bill, H.R. 4772, the Private Property Rights Implementation Act of 2005. I oppose the bill because I am concerned that it will weaken local land use, zoning, and environmental laws by encouraging costly and unwarranted "takings" litigation in Federal court against local officials.

Mr. Chairman, H.R. 4772 would fundamentally alter the procedures governing regulatory takings litigation. Those procedures are required by the U.S. Constitution and have been repeatedly reaffirmed by the U.S. Supreme Court, as recently as last year. The bill purports to alter these requirements by giving developers, corporate hog farms, adult bookstores, and other takings claimants the ability to bypass local land use procedures and State courts. Indeed, the National Association of Home Builders candidly referred to a prior version of the bill as a "hammer to the head" of local officials. Developers could use this hammer to side-step land use negotiations and avoid compliance with local laws that protect neighboring property owners and the community at large.

In addition, section 5 of the bill purports to dramatically change substantive takings law as articulated by the Supreme Court and other Federal courts by redefining the constitutional rules that apply to permit conditions, subdivisions, and claims under the Due Process Clause. The existing rules, developed over many decades, allow courts to strike a fair balance between takings claimants, neighboring property owners, and the public. The proposed rules would tilt the playing field further in favor of corporate developers and other takings claimants, even in the many localities across the country where developers already have an advantage.

As a result, H.R. 4772 would allow big developers and other takings claimants to use the threat of premature Federal court litigation as a club to coerce small communities to approve projects that would harm the public. By short-circuiting local land use procedures, H.R. 4772 also would curtail democratic participation in local land use decisions by the very people who could be harmed by those decisions.

The bill also raises serious constitutional issues. The provisions that purport to redefine constitutional violations ignore the fundamental principle established in Marbury v. Madison (1803) that it is "emphatically the province and duty" of the Federal courts to interpret the meaning of the Constitution. Moreover, under longstanding precedent, a landowner has no claim against a State or local government under the Fifth Amendment until the claimant first seeks and is denied compensation in State court. Federal courts would continue to dismiss these claims, as well as claims that lack an adequate record where claimants use the bill to side-step local land use procedures. The bill will create more delay and confusion by offering the false hope of an immediate Federal forum for those who have not suffered a Federal constitutional injury. In short, this bill is a great threat to federalism, our local land use protections, neighboring property owners, and the environment. Therefore, I urge my colleagues to vote against the bill.

The SPEAKER pro tempore. The gentleman's time has expired.

Mr. SENSENBRENNER. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. Pursuant to House Resolution 1054, the previous question is ordered on the bill, as amended.

The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER pro tempore. The question is on the passage of the bill.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. NADLER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this question will be postponed.

Challenges by trial counsel shall ordinarily be presented and decided before those by the accused are offered.

"(b) PEREMPTORY CHALLENGES.—Each accused and the trial counsel are entitled to one peremptory challenge. The military judge may not be challenged except for cause.

"(c) CHALLENGES AGAINST ADDITIONAL MEMBERS.—Whenever additional members are detailed to a military commission under this chapter, and after any challenges for cause against such additional members are presented and decided, each accused and the trial counsel are entitled to one peremptory challenge against members not previously subject to peremptory challenge.

"§ 949g. Oaths

"(a) IN GENERAL.—(1) Before performing their respective duties in a military commission under this chapter, military judges, members, trial counsel, defense counsel, reporters, and interpreters shall take an oath to perform their duties faithfully.

"(2) The form of the oath required by paragraph (1), the time and place of the taking thereof, the manner of recording the same, and whether the oath shall be taken for all cases in which duties are to be performed or for a particular case, shall be as prescribed in regulations of the Secretary of Defense. Those regulations may provide that—

"(A) an oath to perform faithfully duties as a military judge, trial counsel, or defense counsel may be taken at any time by any judge advocate or other person certified to be qualified or competent for the duty; and

"(B) if such an oath is taken, such oath need not again be taken at the time the judge advocate or other person is detailed to that duty.

"(b) WITNESSES.—Each witness before a military commission under this chapter shall be examined on oath.

"§ 949h. Former jeopardy

"(a) IN GENERAL.—No person may, without his consent, be tried by a military commission under this chapter a second time for the same offense.

"(b) SCOPE OF TRIAL.—No proceeding in which the accused has been found guilty by military commission under this chapter upon any charge or specification is a trial in the sense of this section until the finding of guilty has become final after review of the case has been fully completed.

"§ 949i. Pleas of the accused

"(a) ENTRY OF PLEA OF NOT GUILTY.—If an accused in a military commission under this chapter after a plea of guilty sets up matter inconsistent with the plea, or if it appears that the accused has entered the plea of guilty through lack of understanding of its meaning and effect, or if the accused fails or refuses to plead, a plea of not guilty shall be entered in the record, and the military commission shall proceed as though the accused had pleaded not guilty.

"(b) FINDING OF GUILT AFTER GUILTY PLEA.—With respect to any charge or specification to which a plea of guilty has been made by the accused in a military commission under this chapter and accepted by the military judge, a finding of guilty of the charge or specification may be entered immediately without a vote. The finding shall constitute the finding of the commission unless the plea of guilty is withdrawn prior to announcement of the sentence, in which event the proceedings shall continue as though the accused had pleaded not guilty.

"§ 949j. Opportunity to obtain witnesses and other evidence

"(a) RIGHT OF DEFENSE COUNSEL.—Defense counsel in a military commission under this chapter shall have a reasonable opportunity to obtain witnesses and other evidence as provided in regulations prescribed by the Secretary of Defense.

"(b) PROCESS FOR COMPULSION.—Process issued in a military commission under this chapter to compel witnesses to appear and testify and to compel the production of other evidence—

"(1) shall be similar to that which courts of the United States having criminal jurisdiction may lawfully issue; and

"(2) shall run to any place where the United States shall have jurisdiction thereof.

"(c) PROTECTION OF CLASSIFIED INFORMATION.—(1) With respect to the discovery obligations of trial counsel under this section, the military judge, upon motion of trial counsel, shall authorize, to the extent practicable—

"(A) the deletion of specified items of classified information from documents to be made available to the accused;

"(B) the substitution of a portion or summary of the information for such classified documents; or

"(C) the substitution of a statement admitting relevant facts that the classified information would tend to prove.

"(2) The military judge, upon motion of trial counsel, shall authorize trial counsel, in the course of complying with discovery obligations under this section, to protect from disclosure the sources, methods, or activities by which the United States acquired evidence if the military judge finds that the sources, methods, or activities by which the United States acquired such evidence are classified. The military judge may require trial counsel to provide, to the extent practicable, an unclassified summary of the sources, methods, or activities by which the United States acquired such evidence.

"(d) EXCULPATORY EVIDENCE.—(1) As soon as practicable, trial counsel shall disclose to the defense the existence of any evidence known to trial counsel that reasonably tends to exculpate the accused. Where exculpatory evidence is classified, the accused shall be provided with an adequate substitute in accordance with the procedures under subsection (c).

"(2) In this subsection, the term 'evidence known to trial counsel', in the case of exculpatory evidence, means exculpatory evidence that the prosecution would be required to disclose in a trial by general court-martial under chapter 47 of this title.

"§ 949k. Defense of lack of mental responsibility

"(a) AFFIRMATIVE DEFENSE.—It is an affirmative defense in a trial by military commission under this chapter that, at the time of the commission of the acts constituting the offense, the accused, as a result of a severe mental disease or defect, was unable to appreciate the nature and quality or the wrongfulness of the acts. Mental disease or defect does not otherwise constitute a defense.

"(b) BURDEN OF PROOF.—The accused in a military commission under this chapter has the burden of proving the defense of lack of mental responsibility by clear and convincing evidence.

"(c) FINDINGS FOLLOWING ASSERTION OF DEFENSE.—Whenever lack of mental responsibility of the accused with respect to an offense is properly at issue in a military commission under this chapter, the military judge shall instruct the members of the commission as to the defense of lack of mental responsibility under this section and shall charge them to find the accused—

"(1) guilty;

"(2) not guilty; or

"(3) subject to subsection (d), not guilty by reason of lack of mental responsibility.

"(d) MAJORITY VOTE REQUIRED FOR FINDING.—The accused shall be found not guilty by reason of lack of mental responsibility under subsection (c)(3) only if a majority of the members present at the time the vote is taken determines that the defense of lack of mental responsibility has been established.

"§ 949l. Voting and rulings

"(a) VOTE BY SECRET WRITTEN BALLOT.—Voting by members of a military commission under this chapter on the findings and on the sentence shall be by secret written ballot.

"(b) RULINGS.—(1) The military judge in a military commission under this chapter shall rule upon all questions of law, including the admissibility of evidence and all interlocutory questions arising during the proceedings.

"(2) Any ruling made by the military judge upon a question of law or an interlocutory question (other than the factual issue of mental responsibility of the accused) is conclusive and constitutes the ruling of the military commission. However, a military judge may change his ruling at any time during the trial.

"(c) INSTRUCTIONS PRIOR TO VOTE.—Before a vote is taken of the findings of a military commission under this chapter, the military judge shall, in the presence of the accused and counsel, instruct the members as to the elements of the offense and charge the members—

"(1) that the accused must be presumed to be innocent until his guilt is established by legal and competent evidence beyond a reasonable doubt;

"(2) that in the case being considered, if there is a reasonable doubt as to the guilt of the accused, the doubt must be resolved in favor of the accused and he must be acquitted;

"(3) that, if there is reasonable doubt as to the degree of guilt, the finding must be in a lower degree as to which there is no reasonable doubt; and

"(4) that the burden of proof to establish the guilt of the accused beyond a reasonable doubt is upon the United States.

"§ 949m. Number of votes required

"(a) CONVICTION.—No person may be convicted by a military commission under this chapter of any offense, except as provided in section 949i(b) of this title or by concurrence of two-thirds of the members present at the time the vote is taken.

"(b) SENTENCES.—(1) No person may be sentenced by a military commission to suffer death, except insofar as—

"(A) the penalty of death is expressly authorized under this chapter or the law of war for an offense of which the accused has been found guilty;

"(B) trial counsel expressly sought the penalty of death by filing an appropriate notice in advance of trial;

"(C) the accused is convicted of the offense by the concurrence of all the members present at the time the vote is taken; and

"(D) all the members present at the time the vote is taken concur in the sentence of death.

"(2) No person may be sentenced to life imprisonment, or to confinement for more than 10 years, by a military commission under this chapter except by the concurrence of three-fourths of the members present at the time the vote is taken.

"(3) All other sentences shall be determined by a military commission by the concurrence of two-thirds of the members present at the time the vote is taken.

"(c) NUMBER OF MEMBERS REQUIRED FOR PENALTY OF DEATH.—(1) Except as provided in paragraph (2), in a case in which the penalty of death is sought, the number of members of the military commission under this chapter shall be not less than 12.

"(2) In any case described in paragraph (1) in which 12 members are not reasonably available because of physical conditions or military exigencies, the convening authority shall specify a lesser number of members for the military commission (but not fewer than 9 members), and the military commission may be assembled, and the trial held, with not fewer than the number of members so specified. In such a case, the convening authority shall make a detailed written statement, to be appended to the record, stating why a greater number of members were not reasonably available.

"§ 949n. Military commission to announce action

"A military commission under this chapter shall announce its findings and sentence to the parties as soon as determined.

"§ 949o. Record of trial

"(a) RECORD; AUTHENTICATION.—Each military commission under this chapter shall keep a separate, verbatim, record of the proceedings in each case brought before it, and the record shall be authenticated by the signature of the military judge. If the record cannot be authenticated by the military judge by reason of his death, disability, or absence, it shall be authenticated by the signature of the trial counsel or by a member of the commission if the trial counsel is unable to authenticate it by reason of his death, disability, or absence. Where appropriate, and as provided in regulations prescribed by the Secretary of Defense, the record of a military commission under this chapter may contain a classified annex.

"(b) COMPLETE RECORD REQUIRED.—A complete record of the proceedings and testimony shall be prepared in every military commission under this chapter.

"(c) PROVISION OF COPY TO ACCUSED.—A copy of the record of the proceedings of the military commission under this chapter shall be given the accused as soon as it is authenticated. If the record contains classified information, or a classified annex, the accused shall be given a redacted version of the record consistent with the requirements of section 949d of this title. Defense counsel shall have access to the unredacted record, as provided in regulations prescribed by the Secretary of Defense.

"(b) Lesser Included Offense.—Any reviewing authority with the power to approve or affirm a finding of guilty by a military commission under this chapter may approve or affirm, instead, so much of the finding as includes a lesser included offense.

"§ 950b. Review by the convening authority

"(a) Notice to Convening Authority of Findings and Sentence.—The findings and sentence of a military commission under this chapter shall be reported in writing promptly to the convening authority after the announcement of the sentence.

"(b) Submittal of Matters by Accused to Convening Authority.—(1) The accused may submit to the convening authority matters for consideration by the convening authority with respect to the findings and the sentence of the military commission under this chapter.

"(2)(A) Except as provided in subparagraph (B), a submittal under paragraph (1) shall be made in writing within 20 days after the accused has been given an authenticated record of trial under section 949o(c) of this title.

"(B) If the accused shows that additional time is required for the accused to make a submittal under paragraph (1), the convening authority may, for good cause, extend the applicable period under subparagraph (A) for not more than an additional 20 days.

"(3) The accused may waive his right to make a submittal to the convening authority under paragraph (1). Such a waiver shall be made in writing and may not be revoked. For the purposes of subsection (c)(2), the time within which the accused may make a submittal under this subsection shall be deemed to have expired upon the submittal of a waiver under this paragraph to the convening authority.

"(c) Action by Convening Authority.—(1) The authority under this subsection to modify the findings and sentence of a military commission under this chapter is a matter of the sole discretion and prerogative of the convening authority.

"(2)(A) The convening authority shall take action on the sentence of a military commission under this chapter.

"(B) Subject to regulations prescribed by the Secretary of Defense, action on the sentence under this paragraph may be taken only after consideration of any matters submitted by the accused under subsection (b) or after the time for submitting such matters expires, whichever is earlier.

"(C) In taking action under this paragraph, the convening authority may, in his sole discretion, approve, disapprove, commute, or suspend the sentence in whole or in part. The convening authority may not increase a sentence beyond that which is found by the military commission.

"(3) The convening authority is not required to take action on the findings of a military commission under this chapter. If the convening authority takes action on the findings, the convening authority may, in his sole discretion, may—

"(A) dismiss any charge or specification by setting aside a finding of guilty thereto; or

"(B) change a finding of guilty to a charge to a finding of guilty to an offense that is a lesser included offense of the offense stated in the charge.

"(4) The convening authority shall serve on the accused or on defense counsel notice of any action taken by the convening authority under this subsection.

"(i) there is an apparent error or omission in the record; or

"(ii) the record shows improper or inconsistent action by the military commission with respect to the findings or sentence that can be rectified without material prejudice to the substantial rights of the accused.

"(B) In no case may a proceeding in revision—

"(i) reconsider a finding of not guilty of a specification or a ruling which amounts to a finding of not guilty;

"(ii) reconsider a finding of not guilty of any charge, unless there has been a finding of guilty under a specification laid under that charge, which sufficiently alleges a violation; or

"(iii) increase the severity of the sentence unless the sentence prescribed for the offense is mandatory.

"(3) A rehearing may be ordered by the convening authority if the convening authority disapproves the findings and sentence and states the reasons for disapproval of the findings. If the convening authority disapproves the finding and sentence and does not order a rehearing, the convening authority shall dismiss the charges. A rehearing as to the findings may not be ordered by the convening authority when there is a lack of sufficient evidence in the record to support the findings. A rehearing as to the sentence may be ordered by the convening authority if the convening authority disapproves the sentence.

"§ 950c. Appellate referral; waiver or withdrawal of appeal

"(a) Automatic Referral for Appellate Review.—Except as provided under subsection (b), in each case in which the final decision of a military commission (as approved by the convening authority) includes a finding of guilty, the convening authority shall refer the case to the Court of Military Commission Review. Any such referral shall be made in accordance with procedures prescribed under regulations of the Secretary.

"(b) Waiver of Right of Review.—(1) In each case subject to appellate review under section 950f of this title, except a case in which the sentence as approved under section 950b of this title extends to death, the accused may file with the convening authority a statement expressly waiving the right of the accused to such review.

"(2) A waiver under paragraph (1) shall be signed by both the accused and a defense counsel.

"(A) the accused may not be tried for any offense of which he was found not guilty by the first military commission; and

"(B) no sentence in excess of or more than the original sentence may be imposed unless—

"(i) the sentence is based upon a finding of guilty of an offense not considered upon the merits in the original proceedings; or

"(ii) the sentence prescribed for the offense is mandatory.

"(2) Upon a rehearing, if the sentence approved after the first military commission was in accordance with a pretrial agreement and the accused at the rehearing changes his plea with respect to the charges or specifications upon which the pretrial agreement was based, or otherwise does not comply with pretrial agreement, the sentence as to those charges or specifications may include any punishment not in excess of that lawfully adjudged at the first military commission.

"(B) The Court of Appeals may not review the final judgment until all other appeals under this chapter have been waived or exhausted.

"(2) A petition for review must be filed by the accused in the Court of Appeals not later than 20 days after the date on which—

"(A) written notice of the final decision of the Court of Military Commission Review is served on the accused or on defense counsel; or

"(B) the accused submits, in the form prescribed by section 950c of this title, a written notice waiving the right of the accused to review by the Court of Military Commission Review under section 950f of this title.

"(b) Standard for Review.—In a case reviewed by it under this section, the Court of Appeals may act only with respect to matters of law.

"(2) A judgment as to legality of proceedings is final for purposes of paragraph (1) when—

"SUBCHAPTER VII—PUNITIVE MATTERS

"Sec.
"950p. Statement of substantive offenses.
"950q. Principals.
"950r. Accessory after the fact.
"950s. Conviction of lesser included offense.
"950t. Attempts.
"950u. Solicitation.
"950v. Crimes triable by military commissions.
"950w. Perjury and obstruction of justice; contempt.

"§950p. Statement of substantive offenses

"(a) Purpose.—The provisions of this subchapter codify offenses that have traditionally been triable by military commissions. This chapter does not establish new crimes that did not exist before its enactment, but rather codifies those crimes for trial by military commission.

"(b) Effect.—Because the provisions of this subchapter (including provisions that incorporate definitions in other provisions of law) are declarative of existing law, they do not preclude trial for crimes that occurred before the date of the enactment of this chapter.

“§ 950q. Principals

“Any person is punishable as a principal under this chapter who—

“(1) commits an offense punishable by this chapter, or aids, abets, counsels, commands, or procures its commission;

“(2) causes an act to be done which if directly performed by him would be punishable by this chapter; or

“(3) is a superior commander who, with regard to acts punishable under this chapter, knew, had reason to know, or should have known, that a subordinate was about to commit such acts or had done so and who failed to take the necessary and reasonable measures to prevent such acts or to punish the perpetrators thereof.

“§ 950r. Accessory after the fact

“Any person subject to this chapter who, knowing that an offense punishable by this chapter has been committed, receives, comforts, or assists the offender in order to hinder or prevent his apprehension, trial, or punishment shall be punished as a military commission under this chapter may direct.

“§ 950s. Conviction of lesser included offense

“An accused may be found guilty of an offense necessarily included in the offense charged or of an attempt to commit either the offense charged or an attempt to commit either the offense charged or an offense necessarily included therein.

“§ 950t. Attempts

“(a) IN GENERAL.—Any person subject to this chapter who attempts to commit any offense punishable by this chapter shall be punished as a military commission under this chapter may direct.

“(b) SCOPE OF OFFENSE.—An act, done with specific intent to commit an offense under this chapter, amounting to more than mere preparation and tending, even though failing, to effect its commission, is an attempt to commit that offense.

“(c) EFFECT OF CONSUMMATION.—Any person subject to this chapter may be convicted of an attempt to commit an offense although it appears on the trial that the offense was consummated.

“§ 950u. Solicitation

“Any person subject to this chapter who solicits or advises another or others to commit one or more substantive offenses triable by military commission under this chapter shall, if the offense solicited or advised is attempted or committed, be punished with the punishment provided for the commission of the offense, but, if the offense solicited or advised is not committed or attempted, he shall be punished as a military commission under this chapter may direct.

“§ 950v. Crimes triable by military commissions

“(a) DEFINITIONS AND CONSTRUCTION.—In this section:

“(1) MILITARY OBJECTIVE.—The term ‘military objective’ means—

“(A) combatants; and

“(B) those objects during an armed conflict—

“(i) which, by their nature, location, purpose, or use, effectively contribute to the opposing force's war-fighting or war-sustaining capability; and

“(ii) the total or partial destruction, capture, or neutralization of which would constitute a definite military advantage to the attacker under the circumstances at the time of the attack.

“(2) PROTECTED PERSON.—The term ‘protected person’ means any person entitled to protection under one or more of the Geneva Conventions, including—

“(A) civilians not taking an active part in hostilities;

“(B) military personnel placed hors de combat by sickness, wounds, or detention; and

“(C) military medical or religious personnel.

“(3) PROTECTED PROPERTY.—The term ‘protected property’ means property specifically protected by the law of war (such as buildings dedicated to religion, education, art, science or charitable purposes, historic monuments, hospitals, or places where the sick and wounded are collected), if such property is not being used for military purposes or is not otherwise a military objective. Such term includes objects properly identified by one of the distinctive emblems of the Geneva Conventions, but does not include civilian property that is a military objective.

“(4) CONSTRUCTION.—The intent specified for an offense under paragraph (1), (2), (3), (4), or (12) of subsection (b) precludes the applicability of such offense with regard to—

“(A) collateral damage; or

“(B) death, damage, or injury incident to a lawful attack.

“(b) OFFENSES.—The following offenses shall be triable by military commission under this chapter at any time without limitation:

“(1) MURDER OF PROTECTED PERSONS.—Any person subject to this chapter who intentionally kills one or more protected persons shall be punished by death or such other punishment as a military commission under this chapter may direct.

Mr. HUNTER. Mr. Speaker, I yield myself such time as I may consume, and I rise in support of S. 3930, the Military Commissions Act of 2006.

Mr. Speaker, as we debated this bill just a few hours ago, again, I say that I can't think of any better way to honor the fifth anniversary of September 11 than by establishing a system to prosecute the terrorists who on that day murdered thousands of civilians and who continue to seek to kill Americans both on and off the battlefield.

Mr. Speaker, I think that Justice Thomas described best the backdrop against which this legislation is being considered when he said, and I quote, "We are not engaged in a traditional battle with a nation state but with a worldwide hydra-headed enemy who lurks in the shadows conspiring to reproduce the atrocities of September 11, 2001, and who has boasted of sending suicide bombers into civilian gatherings, has proudly distributed videotapes of beheadings of civilian workers, and has tortured and dismembered captured American soldiers."

So, Mr. Speaker, we have debated this precisely, this bill, which is precisely the same coming back over from the other body as the bill that we voted on in the full House, where I think we had a robust debate on the issues. But I would just say that this gives us a new body of law that provides a construct under which we can carry out our charge.

And this is an interesting charge to this body and to both Houses of Congress. We were not only requested to do this by the President, but the Supreme Court in the Hamdan case essentially invited, in fact said that we were an essential part of the construct of any tribunal legislation that would set up the new tribunal process; that it had to be a construct that was participated in by Congress. So you could say, I think, Mr. Speaker, that we have been charged not just by the President but by the Supreme Court with doing our job and putting together this process.

We have pursued the terrorists across the globe. We have captured some, and we have killed many. We have pursued them literally to the ends of the earth. We have caught them at 10,000 foot elevation mountain ranges in caves where they thought they were safe, in so-called safe houses that turned out not to be safe houses. We captured some who, according to our intelligence personnel, helped to design the attack against New York and Washington, DC, and Pennsylvania. And I can think of no more important way to memorialize 9/11 than to produce a justice system that allows us to bring to justice, to bring to the courthouse and show justice to the widows and orphans of 9/11, to the American people, to our fellow citizens and to the world. This system is going to allow us to do this.

This system is a product of extensive negotiations, hundreds of provisions that have been agreed upon and worked and looked at by counsel for both this body, the other body, the U.S. Senate and, of course, the administration. I think it is sound. I think it is solid. I think it will allow for the expeditious prosecution of people who attacked our country.

It gives them a lot of rights. It gives a lot of rights to the terrorists that they would never have in their native land. It also gives them rights that American soldiers don't have. There is no American soldier that has the right to an attorney, to a combatant status review and, if he doesn't like that review, to an appellate court, like the D.C. Circuit Court, to prove that he really was not a combatant in that particular conflict.

So as the American people watch these trials unfold, Mr. Speaker, and they watch the defendants, including some of the people who hurt our country and helped to cause the death of thousands of Americans, they are going to watch them with their taxpayer-paid-for attorneys exercising their rights against self-incrimination, their right to a proof standard beyond a reasonable doubt; they are going to watch a jury system or a commission system that uses a secret ballot so that superior officers can't influence junior officers; they are going to watch all these safeguards that we put in place for justice, and I think the American people are going to say, although there will be some who will say they still didn't have enough rights, but I think the American people will come down on the side of what we have done here in the House.

Mr. Speaker, I rise in support of S. 3930, the "Military Commissions Act of 2006." I can think of no better way to honor the fifth anniversary of September 11th than by establishing a system to prosecute the terrorists who, on that day, murdered thousands of innocent civilians, and who continue to seek to kill Americans both on and off the battlefield.

This is vital legislation important to the national security of the United States.

Our foremost consideration in writing this legislation is to protect American troops and American citizens from harm.

The war against terror has produced a new type of battlefield and a new type of enemy. How is it different? We are fighting a ruthless enemy who does not wear a uniform. A savage enemy who kills civilians, women and children and then boasts about it. A barbaric enemy who beheads innocent civilians by sawing their heads off. An uncivilized enemy who does not acknowledge or respect the laws of war, the Geneva Conventions or any of the guarantees which are recognized by civilized nations.

Justice Thomas put it best in Hamdan. He said we are "not engaged in a traditional battle with a nation-state, but with a world-wide, hydra-headed enemy, who lurks in the shadows conspiring to reproduce the atrocities of September 11, 2001, and who has boasted of sending suicide bombers into civilian gatherings, has proudly distributed videotapes of beheadings of civilian workers, and has tortured and dismembered captured American soldiers."

How is the battlefield new? First, it will be a long war. We don't know if this enemy will be defeated this decade, the next decade, or even longer than that. Second, in this new war, where intelligence is more vital than ever, we want to interrogate the enemy. Not to degrade them, but to save the lives of American troops, American civilians, and our allies. But it is not practical on the battlefield to read the enemy their Miranda warnings. On the battlefield we can't have battalions of lawyers. Finally, this is an ongoing conflict and sharing sensitive intelligence sources, methods and other classified information with terrorist detainees could be highly dangerous to national security. I am not prepared to take that risk.

So what we have done is to develop a military commission process that will allow for the effective prosecution of enemy combatants during this ongoing conflict. Without this action, United States has no effective means to try and punish the perpetrators of September 11th, the attack on the USS *Cole* and the embassy bombings.

We provide basic fairness in our prosecutions, but we also preserve the ability of our warfighters to operate effectively on the battlefield.

I think a fair process has two guiding principles:

First, the government must be able to present its case fully and without compromising its intelligence sources or compromising military necessity; and

Second, the prosecutorial process must be done fairly, swiftly and conclusively.

Who are we dealing with in military commissions? We are dealing with the enemy in war, not defendants in our domestic criminal justice system. Some of them have returned to the battlefield after we let them out of Guantanamo. Our primary purpose is to keep them off the battlefield. In doing so, we treat them humanely and if we choose to try them as war criminals we will give them due process rights that the world will respect. But we have to remember they are the enemy in an ongoing war.

In time of war it is not practical to apply to rules of evidence that we do in civilian trials or court-martials for our troops. Commanders and witnesses can't be called from the frontline to testify in a military commission. We need to accommodate rules of evidence, chain of custody and authentication to fit the exigencies of the battlefield. If hearsay is reliable we should use it. If sworn affidavits are reliable, we should use them. I note that the rules of evidence are relaxed in international war crime tribunals for Rwanda and Yugoslavia.

The Supreme Court has suggested that Congress act here to fill the legal void left by the Hamdan decision, but in doing so let's not forget our purpose is to defend the nation against the enemy. We won't lower our standards, we will always treat detainees humanely, but we can't be naive either.

This war started in 1996 with the al Qaeda declaration of jihad against the United States. The Geneva Conventions were written in 1949 and the UCMJ was adopted in 1951. These documents were not written to address the war we are now fighting. In that sense, what we are required to do after Hamdan is broader than war crimes trials, it is the start of a new legal analysis for the long war. It is time for us to think about war crime trials and a process that provides due process and protects national security in the new war.

So what do we do with these new military commissions? We uphold basic human rights and state what our compliance with this standard means for the treatment of detainees. We do this in a way that is fair and the world will acknowledge as fair.

First, we provide accused war criminals at least 26 rights if they are tried by a commission for a war crime. While I will not read them all, here are some of the essential rights we provide.

Right to Counsel, provided by government at trial and throughout appellate proceedings;

Impartial judge;

Presumption of innocence;

Standard of proof beyond a reasonable doubt;

The right to be informed of the charges against him as soon as practicable;

The right to service of charges sufficiently in advance of trial to prepare a defense;

Mr. Speaker, since I am inserting my entire text in the RECORD, I will not read them all at this point.

The right to reasonable continuances;

Right to peremptory challenge against members of the commission and challenges for cause against members of the commission and the military judge;

Witness must testify under oath; judges, counsel and members of military commission must take oath;

Right to enter a plea of not guilty;

The right to obtain witnesses and other evidence;

The right to exculpatory evidence as soon a practicable;

The right to be present at court with the exception of certain classified evidence involving national security, preservation of safety or preventing disruption of proceedings;

The right to a public trial except for national security issues or physical safety issues;

The right to have any findings or sentences announced as soon as detennined;

Right against compulsory self-incrimination;

Right against double jeopardy;

The defense of lack of mental responsibility;

Voting by members of the military commission by secret written ballot;

Prohibitions against unlawful command influence toward members of the commission, counselor military judges;

⅔ vote of members required for conviction; ¾ vote required for sentences of life or over ten years; unanimous verdict required for death penalty;

Verbatim authenticated record of trial;

Cruel or unusual punishments prohibited;

Treatment and discipline during confinement the same as afford to prisoners in U.S. domestic courts;

Right to review of full factual record by convening authority; and

Right to at least two appeals including to a federal Article III appellate court.

We provide all of these rights, and we give them an independent judge, and the right to at least two appeals, including the U.S. Court of Appeals for the District of Columbia and access to the Supreme Court. No one can say this is not a fair system.

I know some of my colleagues are concerned about the issue of reciprocity. I ask them to look at the list of rights I just summarized. And also keep in mind, that these are rights for terrorists. If we are talking about true reciprocity, then we are only concerned about how the enemy will treat American terrorists. These are not our rules for POWs. We treat the legitimate enemy differently and expect them to treat our troops the same.

How do we try the enemy for war crimes? In this Act, Congress authorizes the establishment of military commissions for alien unlawful enemy combatants, which is the legal term we use to define international terrorists and those who aid and support them, in a new separate chapter of Title 10 of the U.S.C. Code, Chapter 47A. While this new chapter is based upon the Uniform Code of Military Justice, it creates an entirely new structure for these trials.

In this bill we provide standards for the admission of evidence, including hearsay evidence and other statements, that are adapted to military exigencies and provide the military judge the necessary discretion to determine if the evidence is reliable and probative.

I want to talk a little bit about how we handle classified evidence. We had three hearings on this bill in addition to briefings and meetings with experts. I asked every witness the same question. If we have an informant, either a CIA agent or an undercover witness of some sort, are we going to tell Kalid Sheik Mohammad who the informant is? This legislation does not allow KSM to learn the identity of the informant. After several twists and turns in the road, after meeting with the Senate and the White House in marathon sessions over the weekend, we have crafted a solution that does not allow the KSM to learn the identify of the informant, yet provides a fair trial. How do we do this? We address this in Section 949d(f) of Section 3. Classified evidence is protected and is privileged from disclosure to the jury and the accused if disclosure would be detrimental to national security. The accused is permitted to be present at all phases of the trial and no evidence is presented to the jury that is not also provided to the accused.

Section 949d(f) makes a clear statement that sources, methods, or activities will be protected and privileged and not shown to the accused, however, the substantive findings of the sources, methods, or activities will be admissible in an unclassified form. This allows the prosecution to present its best case while protecting classified information. In order to do this, the military judge questions the informant outside the presence of the jury and the defendant. In order to give the jury and the defendant a redacted version or the infomant's statement, the just must find: (1) that the sources, methods, or activities by which the U.S. acquired the evidence are classified and (2) the evidence is reliable. Once the judge stamps the informant as reliable, the informant's redacted statement is given to both the jury and the accused. It removes the confrontation issue, yet allows the accused to see the substance of the evidence against him. I think these rules protect classified evidence and yet preserve a fair trial.

Unauthorized disclosures, not only of classified information, but also of our interrogation techniques, are extremely damaging to our intelligence efforts. Our personnel have encountered enemy combatants trained to resist disclosed interrogation techniques thanks to leakers in our media. I'm pleased that with the current Military Commission legislation moving forward, we have reaffirmed our strict adherence to the U.S. anti-torture laws, while at the same time allowing our CIA to move forward with an effective interrogation program whose techniques will not be published in the Federal Register, or God forbid, in another newspaper disclosure. This legislation preserves the necessary flexibility for the President and the CIA to utilize all lawful and effective methods of interrogation. Let me be clear: the bill defines the specific conduct that is prohibited under Common Article 3, but it does not purport to identify interrogation practices to the enemy or to take any particular means of interrogation off the table. Rather, this legislation properly leaves the decision as to the methods of interrogation to the President and to the intelligence professionals at the CIA, so that they may carry forward this vital program that, as the President explained, serves to gather the critical intelligence necessary to protect the country from another catastrophic terrorist attack.

One other point I want to make for the record. As I mentioned earlier, we have modified the rules of evidence to adapt to the battlefield. One of the principles used by the judiciary in criminal prosecutions of our citizens is called the "fruit of the poisonous tree doctrine." The rule provides that evidence derived from information acquired by police officials or the government through unlawful means is not admissible in a criminal prosecution. I want to make it clear that it is our intent with the legislation not to have this doctrine apply to evidence in military commissions. While evidence obtained improperly will not be used directly against an accused, we will not limit the use of any evidence derived from such evidence. The deterrent effect of the exclusionary rule is not something that our soldiers consider when they are fighting a war. The theory of the exclusionary rule is that if the constable blunders, the accused will not suffer. However, we are not going to say that if the soldier blunders, we are not going to punish a savage terrorist. Some rights are reserved for our citizens. Some rights are reserved for civilized people.

Mr. Speaker, this is a complicated piece of legislation. In addition to establishing an entire legal process from start to finish, we address the application of common Article 3 of the Geneva conventions to our current laws.

Section 5 clarifies that the Geneva Conventions are not an enforceable source of rights in any habeas corpus or other civil action or proceeding by an individual in U.S. courts.

Section 6 of the bill amends 18 U.S.C. Section 2441, the War Crimes Act to criminalize grave breaches of common Article 3 of the Geneva Conventions. As amended, the War Crimes Act will fully satisfy our treaty obligations under common Article 3. This amendment is necessary because currently Section (c)(3) of the War Crimes Act defines a war crime as any conduct which constitutes a violation of Common Article 3. Common Article 3 prohibits some actions that are universally condemned, such as murder and torture but also prohibits "outrages upon personal dignity" and "humiliating and degrading treatment," phrases which are vague and do not provide adequate guidance to our personnel. Since violation of Common Article 3 is a felony under the War Crimes Act, it is necessary to amend it to provide clarity and certainty to the of justice. If you pick up two people in New York, one of them is a citizen, they go to the Federal court, and you accuse them of being unlawful enemy combatants, they go to the regular American system of justice. One is awaiting citizenship but is a permanent resident, he goes through this other. He has no rights and can be in jail forever. That is clearly unconstitutional. It is a denial of equal protection.

Mr. HUNTER. Mr. Speaker, I yield 1 minute to the gentleman from Indiana (Mr. BUYER).

Mr. BUYER. Mr. Speaker, when the gentleman says the President can make any determination he wanted with regard to status, I would just like the gentleman to know that the determination of one's status is done by a tribunal under article V of the Geneva Conventions.

Mr. NADLER. Mr. Speaker, will the gentleman yield?

Mr. BUYER. I yield to the gentleman from New York.

Mr. NADLER. It is supposed to be done by a tribunal under article V, but the President claims the power. We have never held such a tribunal.

Mr. BUYER. Wait a minute. Reclaiming my time, please do not come to the floor and make things up. As a JAG officer in the first Gulf War, I wrote the practice and procedures for article V tribunals. I participated in the tribunals to determine status, a person's status. The President of the United States does not participate in that process.

So, please, don't be silly and just make things up.

Mr. HUNTER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, let me just go to the Detainee Act. It says that review is done by the District of Columbia relating to any aspect of the detention of an alien, and we have expanded it from Guantanamo Bay to anywhere, who has been determined by the United States District Court of Appeals for the District of Columbia Circuit in accordance with the procedures set forth in section 1405. So there is a process whereby the review is made with respect to the status of that alien.

Let me go to a second point. The gentleman spoke about hearsay evidence being allowed. That is true. Hearsay evidence is allowed, with certain restrictions. The judge has to find that it is probative, that it is relevant and that it is reliable.

The war crimes tribunals in Yugoslavia and Rwanda allow hearsay evidence. As I recall, the bill that was offered by Mr. SKELTON, that was voted on in the HASC, in the Armed Services Committee, also allowed for the use of hearsay evidence.

So hearsay evidence, I would say to my friends, is not excluded and has not historically been excluded in war crimes trials in Rwanda, in Yugoslavia.

Mr. SKELTON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, first I would make reference to my friend from Indiana (Mr. BUYER), and thank him for his comments. I am sorry that we don't agree on the basis of this. But thank you for your comments a few moments ago.

Mr. Speaker, I yield 3 minutes to the gentleman from Ohio (Mr. KUCINICH).

Mr. KUCINICH. Mr. Speaker, I thank the gentleman from Missouri for his defense of basic constitutional principles. I would say that the basic premise of military commissions, that the U.S. military should try unlawful enemy combatants using draconian rules, that basic premise is false.

The jury of commissioned military officers are not peers of these detainees. The detainees are accused of crimes against humanity and should be tried like all other such persons. The U.S. should hand over these detainees to the International Criminal Court. The U.S. should offer evidence that would be legal under our Constitution and the Geneva Conventions. This model of justice would set a precedent for other nations where the rule of law remains unfair, unjust, and inhumane.

The wrong approach is to create a court system that has more in common with the nations that torture, jail and hold indefinitely anyone without legitimate evidence.

The second point: H.R. 6166 and S. 3930 cast a wide net in defining unlawful enemy combatants that would include any American supporter of a national liberation movement which is seeking to overthrow a U.S. Government-supported despot.

For instance, with such a loose definition, the thousands of Americans, many of whom are church clergy, who provided support to the armed and unarmed opposition to the disposed dictatorships of El Salvador and Nicaragua, could have been designated as unlawful enemy combatants.

This hypothetical could occur since, one, it would only take a determination by the President or Secretary of Defense that the opposition to a U.S.-favored dictator was engaged in hostilities against the U.S., and that, two, the act of solidarity by the American clergymen supported the opposition group.

This is very dangerous. It is widely known that the U.S. conducted a dirty war throughout Central and South America to uphold repressive regimes there.

The third point I would like to make is that H.R. 6166 and S. 3930 could make similar solidarity actions in the future a crime. Those crimes should not be triable by military commissions. They would be new crimes and expose Americans to prosecution simply for supporting unfortunate people in other countries who are struggling for their freedom.

The other point is that H.R. 6166 and S. 3930 create a large loophole to keep administration officials out of jail for violations of the War Crimes Act of 1996. Section 4 amends the War Crimes Act to immunize from prosecution civilians who subject people to horrific abuse that may fall short of the definition of torture.

It is clear that senior administrative officials signed off on aggressive and illegal techniques and are potentially liable under the War Crimes Act of 1996. Instead, Congress is going to gut the War Crimes Act to protect those who permitted torture of detainees.

If those who think the so-called war on terror is about ideas such as good versus evil and democracy versus thuggery, then H.R. 6166 sends the wrong message about the true values of Americans. Let's stand up for the principles that this country was founded upon. Let's stand up for the Constitution, for the land of the free, for the home of the brave.

Mr. HUNTER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, let me just make a comment about the fact that we enumerate the crimes that might be committed, what we call the grave offenses under article III.

I think that it accrues to the benefit of our soldiers, sailors, airmen and marines and our intelligence agents that they know what the crimes are when they have people in custody, and the fact that those grave crimes, and they are enumerated, are defined, gives clarity to our folks so they know what the offenses are. I think that serves the purpose. It does not disserve the purpose.

But the idea that we have also reserved to the President on nongrave offenses, and again, one of the examples that was given by expert testimony was if you use the term "degrading," you could charge that a female colonel JAG officer interrogating a Muslim male is in and of itself degrading, because it is a female interrogating a male, and in their culture that would be considered to be degrading.

I think it is important not to expose that female JAG officer to liability. And it is important, therefore, when you have what you might consider to be minor infractions to not label that person, that American, a war criminal, but to allow the President as Commander in Chief to put forth regulations.

So I think this is a good fit, and it gives the thing that is most important to personnel, and that is clarity.

Mr. BUYER. Mr. Speaker, will the gentleman yield?

Mr. HUNTER. I yield to the gentleman from Indiana.

Mr. BUYER. What I would like to share with everyone, having done interrogations, I have interrogated Iraqi high command when I was at the Western Enemy Prisoner of War Camp. I assure you that trying to use any type of method to torture or beat the person you are trying to interrogate, I assure you, you never want to do that as an interrogator, because whatever he is going to say is really not going to be helpful to you. So as an interrogator, it is the last thing. It wouldn't even enter your mind that you want to do this type of thing.

The only time, I won't say the only time, some of the most difficult situations are usually what we find in the field where time is of the essence, where someone has just been killed, you are in a battlefield situation, you have gotten a prisoner and you need to know who they are and where they just went. That is generally where bad things happen. It is not at a garrison, in prison or a detention center.

Mr. SKELTON. Mr. Speaker, I yield 2 minutes to the gentleman from Oregon (Mr. WU).

(Mr. WU asked and was given permission to revise and extend his remarks.)

Mr. WU. Mr. Speaker, this is a sad day in the long history of this Chamber and of this Congress because today we break faith with the basic tenets of Anglo-American law that have come down from the Magna Carta, through the attempts of Charles I to suspend the writ of habeas corpus, to the challenges that American Presidents have faced in every stressful conflict situation in this Nation's history.

□ 1230

Although we should care about the rights of aliens seized in other countries, we should care, what we are debating today are the rights of American citizens here in the United States.

If my wife, a sixth generation Oregonian, were seized up and detained under the law we are considering today, she would disappear into a black hole of detention with no access to article 3 courts. At best, she would get a military tribunal, and that is not what American citizens deserve. The Koramatsu case from World War II is still the law of the land. It has not been overturned. And what it stands for is the proposition that civilians can be held by the military in this country. The Koramatsu case has been called a gun pointed at the heart of our civil liberties; and today this Congress loads that weapon.

This law is unwise as it is unconstitutional, and we should not be enacting this in haste. The great writ is one of our great protections. It applies to all Americans, and Americans should not be tried by a military tribunal.

Mr. SKELTON. Mr. Speaker, I recognize the ranking member of the Judiciary Committee (Mr. CONYERS) for 1 minute.

Mr. CONYERS. I thank the gentleman for yielding. He has done great legal work from the Armed Services Committee.

I just keep going through my mind, and this is getting to be a night and day job, because I have a Member I respect so much in judiciary, Mr. LUNGREN, who keeps trying to tell us that there are two writs of habeas corpus. A wonderful idea, if it were only true.

The statutory writ of habeas corpus, I say to my colleague from California, is to implement the great writ in the Constitution. So to be telling us repeatedly, repeatedly, and I have got the cases, I have been waiting for this great moment in American judiciary history, that there are two writs and that you have got to know which one you are talking about is absolutely incorrect.

Mr. SKELTON. Mr. Speaker, I yield 4 minutes to the gentlewoman from Texas, SHEILA JACKSON-LEE.

Ms. JACKSON-LEE of Texas. Let me thank the distinguished ranking member of the Armed Services for his very insightful, instructive messages on the dilemma we face in Iraq and Afghanistan. Let me also acknowledge that there are individuals who have had firsthand experience in the military courts.

Having gone to a law school that had a very outstanding JAG school, I understand the importance of military law and was one time a member of the U.S. Military Court of Appeals.

But I think it is important that we make this argument understandable, because in a few hours the President will give to my friends on the other side of the aisle an opportunity of bragging rights by having signed a bill that has been rushed through this process and has totally ignored the Supreme Court's decision.

Why are we standing here on this side of the aisle seemingly making arguments that don't promote security and safety in the United States? Well, that interpretation is totally wrong, because not one of us wants to take away the tools that would ensure America's security. But what we are concerned about are the faces here who represent those who have lost their lives on the front lines of Iraq and Afghanistan, and they continue over and over again. We have concerns about the life they sacrifice and the soldiers that they left behind. We know that soldiers don't leave comrades on the battlefield, injured or lost in the line of battle.

Today, this military tribunal commission will leave our soldiers on the battlefield, for what it does is it creates the atmosphere, no matter whether we are in a guerilla war or we are in the confrontational wars that we know of World War I and II. It is to ensure that the treatment of our soldiers, if caught by the enemy, will reflect the lack of treatment that we have given here.

Mr. SKELTON has made it very clear, we could fix this, because he would have provided an expedited Constitution review of the entire matter to give the opportunity for entry into the courts under habeas. It would also require that these military commissions, because they are eliminating rights, we are not saying releasing people, we are saying eliminating rights, that then get translated to the miserable treatment of those who were incarcerated or taken off the battlefield that are our soldiers.

Secondly, it refuses to give reauthorization language to the military commissions. We don't know where we will be in 3 years. We don't know how negatively this will impact our soldiers on the battlefield, which next conflict that, God forbid, we may have to be engaged in.

Also, the language that my friends have go beyond the scope of the Supreme Court's decision in Hamdan to decide whether or not detainees have habeas rights. The court already decided they do. Or whether or not the habeas provisions in the Detainee Treatment Act are constitutionally legal. The habeas provisions in the legislation are contrary to congressional intent in the Detainee Treatment Act. In that act, Congress did not intend to strip the courts of jurisdiction over the pending habeas.

In addition, although my friends say they fixed it, they also deny the rights which I had an amendment to to utilize the Geneva Conventions language to say that you were tortured or not tortured, even if you would put that defense in a classified presentation.

So in concluding, let me say we owe them a debt of gratitude. Let's vote down this tribunal to save future lives.

I rise in strong opposition to S. 3930, the Military Commissions Act. I oppose this bill because I stand strong for our troops. I stand strong for the Constitution. I stand strong for the values that have made our country, the United States of America, the greatest country in the history of the world. I oppose this legislation because it is not becoming a nation that is strong in its values, confident of its future, and proud of its ancient heritage.

Mr. Speaker, let us be crystal clear: All Americans, and Democrats especially, want those responsible for 9/11 and other terrorist acts to be tried fairly and punished accordingly, and we want those convictions to be upheld by our courts.

Democrats want the President to have the best possible intelligence to prevent future terrorist attacks on the United States and its allies.

Democrats agreed with the President when he said "whether the terrorists are brought to justice or justice brought to the terrorists, justice will be done." But Democrats understand that justice requires the Congress to establish a system for trying suspected terrorists that not only is fundamentally fair but also consistent with the Geneva Convention.

We should abide by the Geneva Convention not out of some slavish devotion to international law or desire to coddle terrorists, but because adherence to the Geneva Convention protects American troops and affirms American values.

S. 3930, the compromise before us, includes some improvements that I strongly support. For example, evidence obtained through torture can no longer be used against the accused. Similarly, the compromise bill provides that hearsay evidence can be challenged as unreliable.

Perhaps the most important improvement over the bill passed by the House is that accused terrorists will have the right to rebut all evidence offered by the prosecution. As is the case in the existing military justice system, classified evidence can be summarized, redacted, declassified, or otherwise made available to the accused without compromising sources or methods. This change to the bill goes a long way toward minimizing the chance that an accused may be convicted with secret evidence, a shameful practice favored by dictators and totalitarians but beneath the dignity of a great nation like the United States. As Senator JOHN MCCAIN said:

> I think it's important that we stand by 200 years of legal precedents concerning classified information because the defendant should have a right to know what evidence is being used.

However, I am concerned that there is reason to believe that even with this compromise legislation, this system of military commissions may lead to endless litigation and get struck down by the courts. Then we would find ourselves back here again next year, or five years from now, trying to develop a system that can finally bring the likes of Khalid Sheik Mohammed to justice. Why would we want to give terrorist detainees a "get out of jail free" card when we can avoid that by establishing military commissions that work. As currently written, the compromise bill has provisions that could lead to the reversal of a conviction.

Specifically, the bill contains a section that strips the federal courts of jurisdiction over habeas corpus petitions filed prior to the passage of the Detainee Treatment Act last December on behalf of detainees at Guantanamo Bay. Mr. Speaker, nine former federal judges were so alarmed by this prospect that they were compelled go public with their concerns:

> Congress would thus be skating on this constitutional ice in depriving the federal courts of their power to hear the cases of Guantanamo detainees. . . . If one goal of the provision is to bring these cases to a speedy conclusion, we can assure from our considerable experience that eliminating habeas would be unconstitutional.

Mr. Speaker, common Article 3 of the Geneva Convention requires that a military commission be a regularly constituted court affording all the necessary "judicial guarantees which are recognized as indispensable by civilized peoples. Notwithstanding the provision in the House bill that the military commissions established therein satisfy this standard, the fact is that other nations will agree. Simply saying so does not make it so. Moreover, they may well be right. Consider this, Mr. Speaker:

> The compromise allows statements to be entered into evidence that were obtained through cruel, inhuman and degrading treatment and lesser forms of coercion if the statement was obtained before passage of the Detainee Treatment Act last December.
>
> To provide limited immunity to government agents involved in the CIA detention and interrogation program, the bill amends the War Crimes Act of 1996 to encompass only "grave breaches" of the Geneva Conventions. U.S. agents could not be tried under the War Crimes Act of 1996 to encompass only "grave breaches" of the Geneva Convention. U.S. agents could not be tried under the War Crimes Act for past actions that degraded and humiliated detainees. The bill also limits any use of international law such as the Geneva Convention in interpreting the War Crimes Act.

Mr. Speaker, what is sometimes lost sight of in all the tumult and commotion is that the reason we have observed the Geneva Conventions " since their adoption in 1949 is to protect members of our military. But as the Judge Advocate Generals pointed out, the compromise bill could place United States servicemembers at risk by establishing an entirely new international standard that American troops could be subjected to if captured overseas. As Rear Admiral Bruce McDonald testified:

> I go back to the reciprocity issue that we raised earlier, that I would be very concerned about other nations looking in on the United States and making a determination that, if it's good enough for the United States, it's good enough for us, and perhaps doing a lot of damage and harm internationally if one of our servicemen or -women were taken and held as a detainee.

What's more, Mr. Speaker, the Geneva Conventions also protect those not in uniform—special forces personnel, diplomatic personnel, CIA agents, contractors, journalists, missionaries, relief workers and all other civilians. Changing our commitment to this treaty could endanger them, as well.

We can fix these deficiencies easily if we only we have the will. What we should do is recommit the bill with instructions to add two important elements: (1) expedited constitutional review of the legislation; and (2) a requirement that these military commissions be reauthorized after three years.

Under expedited review, the constitutionality of the military commission system could be tested and determined quickly and early—before there are trials and convictions. And it would help provide stability and sure-footing for novel legislation that sets up a military commissions system unlike anything in American history.

Such an approach provides no additional rights to alleged terrorists. All it does is give the Supreme Court of the United States the ability to decide whether the military commissions system under this act is legal or not. It simply guarantees rapid judicial review.

REQUIRING REAUTHORIZATION IN THREE YEARS

Second, any system of military commissions to deal with detainees should be required to be reauthorized in three years. There are several good for requiring Congress to reaffirm its judgment that such tribunals are necessary:

The Military Commissions Act of 2006 is a far-reaching measure that implements an entirely new kind of military justice system outside the Uniform Code of Military Justice. It has many complex provisions.

This legislation has been rushed to the floor. It has numerous provisions that are still poorly understood by many in Congress. By requiring a reauthorization in three years, we give Congress the ability to carefully review how this statute is working in the real world.

Providing for a reauthorization in three years is the best way to ensure congressional oversight. This reauthorization requirement will allow Congress to evaluate the effectiveness of the military commission provisions and decide whether they need any modifications in the future.

The reauthorization requirement in the PATRIOT Act has worked well—compelling Congress to review how various provisions in the PATRIOT Act have worked. As a result of congressional review, important modifications in the PATRIOT Act were signed into law in January 2006 when 16 provisions were reauthorized.

Mr. Speaker, even Republicans on the House Judiciary Committee admitted that the only way Congress was able to get information out of the Justice Department about the operation of the PATRIOT Act was that Congress had to reauthorize it—similarly, the only way Congress will be able to perform proper oversight on military commissions is this similar requirement that the program must be reauthorized. The reauthorization requirement is a critical tool in Congress' ability to hold the Administration accountable and review the military commission program's performance.

Mr. Speaker, I cannot recall being asked to render final judgment on a matter of such scope, consequence, and moment in so short a period of time with such a sparsely developed legislative record. Now is not the time to rush blindly forward. Rather, now more than ever, it is important to take our time and make the right decision and establish the right policy. And the right policy is not to jettison the Geneva Convention.

We should not try to redefine the Geneva Convention. We should not do anything to alter our international obligations in an election-year rush. We cannot use international law only when it is convenient and expedient. Our commitment to the Geneva Conventions gives us the moral high ground. This is true in both a long war against radical terrorists and a war for the hearts and minds of people from every religion and every nation. If we compromise our values, the terrorists win. As Senator MCCAIN has said: "This is not about the terrorists are, this is about who we are."

The United States was one of the prime architects of the Geneva Conventions and other international laws. Our goal was to protect prisoners of war in all kinds of armed conflicts and insure that no one would be outside the law of war. Coming shortly after World War II, they knew the horrors of war but they still chose to limit the inhumanity of war by establishing minimum protections of due process and humane treatment, even for those accused of grave breaches of the Conventions.

Mr. Speaker, our nation has the finest military in the world. Our nation also deserves to have the finest military justice system in the world. I oppose S. 3930 because it departs significantly from the tried and true procedures established in the UCMJ.

The United States has long served as the model for the world of a civilized society that effectively blends security and human liberty. When we refuse to observe the very international standards for the treatment of detainees, which we were so instrumental in developing, we provide encouragement for others around the world to do the same. Our British allies have demonstrated that these traditional principles can be adhered to without distinguishing the ability to provide for the security of its citizens. We must do likewise.

Mr. Speaker, the treatment and trials of detainees by the United States is too important not to do it right. In the words of Jonathan Winthrop, often quoted by President Reagan, "for we must consider that we shall be as a City upon a hill. The eyes of all people are upon us." Let us act worthy of ourselves and our nation.

So Mr. Speaker, I stand in opposition to this legislation. But I do not stand alone. I stand with former Secretary of State Colin Powell. I stand with former Chairman of the Joint Chiefs John Vesey. I stand with the 911 Families Opposed to Administration Efforts to Undermine Geneva Conventions. I stand with the retired federal judges and admirals and Judge Advocate Generals.

The bill before us is not the right way to do justice by the American people. I therefore cannot support it and I urge my colleagues to reject it. We have time to come up with a better product and we should. The American people deserve no less. The eyes of the world are upon us. Let us act worthy of ourselves.

Mr. SKELTON. I yield 1½ minutes to the gentleman from New York (Mr. NADLER).

Mr. NADLER. Mr. Speaker, this bill says the term "unlawful enemy combatant," means, one, a person who is engaged in hostilities or who is purposefully and materially supportive of hostilities against the United States; or, two, a person who has been determined to be an unlawful enemy combat status, review tribunal, or another competent tribunal established under the authority of the President.

In other words, you could become an unlawful enemy combatant because you are adjudged by a tribunal; or, one, because the President says so without a tribunal. Otherwise, this language has no meaning. That's page 3 of the bill.

And if you look at page 93 of the bill, you find that no court shall have jurisdiction to hear an application for writ of habeas corpus or for an application relating to any aspect of the detention transfer, treatment, trial, or conditions of confinement of an alien who is an unlawful enemy combatant.

In other words, anyone other than the citizen can be accused by the President or by any bureaucrat of being an unlawful enemy combatant, thrown into jail, and get no benefits.

We have heard repeatedly that we are giving rights to terrorism. No, we are not. We are not trying to give rights to terrorists. We are saying that before someone is accused of rape or murder, you don't string them up; you first give them a trial and then string them up.

And what they are saying, what this bill says is the President or his designee can designate someone as an unlawful enemy combatant, and, with no trial, no hearing, no status review, no nothing, throw them in jail forever. That is un-American. It is worse than what we rebelled against the King of England for in 1776, and we should be ashamed of ourselves.

Mr. HUNTER. I yield myself such time as I may consume, Mr. Speaker. And let me make five points here.

First, there is nothing in this language that directs people to pick up or not pick up people. This is the language. This bill designs and constructs military commissions. On page 8 of the bill it gives the jurisdiction of the commission, and it says: "A military commission under this chapter shall have jurisdiction to try any offense made punishable by this chapter or the law of war when committed by an alien unlawful enemy combatant before, on, or after September 11, 2001." That would allow us also to try those folks from the Cole and the Embassy bombings.

With respect to habeas, there is no soldier in the world, no POW in the world from our research who has a habeas right.

And let me go to Mr. WU's point. Mr. WU said, when we pointed out the Detainee Treatment Act provided for review, he said that he thought it expired because it was attached to an appropriations bill and expired annually. That is not so. It is a permanent code. So the Detainee Treatment Act is in place. And if the gentleman can show me where it is expired, we will be happy to entertain that.

Secondly, the gentleman also said that it was procedural only. I am referring to the Detainee Treatment Act that says that the court has the jurisdiction to review relating to any aspect, and I am quoting, any aspect of the detention of the person in question, relating to any aspect. And, of course, that would go as to whether he was a combatant. So it was not as you stated, it is not simply a procedural review.

So I just want to go over those points.

I reserve the balance of my time.

Mr. SKELTON. I yield 2 minutes to the gentlewoman from California (Mrs. DAVIS), who is a member of the Armed Services Committee.

Mrs. DAVIS of California. Mr. Speaker, I want to give this administration, any administration, the ability to prosecute, convict, and punish individuals who have committed terrorist acts and who are planning acts against the United States. But we must do this under the guidelines outlined by the Supreme Court in Hamdan v. Rumsfeld.

The Court entrusted this Congress with the duty to reform military tribunals in a matter consistent with the Constitution and international treaty obligations.

While the Senate attempted to respect our obligations under Geneva, concern remains. We have heard that on many occasions that this bill will grant the Executive the power to define certain types of interrogation methods that may be inconsistent with common article 3 of the Geneva Conventions.

Now, Mr. Speaker, in response to Hamdan, the House Armed Services Committee heard from current and former judge advocate generals. Mr. Speaker, I listened to them. Their testimony was compelling. Many spoke out against modifying the Geneva Conventions in any way, in anyway, because of the risk that this provision could put our troops in harm's way and could be found to be inconsistent with Hamdan. Congress must ensure that this doesn't happen.

In this bill, I believe, Mr. Speaker, that we miss an opportunity to be absolutely clear on these points and to show the world that America can be tough on terrorism while staying true to the values we hold so dear.

Ms. JACKSON-LEE of Texas. If the gentlewoman would yield just for a moment. I thank you for your comments. I think it should be clear that the framework for soldiers may not be habeas in civilian language, but there is a procedure that soldiers would have to be able to petition their detention, and it is a military term. And what we are seeing in the military tribunals commission language is that doesn't exist.

□ 1245

Mr. SKELTON. Mr. Speaker, in closing, let me say that being tough on terrorists not only centers about a conviction, a judgment rendered on what they did, whether it be the death penalty, life imprisonment or a term of years but also centers upon the fact that there is certainty after a conviction; and the last thing I want to see coming out of this is for there to be a reversal on appeal which destroys certainty because of what we did in this law.

Mr. Speaker, I yield back the balance of my time.

Mr. HUNTER. Mr. Speaker, I yield the balance of my time to the distinguished chairman of our Veterans Committee and former JAG officer, Mr. BUYER, for our closing remarks.

Mr. BUYER. Mr. Speaker, to bring a chill into the debate, the issue of who can be detained is not addressed in this bill. This bill is about trying alien detainees who are unlawful enemy combatants. Nothing in this bill changes the Detainee Treatment Act of 2005.

The SPEAKER pro tempore (Mr. PRICE of Georgia). All time has expired.

The Chair recognizes the gentleman from Wisconsin.

Mr. SENSENBRENNER. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of S. 3930, the Military Commissions Act of 2006, which is identical to legislation this House passed in a bipartisan manner on Wednesday evening by a vote

253–168. The other body voted 65–34 to approve this bill last night.

Let me say that the only reason we are here today is because the other body has committed a flagrant act of legislative plagiarism, once again. The House passed its version of the bill first. They would not take up a bill with an "H.R." number but instead picked up the work product that this House did, put an "S." number on it, and thus required us to have an hour debate on this issue for a second time.

I regret that, and I think all of the arguments that were made on Wednesday when we fully and thoroughly debated this bill are just as valid today as they were 2 days ago. Because there is not one word changed in the legislation between the time it passed the House and the time the Senate reintroduced it with an "S." number and put us through an hour debate on the rule and an hour debate on the same bill, in my opinion unnecessarily.

Having said that, on the merits of the bill, the way we treat terrorist enemy combatants sends a strong signal to the rest of the world about our commitment to the rule of law. This legislation says we will not subject enemy combatants in our custody to the cruel and brutal treatment they regularly utilize against our soldiers and civilians.

At the same time, this bill makes it clear to the terrorists and their lawyers in America that America will not allow them to subvert our judicial process nor to disrupt the war on terror with unnecessary or frivolous lawsuits. The bill strikes the right balance. It establishes a mechanism that is full and fair but also is orderly and efficient.

Indeed, the bill provides some 26 new rights to terrorist detainees, far more rights than any other system employed in history to try suspected war criminals. Those who have suggested that this legislation will be found unconstitutional are misguided.

In this legislation, we accomplish precisely what a majority of the Supreme Court, and particularly Justice Breyer, invited us to do in the Hamdan case: construct a full set of rules for conducting military commissions that meet the fundamental test of fairness under our Constitution.

On habeas corpus, let me again restate Congress' understanding of the law, because it is against this backdrop that we pass this legislation today.

The Supreme Court has never held that the Constitution's protections, including habeas corpus, extend to noncitizens held outside the United States. To repeat, the Supreme Court has never held that the habeas corpus protections contained in the Constitution apply to noncitizens held outside the United States.

In fact, the Supreme Court rejected such an argument in the 1950 case of Johnson v. Eisentrager. That portion of Eisentrager is still good law. Moreover, in the 1990 Verdugo case, the court reiterated that aliens detained in the United States but with no substantial connection to our country cannot avail themselves of the Constitution's protections.

If the Supreme Court follows its own precedents and takes seriously its invitation to Congress to legislate in this area, the Court should have no problem concluding that this bill passes constitutional muster.

As we consider this legislation, it is important to remember, first and foremost, that this bill is about prosecuting the most dangerous terrorist that America has ever confronted, individuals like Khalid Sheikh Mohammed, the mastermind of the 9/11 attacks, or Ahbd Nashiri, who planned the attack on the USS *Cole*. None of their victims was treated with the same kind of respect for human life and the rule of law that is embodied in this legislation.

I urge my colleagues to support this legislation, and let me reiterate for my colleagues the 26 rights for terrorist detainees that are created by this legislation. They include:

The right to be informed of the charges against them as soon as practicable;

The right to service of charges sufficiently in advance of trial to prepare a defense;

The right to reasonable continuances;

The right to preemptory challenge against members of the commission and challenges for cause against members of the commission and the military judge;

Witness must testify under oath, and judges, counsels and members of the military commission must take an oath.

There is a right to enter a plea of not guilty.

There is a right to obtain witnesses in other evidence.

There is a right to exculpatory evidence as soon as possible.

There is a right to be present in court with the exception of certain classified evidence involving national security, preservation of safety or preventing disruption of proceedings;

The right to a public trial except for national security issues or physical safety issues;

The right to have any findings or sentences announced as soon as determined;

The right against compulsory self-incrimination;

The right against double jeopardy;

The defense of lack of mental responsibility;

Voting by members of the military commission by secret written ballot;

Prohibition against unlawful command influence toward members of the commission, counsel or military judges;

Two-thirds vote of members required for conviction and three-quarters vote required for sentence of life or over 10 years, and unanimous verdict required for the death penalty;

Verbatim authenticated record of trial;

Cruel or unusual punishments are prohibited;

Treatment and discipline during confinement the same as afforded to prisoners in U.S. domestic courts;

The right to review the full factual record by the convening authority; and

The right to at least two appeals, including to a Federal Article III appellate court.

I submit, Mr. Speaker, that none of the people who have been beheaded by terrorists had any of those rights.

Mr. Speaker, I reserve the balance of my time.

Mr. CONYERS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would like to begin by inserting the New York Times editorial of September 28 entitled "Rushing Off a Cliff."

[From the New York Times, Sept. 28, 2006]

RUSHING OFF A CLIFF

Here's what happens when this irresponsible Congress railroads a profoundly important bill to serve the mindless politics of a midterm election: The Bush administration uses Republicans' fear of losing their majority to push through ghastly ideas about antiterrorism that will make American troops less safe and do lasting damage to our 217-year-old nation of laws—while actually doing nothing to protect the nation from terrorists. Democrats betray their principles to avoid last-minute attack ads. Our democracy is the big loser.

Republicans say Congress must act right now to create procedures for charging and trying terrorists—because the men accused of plotting the 9/11 attacks are available for trial. That's pure propaganda. Those men could have been tried and convicted long ago, but President Bush chose not to. He held them in illegal detention, had them questioned in ways that will make real trials very hard, and invented a transparently illegal system of kangaroo courts to convict them.

It was only after the Supreme Court issued the inevitable ruling striking down Mr. Bush's shadow penal system that he adopted his tone of urgency. It serves a cynical goal: Republican strategists think they can win this fall, not by passing a good law but by forcing Democrats to vote against a bad one so they could be made to look soft on terrorism.

Last week, the White House and three Republican senators announced a terrible deal on this legislation that gave Mr. Bush most of what he wanted, including a blanket waiver for crimes Americans may have committed in the service of his antiterrorism policies. Then Vice President Dick Cheney and his willing lawmakers rewrote the rest of the measure so that it would give Mr. Bush the power to jail pretty much anyone he wants for as long as he wants without charging them, to unilaterally reinterpret the Geneva Conventions, to authorize what normal people consider torture, and to deny justice to hundreds of men captured in error.

These are some of the bill's biggest flaws:

> Enemy Combatants: A dangerously broad definition of "illegal enemy combatant" in the bill could subject legal residents of the United States, as well as foreign citizens living in their own countries, to summary arrest and indefinite detention with no hope of appeal. The president could give the power to apply this label to anyone he wanted.
>
> The Geneva Conventions: The bill would repudiate a half-century of international precedent by allowing Mr. Bush to decide on his own what abusive interrogation methods he considered permissible. And his decision could stay secret—there's no requirement that this list be published.
>
> Habeas Corpus: Detainees in U.S. military prisons would lose the basic right to challenge their imprisonment. These cases do not clog the courts, nor coddle terrorists. They simply give wrongly imprisoned people a chance to prove their innocence.
>
> Judicial Review: The courts would have no power to review any aspect of this new system, except verdicts by military tribunals. The bill would limit appeals and bar legal actions based on the Geneva Conventions, directly or indirectly. All Mr. Bush would have to do to lock anyone up forever is to declare him an illegal combatant and not have a trial.
>
> Coerced Evidence: Coerced evidence would be permissible if a judge considered it reliable—already a contradiction in terms—and relevant. Coercion is defined in a way that exempts anything done before the passage of the 2005 Detainee Treatment Act, and anything else Mr. Bush chooses.
>
> Secret Evidence: American standards of justice prohibit evidence and testimony that is kept secret from the defendant, whether the accused is a corporate executive or a mass murderer. But the bill as redrafted by Mr. Cheney seems to weaken protections against such evidence.
>
> Offenses: The definition of torture is unacceptably narrow, a virtual reprise of the deeply cynical memos the administration produced after 9/11. Rape and sexual assault are defined in a retrograde way that covers only forced or coerced activity, and not other forms of nonconsensual sex. The bill would effectively eliminate the idea of rape as torture.
>
> There is not enough time to fix these bills, especially since the few Republicans who call themselves moderates have been whipped into line, and the Democratic leadership in the Senate seems to have misplaced its spine. If there was ever a moment for a filibuster, this was it.
>
> We don't blame the Democrats for being frightened. The Republicans have made it clear that they'll use any opportunity to brand anyone who votes against this bill as a terrorist enabler. But Americans of the future won't remember the pragmatic arguments for caving in to the administration.
>
> They'll know that in 2006, Congress passed a tyrannical law that will be ranked with the low points in American democracy, our generation's version of the Alien and Sedition Acts.

Mr. Speaker, the New York Times editorial summarizes the simple fact that what we are doing is giving the President the power to jail, and I am quoting from the editorial, pretty much anyone he wants for as long as he wants without charging them, to unilaterally reinterpret the Geneva Conventions, to authorize what normal people consider torture, and to deny justice to hundreds of men captured in error.

I want to repeat that, because I could have taken a lot of time to say the same thing.

The President in this measure would be given the power to jail pretty much anyone he wants for as long as he wants without charging them, to unilaterally reinterpret the Geneva Conventions, to authorize what normal people consider torture, and to deny justice to hundreds of men captured in error.

Is there anybody that would really want to implement a piece of legislation on this last day before recess that would do that?

Well, maybe there is innocent error. I have talked about the very esteemed Attorney General from California who has up until today been arguing that there are two writs of habeas corpus.

But then I come to the gentleman from Indiana who says that there is nothing in this bill that relates to who can be detained. He says absolutely nothing.

The first page of the bill starts off with "unlawful enemy combatant." The term "unlawful enemy combatant" means a person who has engaged in hostilities or who has purposefully or materially supported hostilities against the United States, and they go on to tell you that he can be subjected to a combatant status review tribunal or any other tribunal established under the authority of the President or the Secretary of Defense. That's the first page.

Then I get to my esteemed chairman of the committee that the United States has never held that people can be detained outside of the U.S. and have habeas rights. Well, as my colleague, the gentleman from New York (Mr. NADLER), points out, we are talking about being picked up and held indefinitely from Chicago. You don't have to be outside of the U.S. That's the problem. This is the most drastic piece of legislation that has ever come before the House of Representatives dealing with the writ of habeas corpus.

Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. NADLER).

Mr. NADLER. Mr. Speaker, the radical nature of this bill is that, as the gentleman from Michigan said, anybody picked up in Chicago can be subject to this bill. The President can determine unilaterally, look at paragraph 1 on page 3, that someone is an unlawful enemy combatant, or they can put the person before a tribunal, paragraph 2 on page 3, to decide if he is an enemy combatant. But you don't have to have a tribunal.

A little later it says that military tribunals are not subject to the speedy trial rule. So someone can be determined by the executive branch to be an unlawful enemy combatant, someone in America, never have a trial, never go before a combat status review tribunal, never go before a military commission, have none of the rights everybody is talking about, and be held in jail forever. That is wrong.

Secondly, the gentleman who was debating me before said soldiers have never had rights to habeas corpus. Certainly, if you pick up someone on the battlefield with a rifle in his arms, he shouldn't have habeas corpus. But if you pick up somebody in Chicago or New York or Los Angeles, who is to say that person is an unlawful enemy combatant? If you pick up somebody in Chicago or New York and say he is a murderer or a rapist and you want to hold him in jail until you can have a trial, you go before a judge and say, here is our evidence. There is some evidence that he is, in fact, a murderer or rapist to justify keeping him in jail.

□ 1300

Under this, though, you say he is an unlawful enemy combatant and that's that. You never hear from him again. That is against all our traditions. It makes the President a dictator because someone who claims the power to put someone in jail forever, with no hearing, no evidence, and no recourse, is a dictator. And on page 93 of the bill it says that no court shall have jurisdiction to entertain habeas corpus, which is simply a request to say show me why you are holding me in jail, or to entertain any action saying, Hey, you are torturing me, about the condition of confinement. So you can take this person because the President says so, put him in jail, subject him to any torture or whatever, and whatever you write in the law doesn't matter because no court can hear the case. There is no one to bring the complaint before it. That is wrong and it is insupportable.

Mr. SENSENBRENNER. Mr. Speaker, the gentleman from California, Mr. LUNGREN, was so moved by the last speech that I yield him 2 minutes.

Mr. DANIEL E. LUNGREN of California. Mr. Speaker, I thank the gentleman for the time.

Mr. Speaker, let me make clear, first of all, the distinguished ranking member of the full committee referred to the first page of the bill, but he needs to go on further, to section 948b subsection (a), which defines the purpose of the military tribunals, where it says: "This chapter establishes procedures governing the use of military commissions to try alien unlawful enemy combatants." So where initially he referred to the definition of unlawful enemy combatants, this bill refers to "alien" unlawful enemy combatants engaged in hostilities against the U.S. So you can't pick up just anybody in the United States.

Section 948a(3) defines an alien as a person who is not a citizen of the United States. Therefore, the language of the bill before us precludes the use of military commissions to try citizens of the U.S.

Second, the limitations on habeas corpus also only apply to alien enemy combatants. By its very terms, section 7 says that "no court, justice, or judge shall have jurisdiction to hear or consider an application for a writ of habeas corpus filed by or on behalf of an alien detained by the United States who has been determined by the United States to have been properly detained . . . " Therefore, under the expressed terms of the bill, an American citizen will have the unencumbered ability to challenge his or her detention as they have under the Constitution.

So let's not confuse it. Let's read all sections of the bill. We are dealing with, as the bill says, "alien unlawful enemy combatants," those people who are not in uniform, those people who are not following the rules of international law with respect to war, those people who hide behind women and children, those people who use the very fact that they are not identified as "legal combatants" to try to kill and maim Americans around the world.

That is what this tribunal is set up for, and to give them more rights than they would have virtually anywhere else and in any other system, as articulated by the chairman of the full committee. So let's not confuse the facts.

Mr. CONYERS. Mr. Speaker, I yield 1 minute to the distinguished gentlewoman from Texas (Ms. JACKSON-LEE), a superlative member of the committee.

Ms. JACKSON-LEE of Texas. Mr. Speaker, I thank the distinguished gentleman. He has waged a powerful argument.

My good friend from California is arguing, if we had taken the time to clarify this bill. Let me tell you what is really in the bill.

First of all, as I continue to acknowledge the existence of the lost lives of our soldiers, the bill does not clarify this whole definition. We have 11,000 non-U.S. citizens serving in the United States Army. We have individuals who are U.S. legal aliens, United States citizens. There is no clarification that they could not be defined as an unlawful enemy combatant. The definition of "alien" is unclear. In some places it is defined; in some places it is not.

In addition, the Geneva Conventions is not respected. We have taken this away from the McCain-Warner compromise, and we have destroyed it because what we have done is given the President, not this President, any President, the ability to adjudge what the Geneva Conventions, how to interpret it, how to utilize it.

This is a wrong way to ago. This should have more time. This is not a political opportunity. This is not a campaign speech. These are the lives of our soldiers.

Mr. Speaker, at this time I will insert into the RECORD a letter from admirals and, as well, the 9/11 families opposing the military tribunal commission.

SEPTEMBER 12, 2006.

Senator JOHN WARNER,
Chairman, U.S. Senate Committee on Armed Services, Russell Office Building, U.S. Senate, Washington, DC.
Senator CARL LEVIN,
Ranking Member, U.S. Senate Committee on Armed Services, Russell Office Building, U.S. Senate, Washington, DC.

We find it necessary yet again to communicate with you about issues arising out of our policies concerning detainees held at Guantanamo Bay. It would appear that each time the U.S. Supreme Court speaks, efforts are taken to reverse by legislation the decision of the Court. We refer, of course, to the Supreme Court's Rasul and Hamdan decisions and to the provision in the Administration's proposed Military Comissions Act of 2006 that would strip the federal courts of jurisdiction over even the pending habeas cases that have been brought by the detainees at Guantanamo to challenge the basis for their detention. We urge you to reject any such habeas-stripping provision.

As we have argued and agreed since 9/11, it is necessary for Congress to enact legislation to create military commissions that recognize both the basic notions of due process and the need for specialized rules and procedures to deal with the new paradigm we call the war on terror. This effort must cover those already charged with violating the laws of war and those newly transferred to Guantanamo Bay.

But the military commissions we are now fashioning will have no application to the vast majority of the detainees who have never been charged, and most likely never will be charged. These detainees will not go before any commissions, but will continue to be held as "enemy combatants." It is critical to these detainees, who have not been charged with any crime, that Congress not strip the courts of jurisdiction to hear their pending habeas cases. The habeas cases are the only avenue open for them to challenge the bases for their detention—potentially life imprisonment—as "enemy combatants."

We strongly agree with those who have argued that we must arrive at a position worthy of American values, i.e., that we will not allow military commissions to rely on secret evidence, hearsay, and evidence obtained by torture. But it would be utterly inconsistent, and unworthy of American values, to include language in the draft bill that would, at the same time, strip the courts of habeas jurisdiction and allow detainees to be held, potentially for life, based on CSRT determinations that relied on just such evidence. The effect would be to give greater protections to the likes of Khalid Sheikh Mohammed than to the vast majority of the Guantanamo detainees, who claim that they had nothing to do with al Qaeda or the Taliban.

We are on a course that should have been plotted and navigated years ago, and we might be close to consensus. We ask that, in the closing moments of your consideration of this vital bill, you restore the faith of those who long have been a voice for simple commitment to our longstanding basic principles, to our integrity as a nation, and to the rule of law. We urge you to oppose any further erosion of the proper authority of our courts and to reject any provision that would strip the courts of habeas jurisdiction.

As Alexander Hamilton and James Madison emphasized in the Federalist Papers, the writ of habeas corpus embodies principles fundamental to our nation. It is the essence of the rule of law, ensuring that neither king nor executive may deprive a person of liberty without some independent review to ensure that the detention has a reasonable basis in law and fact. That right must be preserved. Fair hearings do not jeopardize our security. They are what our country stands for.

Sincerely,

9/11 FAMILIES OPPOSE ADMINISTRATION EFFORTS TO UNDERMINE GENEVA CONVENTIONS

WASHINGTON, D.C.—Today 9/11 family members sent a letter to the Senate strongly opposing the Bush Administration's proposals to undermine the Geneva Conventions, decriminalize brutal interrogations and create military commissions lacking fundamental due process guarantees.

The letter challenges the Administration's claim that the Military Commissions Act of 2006 is needed to make America safer. "There are those who would like to portray the legislation as a choice between supporting the rights of terrorists and keeping the United States safe. We reject this argument. We believe that adopting policies against terrorism which honor our values and our international commitments makes us safer and is the smarter strategy."

The letter urges members of Congress to reject any legislation which is at all ambiguous on the criminality of brutal interrogation techniques and to oppose supporting military trials that lack due process and judicial accountability.

The letter was signed by the parents of a FDNY fireman killed in the World Trade Center collapse, the mother of a NYPD policeman, along with relatives of victims from all four of the attacks, including a passenger on Flight 93 that crashed in Pennsylvania.

The letter closes by urging members of Congress to "reject the Administration's ill-conceived proposals which will make us both less safe and less proud as a nation."

SEPTEMBER 14, 2006.

DEAR SENATOR: As members of families who lost loved ones in the 9/11 attacks, we are writing to express our deep concern over the provisions of the Administration's proposed Military Commissions Act of 2006.

There are those who would like to portray the legislation as a choice between supporting the rights of terrorists and keeping the United States safe. We reject this argument. We believe that adopting policies against terrorism which honor our values and our international commitments makes us safer and is the smarter strategy.

We do not believe that the United States should decriminalize cruel and inhuman interrogations. The Geneva Convention rules against brutal interrogations have long had the strong support of the U.S. because they protect our citizens. We should not be sending a message to the world that we now believe that torture and cruel treatment is sometimes acceptable. Moreover, the Administration's own representatives at the Pentagon have strongly affirmed in just the last few days that torture and abuse do not produce reliable information. No legislation should have your support if it is at all ambiguous on this issue.

Nor do we believe that it is in the interest of the United States to create a system of military courts that violate basic notions of due process and lack truly independent judicial oversight. Not only does this violate our most cherished values and send the wrong message to the world, it also runs the risk that the system will again be struck down resulting in even more delay.

We believe that we must have policies that reflect what is best in the United States rather than compromising our values out of fear. As John McCain has said, "This is not about who the terrorists are, this is about who we are." We urge you to reject the Administration's ill-conceived proposals which will make us both less safe and less proud as a nation.

Sincerely,

Marilynn Rosenthal, Nicholas H. Ruth, Adele Welty, Nissa Youngren, Terry Greene, John LeBlanc, Andrea LeBlanc, Ryan Amundson, Barry Amundson, Colleen Kelly, Terry Kay Rockefeller, John William Harris.

Mr. CONYERS. Mr. Speaker, I yield 2 minutes to the gentleman from Maryland (Mr. HOYER), our distinguished whip.

Mr. HOYER. Mr. Speaker, I thank the gentleman from Michigan for yielding.

I rise to talk about briefly coddling terrorists.

There is no one in this body, no one in this country who wants to coddle terrorists. But let me remind my friends that Saddam Hussein was taken out of a hole and captured. And we did not torture him, and we have accorded him legal rights to hear the evidence, to address the court, and be represented by counsel. Why did we do that? Because we wanted to coddle Saddam Hussein? Did this administration want to coddle Saddam Hussein? Absolutely not. But because our values and the values of the international community suggested that.

And the "Butcher of Belgrade," Milosevic, who murdered tens of thousands of people and ethnically cleansed 2 million people, we accorded him legal rights because we wanted to coddle him? No. Because that was our value system.

And, yes, even the butchers of Berlin, those who murdered millions of people in the Second World War, at Nuremburg were given their rights to see the evidence, to confront their accusers, and to have the proof adduced at trial. Why did we do that? Because we wanted to coddle the butchers of Berlin? Absolutely not. It was because those are our values, the values of the international community, and the values of our Founding Fathers.

Let us not rush to judgment in this instance. Let us recognize and honor our values. That does not mean that we coddle the murderer, the rapist, or the terrorist. It means that we want a civilized society in which to live in this country and, yes, around the world.

Mr. CONYERS. Mr. Speaker, I yield 15 seconds to my colleague from Oregon (Mr. WU).

Mr. WU. Mr. Speaker, we do a grave injustice today because this statute applies to American citizens as well as everybody else.

Fred Korematsu was a U.S. citizen. He was picked up on a U.S. street. And we issued an apology years later.

If we pass this bill today, some future Congress, long after we are out of office, long after we are dead, some future Congress will be issuing an apology.

Mr. CONYERS. Mr. Speaker, I yield myself the balance of my time.

Mr. Speaker, this has been an exceedingly interesting discussion here today. I only close by reminding the distinguished member of the Judiciary Committee from California that in the opening parts of this law, this bill, there is no word "alien" anywhere in it. It is referring to an unlawful enemy combatant. An unlawful enemy combatant could be an American.

And so I oppose this legislation, finally, because it endangers our troops because we are lowering the standards set forth in the Geneva Conventions by allowing the President to unilaterally interpret the conventions and that can be operative against our own troops. Don't endanger our own troops.

Mr. SENSENBRENNER. Mr. Speaker, I yield myself the balance of my time.

Mr. Speaker, there is one issue that really has not come up in this debate, and that is the immunity that is given in this bill to the people who are interrogating the enemy combatants.

We need to pass this bill so that interrogations can start up again because without the immunity, anybody who is hired by the United States Government to try to find out whom they are planning on blowing up next would be subject to a lawsuit that would be filed by some attorney that would claim that he was representing the public interest.

This is a protection bill for the interrogators. It is something that is needed, and that is another reason why it ought to pass.

Mr. MCGOVERN. Mr. Speaker, I will not take up any more time speaking about why I oppose this bill. I spoke at length during the House debate, and nothing has changed over the past 48 hours to make me believe that undermining our history, values and constitutional commitment to human rights, civil rights, the rule of law, due process and judicial review is the right thing to do.

Instead, I would like to submit for the RECORD the views of others in the face of this monumental mistake this Congress is making in submitting to the demands of an imperial White House.

I ask unanimous consent to submit into the RECORD the following materials:

1. Resolution Condemning Torture by the Conference of Major Superiors of Men;

2. A September 22, 2006 letter from human rights organizations to the U.S. Senate regarding the Military Commissions Act of 2006;

RESOLUTION CONDEMNING TORTURE

CMSM condemns torture in all its forms regardless of putative justification, and encourages support and help for victims of torture throughout the world, but especially in areas under the control of the United States Government.

Rationale: Jesus' death and resurrection revealed the infinite value of each human being in God's eyes. [Cf. Mt 5:44–48; 10:29–31] Torture is a denial of that value. The Catechism of the Catholic Church condemns torture as "contrary to respect for the person and for human dignity," and Gaudium et Spes of the Second Vatican Council [#27] characterizes as criminal "all violations of the integrity of the human person, such as mutilation, physical and mental torture, undue psychological pressures," including them in a list that also contains "all offenses against life itself, such as murder, genocide, abortion, euthanasia and willful suicide."

Resolution: Given the universal condemnation of torture in both International Law and religious documents, the Conference of Major Superiors of Men resolves:

To condemn unequivocally any use of torture by agents of any government for any reason;

To encourage its constituencies to use their resources of education, preaching and advocacy to eliminate use of torture as contrary to both natural law and human dignity, and in fundamental opposition to God's salvific love for humanity:

To join with others to work in advocacy for the abolition of torture, and to offer help and support to victims of torture.

The Justice and Peace office will be responsible for implementation.

Additional Facts/Related Circumstances: Background: "The torturer has become like the pirate and slave trader before him hostis humani generis, an enemy of all mankind." So proclaimed the US Court of Appeals for the Second Circuit in 1980 [Filartiga v. Pena-Irala, 630 F.2d 876 (2nd Cir.(N.Y.) Jun 30, 1980)]. In his 1958 Chicago address to the Radio and Television News Directors Association, Edward R. Murrow said, "Not every story has two sides."

The United Nations Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment [1984] defines torture as follows:

For the purposes of this Convention, the term "torture" means any act by which severe pain or suffering, whether physical or mental, is intentionally inflicted on a person for such purposes as obtaining from him or a third person information or a confession, punishing him for an act he or a third person has committed or is suspected of having committed, or intimidating or coercing him or a third person. or for any reason based on discrimination of any kind, when such pain or suffering is inflicted by or at the instigation of or with the consent or acquiescence of a public official or other person acting in an official capacity. It does not include pain or suffering arising only from, inherent in or incidental to lawful sanctions. [A listing of other international documents that condemn torture is available at www.apt.ch/un/Torture%20Definition.doc.]

Recent actions brought to light about the involvement of the U.S. military and other branches of the government in the application of torture to prisoners demand a faith-based response. The USCCB has spoken as follows on the issue:

The United States has a long history of leadership and strong support for human rights around the world. Ratifications of the Convention on Civil and Political Rights and the Convention Against Torture embody our nation's commitment to establishing standards of conduct and prohibiting torture and other acts of inhumane treatment of persons in U.S. custody. Tragically, our nation's record has been marred by reported instances of abusive treatment of enemy combatants held in military prisons in Iraq, Afghanistan and Guantanamo Bay, Cuba. [The complete document is available at www.usccb.org/sdwp/international/senateletterretorture100405.pdf.]

The CMSM Executive Committee issued a statement in May of 2004 that included the following:

The Executive Committee of the Conference of Major Superiors of Men is greatly disturbed by the revelations of torture and abuse by U.S. military personnel. We have consistently called for U.S. troops to abide by international standards and laws that govern the treatment of detainees and have questioned the lack of access that international monitoring organizations such as the Red Cross, the Red Crescent, Amnesty International have had at detention centers in Iraq, Afghanistan, and Guantanamo Bay. Reports by independent organizations and military personnel, combined with the photographs and the admission by Administration officials of the abuses indicate that the U.S. military personnel and others contracted by the U.S. to work in the detention centers must be monitored to protect the rights and dignity of detainees.

As people of faith and as leaders of the Catholic congregations of the nearly 23,000 brothers and priests in the United States we believe that we must address this issue. Each human being is created with God-given dignity and each life is precious. This dignity must always be upheld and protected but especially so when an individual is being detained and his or her rights are already limited. They deserved to be treated with dignity and protected from violence and humiliation. As Christians we are deeply troubled that much of the humiliation and abuse violates the beliefs and practices of Islam. As U.S. citizens we are ashamed that those who represent our nation are perpetrating these abuses. We believe that as a nation we stand for the protection of human rights and uphold the dignity of all peoples regardless of their ethnic or religious background and we hold our national and military leaders responsible for the conditions that made these abuses not only possible, but who refused to acknowledge them even after they knew of the abuses.

George Hunsinger of the National Religious Campaign against Torture adapted these words from Dr. Martin Luther King, Jr., delivered at Riverside Church in New York in 1967:

A time comes when silence is betrayal. [People] do not easily assume the task of opposing their government's policy, especially in time of war. We must speak with all the humility that is appropriate to our limited vision, but we must speak. For we are deeply in need of a new way beyond the darkness so close around us. We are called upon to speak for the weak, for the voiceless, for the victims of our nation, for those it calls "enemy," for no document from human hands can make these humans any less our brothers and sisters.

SEPTEMBER 22, 2006.

Hon. JOHN WARNER,
Hon. JOHN MCCAIN,
Hon. LINDSEY GRAHAM,
U.S. Senate,
Washington, DC.

DEAR SENATORS WARNER, MCCAIN AND GRAHAM: We write to express our grave concerns over the reported agreement reached with the White House on the text of the Military Commissions Act of 2006.

While the agreement rejects the Administration's proposal to define and narrow the scope of US obligations under Common Article Three of the Geneva Conventions, its language concerning the War Crimes Act contains potentially dangerous ambiguities. These ambiguities create serious risks for American servicemembers as well as detainees in US custody. We believe that a good faith interpretation of U.S. law, including the Detainee Treatment Act, and U.S. international obligations make it absolutely clear that practices such as waterboarding, cold cell, prolonged standing, sleep deprivation, threats and assaults on prisoners are illegal. These and similar abusive techniques manifestly cause serious mental and physical suffering and constitute grave breaches of Common Article 3. Nonetheless, for several years there have been persistent reports that such techniques have been used on detainees. Moreover, troubling legal justifications for them have been devised and provided to U.S. interrogators. Some of those spurious legal justifications, such as the Bybee Memorandum, have now been abandoned; but there are continuing reports that other legal justifications have been provided for conduct we consider to be indisputably illegal under both U.S. and international law.

Against this background of repeated legal contortions used to justify and permit torture and abuse—some abandoned, some apparently still in effect—it is absolutely essential that the Congress be clear that these kinds of abusive interrogation techniques are illegal and covered by the War Crimes Act. We urge you to leave no shred of doubt on these crucial issues by naming specific techniques which amount to per se violations of the War Crimes Act or, at a minimum, creating a legislative record that these techniques are prohibited.

We also oppose the provisions in the bill that strip individuals who are detained by the United States of the ability to challenge the factual and legal basis of their detention. Habeas corpus is necessary to avoid wrongful deprivations of liberty and to ensure that executive detentions are not grounded in torture or other abuse. Likewise, we are deeply concerned about the provisions that permit the use of evidence obtained through coercion.

This letter is not intended to offer a comprehensive catalogue of the provisions in the proposed compromise legislation which are of great concern. We appreciate the efforts you have made to insure that abusive interrogations cannot take place and to provide fair judicial procedures for detainees. However, we do not believe that the proposed compromise can be said to have satisfied those important goals and feel strongly that these issues must be resolved.

Sincerely,

RUSHING OFF A CLIFF

Here's what happens when this irresponsible Congress railroads a profoundly important bill to serve the mindless politics of a midterm election: The Bush administration uses Republicans' fear of losing their majority to push through ghastly ideas about antiterrorism that will make American troops less safe and do lasting damage to our 217-year-old nation of laws—while actually doing nothing to protect the nation from terrorists. Democrats betray their principles to avoid last-minute attack ads. Our democracy is the big loser.

Republicans say Congress must act right now to create procedures for charging and trying terrorists—because the men accused of plotting the 9/11 attacks are available for trial. That's pure propaganda. Those men could have been tried and convicted long ago, but President Bush chose not to. He held them in illegal detention, had them questioned in ways that will make real trials very hard, and invented a transparently illegal system of kangaroo courts to convict them.

It was only after the Supreme Court issued the inevitable ruling striking down Mr. Bush's shadow penal system that he adopted his tone of urgency. It serves a cynical goal: Republican strategists think they can win this fall, not by passing a good law but by forcing Democrats to vote against a bad one so they could be made to look soft on terrorism.

Last week, the White House and three Republican senators announced a terrible deal on this legislation that gave Mr. Bush most of what he wanted, including a blanket waiver for crimes Americans may have committed in the service of his antiterrorism policies. Then Vice President Dick Cheney and his willing lawmakers rewrote the rest of the measure so that it would give Mr. Bush the power to jail pretty much anyone he wants for as long as he wants without charging them, to unilaterally reinterpret the Geneva Conventions, to authorize what normal people consider torture, and to deny justice to hundreds of men captured in error.

These are some of the bill's biggest flaws:

Enemy Combatants: A dangerously broad definition of "illegal enemy combatant" in the bill could subject legal residents of the United States, as well as foreign citizens living in their own countries, to summary arrest and indefinite detention with no hope of appeal. The president could give the power to apply this label to anyone he wanted.

The Geneva Conventions: 'The bill would repudiate a half-century of international precedent by allowing Mr. Bush to decide on his own what abusive interrogation methods he considered permissible. And his decision could stay secret—there's no requirement that this list be published.

Habeas Corpus: Detainees in U.S. military prisons would lose the basic right to challenge their imprisonment. These cases do not clog the courts, nor coddle terrorists. They simply give wrongly imprisoned people a chance to prove their innocence.

Judicial Review: The courts would have no power to review any aspect of this new system, except verdicts by military tribunals. The bill would limit appeals and bar legal actions based on the Geneva Conventions, directly or indirectly. All Mr. Bush would have to do to lock anyone up forever is to declare him an illegal combatant and not have a trial.

Coerced Evidence: Coerced evidence would be permissible if a judge considered it reliable—already a contradiction in terms—and relevant. Coercion is defined in a way that exempts anything done before the passage of the 2005 Detainee Treatment Act, and anything else Mr. Bush chooses.

Secret Evidence: American standards of justice prohibit evidence and testimony that is kept secret from the defendant, whether the accused is a corporate executive or a mass murderer. But the bill as redrafted by Mr. Cheney seems to weaken protections against such evidence.

Offenses: The definition of torture is unacceptably narrow, a virtual reprise of the deeply cynical memos the administration produced after 9/11. Rape and sexual assault are defined in a retrograde way that covers only forced or coerced activity, and not other forms of nonconsensual sex. The bill would effectively eliminate the idea of rape as torture.

There is not enough time to fix these bills, especially since the few Republicans who call themselves moderates have been whipped into line, and the Democratic leadership in the Senate seems to have misplaced its spine. If there was ever a moment for a filibuster, this was it.

We don't blame the Democrats for being frightened. The Republicans have made it clear that they'll use any opportunity to brand anyone who votes against this bill as a terrorist enabler. But Americans of the future won't remember the pragmatic arguments for caving in to the administration.

They'll know that in 2006, Cohgress passed a tyrannical law that will be ranked with the low points in American democracy, our generation's version of the Alien and Sedition Acts.

QUESTIONS FOR THE INTERROGATORS

(By Fareed Zakaria]

A fierce debate over military tribunals has erupted in Washington. This is great news. The American constitutional system is finally working. The idea that the war on terror should be fought unilaterally by the executive branch—a theory the Bush administration promulgated for its entire first term—has died. The secret prisons have come out of the dark. Guantánamo will have to be closed or transformed.

The president and the legislative branch are negotiating a new system to determine the guilt or innocence of terrorism suspects, and it will have to pass muster with the courts. It is heartening as well that some of the key senators challenging the president's position are senior Republicans. Principle is triumphing over partisanship. Let's hope the debate will end with the United States' embracing a position that will allow America to reclaim the moral high ground.

The administration's policy has undergone a sea change. The executive branch has abandoned the idea that "enemy combatants"—that is, anyone so defined by the White House or Defense Department—may be locked up indefinitely without ever being charged, that secret prisons can be maintained, that congressional input or oversight is unnecessary and that international laws and treaties are irrelevant. The Geneva Conventions, in particular, were dismissed during the administration's first term by the then White House counsel Alberto Gonzales for their "quaint" protections of prisoners and "obsolete" limitations on interrogations. Donald Rumsfeld publicly announced that the Conventions no longer applied. The Bush administration's basic legal argument, formulated by officials like the Justice Department's John Yoo, was that this was a new kind of war, that the executive branch needed complete freedom and flexibility, with no checks or balances.

"There has been a paradigm shift on this whole issue,' a senior administration official told me last week. "The whole legal framework that underpinned the administration's approach in the first term is gone. John Yoo's arguments are simply no longer applicable. You may disagree with where we draw the lines, but we're now using concepts, principles and approaches that are familiar, within the American legal tradition and that of other civilized nations."

The administration was forced to do much of this by the Supreme Court's recent Hamdan decision and by the bold opposition of senators like John McCain and Lindsey Graham. But several officials, wishing to remain anonymous because of the sensitivity of the matter, said Secretary of State Condoleezza Rice and national security adviser Stephen Hadley had been urging movement in this direction for some time. "We concluded that this whole structure of prisoners, interrogations, trials and tribunals had to be placed on a sustainable basis," said one official. "That meant Congress had to be involved and the president had to explain the programs and procedures publicly."

The crucial issue, on which former Secretary of State Colin Powell and other distinguished military figures have stood up to Bush, is the treatment of prisoners under the Geneva Conventions. Powell explained to me his deep concerns about safeguarding American troops if "we start monkeying around with the common understanding of the Conventions." The administration claims that it merely wants to provide specific guidelines, but the real aim appears to be to let CIA employees engage in "rough" interrogations without fear of legal sanctions.

Powell and the senators argue that the guidelines are better left as they are—with a kind of calculated ambiguity that deters U.S. interrogators from testing the limits. "Clarifying' our treaty obligations will be seen as 'withdrawing' from them," warns Senator Graham, a former staff judge advocate in the Air National Guard. He's right. No other nation has sought to narrow the Geneva Conventions' scope by "clarifying" them. Does the United States want to be the first? Why not retain the status quo and then consult with other countries that are also grappling with terror suspects and arrive at a genuinely "common" clarification of the Conventions? If we "clarify" the Conventions to allow, say, waterboarding and other "rough" procedures, what happens to a CIA operative who is captured in a foreign country? Can that country "clarify" the Conventions and torture him? If it does, would the United States have any basis to condemn it and take action under international law?

Powell made another argument to me. "Part of the war on terror is an ideological and political struggle," he said. "Our moral posture is one of our best weapons. We're not doing so well on the public-diplomacy front. This would be the wrong signal to send the world." The administration seems blind to this political reality. After Guantánamo, Abu Ghraib, Haditha and more, America desperately needs a symbol that showcases its basic decency. Quibbling with the Geneva Conventions is the wrong signal, by the wrong administration, at the wrong time.

Mr. UDALL of Colorado. Mr. Speaker, the Senate-passed bill before us today is identical to H.R. 6166. I could not support that bill when the House considered it earlier this week, and nothing that has happened since then has caused me to change my view that it should not be enacted. So, I must continue to oppose it.

As I said earlier, I agree that Congress should establish clear statutory authority for detaining unlawful enemy combatants and using military tribunals to try them. In fact, I thought this should have been done long age because I took seriously the warnings of legal experts who said the system established by President Bush's unilateral Executive Order lacked departed too far from America's fundamental legal traditions to be immune from serious legal challenges.

That is why for several years I have cosponsored bills to replace that Executive Order with a sound statute that would allow prosecutions to proceed without the same vulnerability to challenge.

Unfortunately, until recently neither the president nor the Republican leadership thought there was a need for Congress to act—the president preferred to insist on unilateral assertions of executive authority, and the leadership was content with an indolent abdication of Congressional authority and responsibility.

Then, earlier this year, the Supreme Court put an end to that approach with its decision in the case of Hamdan v. Rumsfeld, which struck down the system established by the Executive Order—just what many of us had seen coming, and which we had sought to avoid through legislation.

So, we are voting on this bill only because the Supreme Court has forced the Administration to do what it should have done much sooner—come to Congress for legislation. And the voting is occurring this week, under rushed procedures that do not permit consideration of any changes, because, above all, the Republicans have decided they need to claim a legislative victory when they go home to campaign, to help take voters' minds off the Administration's missteps and their own failures.

But I think it is less important to get the job done before the election than to do it right. And, regrettably, I remain convinced that this bill fails that test.

I remain concerned about the bill's specific provisions. But just as serious are my concerns about what the bill does not say. In particular, I am concerned about the lack of any provisions to prevent indefinite detentions of American citizens who have never left the United States.

I cannot support any legislation intended to give the president—any president, of any party authority to throw an American citizen into prison without what the Supreme Court has described as "a meaningful opportunity to contest the factual basis for that detention before a neutral decisionmaker."

As I said when the House first debated this legislation, I prefer to err on the side of caution when I must vote on a measure that is not more clear on this point. And since that earlier debate, my concern—and my unwillingness to vote for this legislation—has been heightened by analyses of experts such as Professor Bruce Akerman of the Yale Law School.

In an analysis published after the earlier vote here in the House—which I am attaching for the benefit of our colleagues—Professor Akerman says: "The legislation . . . authorizes the president to seize American citizens as enemy combatants, even if they have never left the United States. And once thrown into military prison, they cannot expect a trial by their peers or any other of the normal protections of the Bill of Rights. . . . This grants the president enormous power over citizens and legal residents. They can be designated as enemy combatants if they have contributed money to a Middle Eastern charity, and they can be held indefinitely in a military prison. . . . What is worse, if the federal courts support the president's initial detention decision, ordinary Americans would be required to defend themselves before a military tribunal without the constitutional guarantees provided in criminal trials."

And, as Professor Akerman notes: "We are not dealing with hypothetical abuses. The president has already subjected a citizen to military confinement. Consider the case of Jose Padilla. A few months after 9/11, he was seized by the Bush administration as an "enemy combatant" upon his arrival at Chicago's O'Hare International Airport. He was wearing civilian clothes and had no weapons. Despite his American citizenship, he was held for more than three years in a military brig, without any chance to challenge his detention before a military or civilian tribunal. After a federal appellate court upheld the president's extraordinary action, the Supreme Court refused to hear the case, handing the administration's lawyers a terrible precedent. . . .

"But the bill also reinforces the presidential claims, made in the Padilla case, that the commander in chief has the right to designate a U.S. citizen on American soil as an enemy combatant and subject him to military justice. Congress is poised to authorize this presidential overreaching. Under existing constitutional doctrine, this show of explicit congressional support would be a key factor that the Supreme Court would consider in assessing the limits of presidential authority."

I do not have the legal expertise to say that Professor Akerman is completely right in this analysis. But I cannot in good conscience vote for this bill on the mere hope that he is wrong.

And, as I said when the House first considered this bill, it is clear that several of its provisions raise enough legal questions that military lawyers say there is a good chance the Supreme Court will rule it unconstitutional.

They may or may not be right about that, but their views deserve to be taken seriously—not only because we in Congress have sworn to uphold the Constitution but also because if our goal truly is to avoid unnecessary delays in bringing terrorists to justice, we need to take care to craft legislation that can and will operate soon, not only after prolonged legal challenges.

Finally, I remain concerned that the bill gives the president the authority to "interpret the meaning and application" of U.S. obligations under the Geneva Conventions. Instead of clearly banning abuse and torture, the bill leaves in question whether or not we are authorizing the Executive Branch to carry out some of the very things the Geneva Conventions seek to ban.

I cannot forget or discount the words of RADM Bruce MacDonald, the Navy's Judge Advocate General, who told the Armed Services Committee "I go back to the reciprocity issue that we raised earlier, that I would be very concerned about other nations looking in on the United States and making a determination that, if it's good enough for the United States, it's good enough for us, and perhaps doing a lot of damage and harm internationally if one of our service men or women were taken and held as a detainee."

I share that concern, and could not in good conscience support legislation that could put our men and women in uniform at risk.

Mr. Speaker, as I said earlier, establishing a system of military tribunals to bring to trial some of the worst terrorists in the world shouldn't be a partisan matter. It also should not be handled in a rush, without adequate care to get it right. Unfortunately, that has been the process used to develop this legislation and the result is a measure that I think has too many flaws to deserve enactment as it stands.

So, as I said earlier, I cannot support it.

THE WHITE HOUSE WARDEN

(By Bruce Ackerman)

Buried in the complex Senate compromise on detainee treatment is a real shocker, reaching far beyond the legal struggles about foreign terrorist suspects in the Guantanamo Bay fortress. The compromise legislation, which is racing toward the White House, authorizes the president to seize American citizens as enemy combatants, even if they have never left the United States. And once thrown into military prison, they cannot expect a trial by their peers or any other of the normal protections of the Bill of Rights.

This dangerous compromise not only authorizes the president to seize and hold terrorists who have fought against our troops "during an armed conflict," it also allows him to seize anybody who has "purposefully and materially supported hostilities against the United States." This grants the president enormous power over citizens and legal residents. They can be designated as enemy combatants if they have contributed money to a Middle Eastern charity, and they can be held indefinitely in a military prison.

Not to worry, say the bill's defenders. The president can't detain somebody who has given money innocently, just those who contributed to terrorists on purpose.

But other provisions of the bill call even this limitation into question. What is worse, if the federal courts support the president's initial detention decision, ordinary Americans would be required to defend themselves before a military tribunal without the constitutional guarantees provided in criminal trials.

Legal residents who aren't citizens are treated even more harshly. The bill entirely cuts off their access to federal habeas corpus, leaving them at the mercy of the president's suspicions.

We are not dealing with hypothetical abuses. The president has already subjected a citizen to military confinement. Consider the case of Jose Padilla. A few months after 9/11, he was seized by the Bush administration as an "enemy combatant" upon his arrival at Chicago's O'Hare International Airport. He was wearing civilian clothes and had no weapons. Despite his American citizenship, he was held for more than three years in a military brig, without any chance to challenge his detention before a military or civilian tribunal. After a federal appellate court upheld the president's extraordinary action, the Supreme Court refused to hear the case, handing the administration's lawyers a terrible precedent.

The new bill, if passed, would further entrench presidential power. At the very least, it would encourage the Supreme Court to draw an invidious distinction between citizens and legal residents. There are tens of millions of legal immigrants living among us, and the bill encourages the justices to uphold mass detentions without the semblance of judicial review.

But the bill also reinforces the presidential claims, made in the Padilla case, that the commander in chief has the right to designate a U.S. citizen on American soil as an enemy combatant and subject him to military justice. Congress is poised to authorize this presidential overreaching. Under existing constitutional doctrine, this show of explicit congressional support would be a key factor that the Supreme Court would consider in assessing the limits of presidential authority.

This is no time to play politics with our fundamental freedoms. Even without this massive congressional expansion of the class of enemy combatants, it is by no means clear that the present Supreme Court will protect the Bill of Rights. The Korematsu case—upholding the military detention of tens of thousands of Japanese Americans during World War II—has never been explicitly overruled. It will be tough for the high court to condemn this notorious decision, especially if passions are inflamed by another terrorist incident. But congressional support of presidential power will make it much easier to extend the Korematsu decision to future mass seizures.

Though it may not feel that way, we are living at a moment of relative calm. It would be tragic if the Republican leadership rammed through an election-year measure that would haunt all of us on the morning after the next terrorist attack.

Mrs. CHRISTENSEN. Mr. Speaker, I rise in opposition to S. 3930, the Military Commission Act of 2006 because it is too broad, overly inclusive and potentially unconstitutional. While I also vividly remember the horrors of the 9/11 terrorist attacks, I believe that Congress should carefully and constitutionally craft a bill which effectively punishes all terrorists and potential terrorists while at the same time maintaining the safety and security of our citizens from future terrorist attacks.

The definition of an "unlawful combatant" in Section 948(a.) of this bill is indicative of its over-inclusiveness. It creates legal loopholes and in my view, leaves even U.S. Citizens vulnerable to being classified as unlawful combatants. This definition does not exclude nor does it seek to exclude U.S. Citizens from being indefinitely detained. The President or one of his designees can simply determine that a fellow U.S. Citizen is an "unlawful enemy combatant" and this would suffice as sufficient evidence to detain this citizen indefinitely without any access to his family, an attorney or any form of judicial review.

Furthermore, the term "purposefully and materially supported hostilities" is overly broad and would lead to many innocent acts being transformed into terrorist activities.

In an article, Aziz Huq astutely demonstrates the broadness of the term by showing how a fictional character that owns a bodega and allowed Lebanese immigrants to use its services to send money to "West Beqaa", an area within the Hezbollah controlled area of Lebanon protectorate is found to have "purposefully and materially supported hostilities. This scenario is not very far-fetched, this piece of legislation has the potential to impact the very foundation of civil liberties and fundamental freedoms on which this country is built. It will impact the American Citizen's freedom of speech, freedom of association and the list could go on.

The bill also further undermines U.S. credibility in the eyes of the international community by granting the President the authority to interpret Art. III of the Geneva Convention an international treaty to which the U.S. is a signatory. This language sets a bad precedence in the international community and only frustrates the goals of established international laws, norms and customs.

If the U.S. President is allowed to reinterpret and apply an international treaty, what would stop other nations from doing the same? Additionally, as noted in his letter to Senator MCCAIN, former U.S. Secretary of State Colin Powell, posited that allowing the President to interpret the Geneva Convention would expose U.S. soldiers to more dangers. Colin Powell emphatically opposed this provision.

S. 3930 also violates separation of powers and the constitutional protection this provides, by stripping the federal court of its habeas review. The independence of the judiciary is one of the fundamental principles on which this democracy is built. Under this bill, the normal appeals process would not be available to the detained "unlawful enemy combatant." Instead the detainee who wishes to appeal an adverse decision has to appeal to a newly established "Court of Military Commission Review".

Terrorists must be brought to justice and we must act accordingly to secure our country and our citizens. However, these same goals can be achieved in a constitutional manner. I urge my colleagues to oppose this unworthy bill.

Mr. MICHAUD. Mr. Speaker, the final language for the bill was brought to the floor quickly and without thorough review by the House. I believe that it is important to have a system to try accused terrorists for their war crimes in a quick and fair way. In my original review of the bill, I believed that it took steps to protect fundamental human rights, prevent torture and provide for a fair legal process.

As I have heard from more and more legal experts and from my constituents, it is clear that this bill does not create a system that meets our high American standards for a fair trial and human rights.

Make no mistake; I believe that convicted terrorists must be punished for their war crimes. But it must be done in such a way that the American people are confident that our values are upheld. I do not believe that this bill makes this clear to the American people or to the international community that looks to us as a place of human rights and fairness.

Some people may question me for changing my vote. I believe that elected officials must have the strength to recognize new information and to take it into account to make the right decision. I wish President Bush would do the same thing with our policies in Iraq.

In lieu of the matter proposed to be inserted by the Senate amendment, insert the following:

SECTION 1. SHORT TITLE; FINDINGS.

(a) SHORT TITLE.—This Act may be cited as the "John Warner National Defense Authorization Act for Fiscal Year 2007".

(b) FINDINGS.—Congress makes the following findings:

(1) Senator John Warner of Virginia was elected a member of the United States Senate on November 7, 1978, for a full term beginning on January 3, 1979. He was subsequently appointed by the Governor of Virginia to fill a vacancy on January 2, 1979, and has served continuously since that date. He was appointed a member of the Committee on Armed Services in January 1979, and has served continuously on the Committee since that date, a period of nearly 28 years. Senator Warner's service on the Committee represents nearly half of its existence since it was established after World War II.

(2) Senator Warner came to the Senate and the Committee on Armed Services after a distinguished record of service to the Nation, including combat service in the Armed Forces and high civilian office.

(3) Senator Warner enlisted in the United States Navy upon graduation from high school in 1945, and served until the summer of 1946, when he was discharged as a Petty Officer 3rd Class. He then attended Washington and Lee University on the G.I. Bill. He graduated in 1949 and entered the University of Virginia Law School.

(4) Upon the outbreak of the Korean War in 1950, Senator Warner volunteered for active duty, interrupting his education to accept a commission in the United States Marine Corps. He served in combat in Korea as a ground officer in the First Marine Air Wing. Following his active service, he remained in the Marine Corps Reserve for several years, attaining the rank of captain.

(5) Senator Warner resumed his legal education upon returning from the Korean War and graduated from the University of Virginia Law School in 1953. He was selected by the late Chief Judge E. Barrett Prettyman of the United States Court of Appeals for the District of Columbia Circuit as his law clerk. After his service to Judge Prettyman, Senator Warner became an Assistant United States Attorney in the District of Columbia, and later entered private law practice.

(6) In 1969, the Senate gave its advice and consent to the appointment of Senator Warner as Under Secretary of the Navy. He served in this position until 1972, when he was confirmed and appointed as the 61st Secretary of the Navy since the office was established in 1798. As Secretary, Senator Warner was the principal United States negotiator and signatory of the Incidents at Sea Executive Agreement with the Soviet Union, which was signed in 1972 and remains in effect today. It has served as the model

for similar agreements between states covering the operation of naval ships and aircraft in international sea lanes throughout the world.

(7) Senator Warner left the Department of the Navy in 1974. His next public service was as Administrator of the American Revolution Bicentennial Commission. In this capacity, he coordinated the celebration of the Nation's founding, directing the Federal role in all 50 States and in over 20 foreign nations.

(8) Senator Warner has served as chairman of the Committee on Armed Services of the United States Senate from 1999 to 2001, and again since January 2003. He served as ranking minority member of the committee from 1987 to 1993, and again from 2001 to 2003. Senator Warner concludes his service as chairman at the end of the 109th Congress, but will remain a member of the committee.

(9) This Act is the twenty-eighth annual authorization Act for the Department of Defense for which Senator Warner has taken a major responsibility as a member of the Committee on Armed Services of the United States Senate, and the fourteenth for which he has exercised a leadership role as chairman or ranking minority member of the committee.

(10) Senator Warner, as seaman, Marine officer, Under Secretary and Secretary of the Navy, and member, ranking minority member, and chairman of the Committee on Armed Services of the United States Senate, has made unique and lasting contributions to the national security of the United States.

(11) It is altogether fitting and proper that this Act, the last annual authorization Act for the national defense managed by Senator Warner in and for the United States Senate as chairman of the Committee on Armed Services, be named in his honor, as provided in subsection (a).

(3) The amounts of outfitting costs and post-delivery costs incurred for that ship.

SEC. 128. ALTERNATIVE TECHNOLOGIES FOR FUTURE SURFACE COMBATANTS.

(a) FINDINGS.—Congress makes the following findings:

(1) Securing and maintaining access to affordable and plentiful sources of energy is a vital national security interest for the United States.

(2) The Nation's dependence upon foreign oil is a threat to national security due to the inherently volatile nature of the global oil market and the political instability of some of the world's largest oil producing states.

(3) Given the recent increase in the cost of crude oil, which cannot realistically be expected to improve over the long term, other energy sources must be seriously considered.

(4) Alternate propulsion sources such as nuclear power offer many advantages over conventional power for major surface combatant ships of the Navy, including—

(A) virtually unlimited high-speed endurance;

(B) elimination of vulnerable refueling; and

(C) reduction in the requirement for replenishment vessels and the need to protect those vessels.

(b) SENSE OF CONGRESS.—In light of the findings in subsection (a), it is the sense of Congress that the Navy should make greater use of alternative technologies, including expanded application of integrated power systems, fuel cells, and nuclear power, for propulsion of future major surface combatant ships.

(c) REQUIREMENT.—The Secretary of the Navy shall include integrated power systems, fuel cells, and nuclear power as propulsion alternatives to be evaluated within the analysis of alternatives for future major surface combatant ships.

SEC. 129. SENSE OF CONGRESS REGARDING THE SIZE OF THE ATTACK SUBMARINE FORCE.

(a) FINDINGS.—Congress makes the following findings:

(1) The United States Navy must be large enough, agile enough, and lethal enough to deter any threat and defeat any foe.

(2) The proliferation of modern nuclear and nonnuclear submarines in the navies of nations around the globe will make undersea superiority a more significant challenge in the future.

(3) The unique combination of firepower, stealth, sensors, and communications equipment contained in a modern attack submarine make the attack submarine a critical component of the Armed Forces of the United States.

(4) The report entitled "Report to Congress on Annual Long-Range Plan for Construction of Naval Vessels for fiscal year 2007", submitted to Congress by the Secretary of the Navy pursuant to section 231 of title 10, United States Code—

(A) identifies future naval force structure requirements indexed to Department of Defense fiscal year 2020 threat assessments and compliant with the Fiscal Year 2006 Quadrennial Defense Review and, with respect to the attack submarine force, identifies a need for the Navy to maintain a fleet of not less than 48 attack submarines; and

(B) projects that the attack submarine force will fall below 48 vessels between 2020 and 2032.

(b) SENSE OF CONGRESS.—In light of the findings in subsection (a), it is the sense of Congress that the Secretary of the Navy should take all reasonable effort to accelerate the construction of Virginia Class submarines to maintain the attack submarine force structure at not less than 48 submarines and (if the number of attack submarines should fall below 48), to minimize the period the attack submarine force remains below 48 vessels.

SEC. 130. QUALITY CONTROL IN PROCUREMENT OF SHIP CRITICAL SAFETY ITEMS AND RELATED SERVICES.

(a) QUALITY CONTROL POLICY.—The Secretary of Defense shall prescribe in regulations a quality control policy for the procurement of the following:

(1) Ship critical safety items.

(b) ELEMENTS.—The policy required under subsection (a) shall include requirements as follows:

(1) That the head of the design control activity for ship critical safety items establish processes to identify and manage the procurement, modification, repair, and overhaul of such items.

(2) That the head of the contracting activity for a ship critical safety item enter into a contract for the procurement, modification, repair, or overhaul of such item only with a source on a qualified manufacturers list or a source approved by the design control activity in accordance with section 2319 of title 10, United States Code (as amended by subsection (d)).

(3) That the ship critical safety items delivered, and the services performed with respect to such items, meet all technical and quality requirements specified by the design control activity.

(c) DEFINITIONS.—In this section, the terms "ship critical safety item" and "design control activity" have the meanings given such terms in subsection (g) of 2319 of title 10, United States Code (as so amended).

(d) CONFORMING AMENDMENTS.—Section 2319 of title 10, United States Code, is amended—

(1) in subsection (c)(3), by inserting "or ship critical safety item" after "aviation critical safety item"; and

(2) in subsection (g)—

(A) by redesignating paragraph (2) as paragraph (3);

(B) by inserting after paragraph (1) the following new paragraph (2):

"(2) The term 'ship critical safety item' means any ship part, assembly, or support equipment containing a characteristic the failure, malfunction, or absence of which could cause a catastrophic or critical failure resulting in loss of or serious damage to the ship or unacceptable risk of personal injury or loss of life."; and

(C) in paragraph (3), as so redesignated—

(i) by inserting "or ship critical safety item" after "aviation critical safety item";

(ii) by inserting ", or the seaworthiness of a ship or ship equipment," after "equipment"; and

(iii) by striking "the item" and inserting "such item".

(b) YEARS AFTER FISCAL YEAR 2007.—

(1) CERTIFICATION REQUIRED.—After fiscal year 2007, the Secretary of the Air Force may retire a U–2 aircraft only if the Secretary of Defense certifies to Congress that the intelligence, surveillance, and reconnaissance (ISR) capabilities provided by the U–2 aircraft no longer contribute to mitigating any gaps in intelligence, surveillance, and reconnaissance capabilities identified in the 2006 Quadrennial Defense Review.

(2) LIMITATIONS.—No action may be taken by the Department of Defense to retire (or to prepare to retire) any U–2 aircraft before a certification specified in paragraph (1) is submitted to Congress. (1) That the use of such contract will result in substantial savings of the total anticipated costs of carrying out the program through annual contracts.

(2) That the minimum need for the property to be purchased is expected to remain substantially unchanged during the contemplated contract period in terms of production rate, procurement rate, and total quantities.

(3) That there is a reasonable expectation that throughout the contemplated contract period the Secretary of the Air Force will request funding for the contract at the level required to avoid contract cancellation.

(4) That there is a stable design for the property to be acquired and that the technical risks associated with such property are not excessive.

(5) That the estimates of both the cost of the contract and the anticipated cost avoidance through the use of a multiyear contract are realistic.

(6) That the use of such contract will promote the national security of the United States.

In certifying that the cost savings are substantial, the Secretary shall duly consider the historical cost savings that led to a decision to proceed with a multiyear procurement contract under section 2306b of title 10, United States Code, in the case of previous aviation-related multiyear contracts authorized by law dating back to fiscal year 1982.

SEC. 223. POLICY OF THE UNITED STATES ON PRIORITIES IN THE DEVELOPMENT, TESTING, AND FIELDING OF MISSILE DEFENSE CAPABILITIES.

(a) FINDINGS.—Congress makes the following findings:

(1) In response to the threat posed by ballistic missiles, President George W. Bush in December 2002 directed the Secretary of Defense to proceed with the fielding of an initial set of missile defense capabilities in 2004 and 2005.

(2) According to assessments by the intelligence community of the United States, North Korea tested in 2005 a new solid propellant short-range ballistic missile, conducted a launch of a Taepodong-2 ballistic missile/space launch vehicle in 2006, and is likely developing intermediate-range and intercontinental ballistic missile capabilities that could someday reach as far as the United States with a nuclear payload.

(3) According to assessments by the intelligence community of the United States, Iran continued in 2005 to test its medium-range ballistic missile, and the danger that Iran will acquire a nuclear weapon and integrate it with a ballistic missile Iran already possesses is a reason for immediate concern.

(b) POLICY.—It is the policy of the United States that the Department of Defense accord a priority within the missile defense program to the development, testing, fielding, and improvement of effective near-term missile defense capabilities, including the ground-based midcourse defense system, the Aegis ballistic missile defense system, the Patriot PAC-3 system, the Terminal High Altitude Area Defense system, and the sensors necessary to support such systems.

(4) An identification of the entity of the Department of Defense (whether the Missile Defense Agency, a military department, or both) that will be responsible for funding each missile defense program to be transitioned to a military department, and at what date.

(5) A description of the type of funds that will be used (whether funds for research, development, test, and evaluation, procurement, military construction, or operation and maintenance) for each missile defense program to be transitioned to a military department.

(6) An explanation of the number of systems planned for procurement for each missile defense program to be transitioned to a military department, and the schedule for procurement of each such system.

An adjustment under this subsection shall be effective after the Secretary transmits a written notification of the adjustment to the congressional defense committees.

"(c) Increments.—In the event any increment of a major automated information system program separately meets the requirements for treatment as a major automated information system program, the provisions of this chapter shall apply to such increment as well as to the overall major automated information system program of which such increment is a part.

"§2445b. Cost, schedule, and performance information

"(a) Submittal of Cost, Schedule, and Performance Information.—The Secretary of Defense shall submit to Congress each calendar year, not later than 45 days after the President submits to Congress the budget for a fiscal year under section 1105 of title 31, budget justification documents regarding cost, schedule, and performance for each major automated information system program for which funds are requested by the President in the budget.

"(b) Elements.—The documents submitted under subsection (a) with respect to a major automated information system program shall include detailed and summarized information with respect to the automated information system to be acquired under the program, and shall specifically include each of the following:

"(2) An adjustment or revision of the original estimate or information originally submitted on a program may be treated as the original estimate or information originally submitted on the program if the adjustment or revision is the result of a critical change in the program covered by section 2445c(d) of this title.

"(3) In the event of an adjustment or revision to the original estimate or information originally submitted on a program under paragraph (2), the Secretary of Defense shall include in the next budget justification documents submitted under subsection (a) after such adjustment or revision a notification to the congressional defense committees of such adjustment or revision, together with the reasons for such adjustment or revision.

"(B) the estimated program development cost or full life-cycle cost for the program has increased by at least 15 percent, but less than 25 percent, over the original estimate submitted to Congress under paragraph (3) of section 2445b(b) of this title; or

(8) In May 2004, Zarqawi was implicated in a car bombing that killed Izzadine Salim, the rotating president of the Iraqi Governing Council.

(13) The members of the United States Armed Forces, the intelligence community, and other Federal agencies, along with coalition partners and the Iraqi Security Forces, should be commended for their courage and extraordinary efforts to track down the most wanted terrorist in Iraq and to secure a free and prosperous future for the people of Iraq.

(6) commends Iraqi Prime Minister Nouri al-Maliki on the finalization of the new Iraqi cabinet;

(7) urges the democratically elected government in Iraq to use this opportunity to defeat the terrorist enemy, to put an end to ethnic and sectarian violence, and to achieve a free, prosperous, and secure future for Iraq; and

SEC. 3123. EDUCATION OF FUTURE NUCLEAR ENGINEERS.

(a) FINDINGS.—Congress makes the following findings:

(1) The Department of Defense and the Department of Energy depend on the specialized expertise of nuclear engineers who support the development and sustainment of technologies including naval reactors, strategic weapons, and nuclear power plants.

(2) Experts estimate that over 25 percent of the approximately 58,000 workers in the nuclear power industry in the United States will be eligible to retire within 5 years, representing both a huge loss of institutional memory and a potential national security crisis.

(3) This shortfall of workers is exacerbated by reductions to the University Reactor Infrastructure and Education Assistance program, which trains civilian nuclear scientists and engineers. The defense and civilian nuclear industries are interdependent on a limited number of educational institutions to produce their workforce. A reduction in nuclear scientists and engineers trained in the civilian sector may result in a further loss of qualified personnel for defense-related research and engineering.

(4) The Department of Defense's successful Science, Math and Research for Transformation (SMART) scholarship-for-service program serves as a good model for a targeted scholarship or fellowship program designed to educate future scientists at the postsecondary and postgraduate levels.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 5122) to authorize appropriations for fiscal year 2007 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe personnel strengths for such fiscal year for the Armed Forces, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The Senate amendment struck out all of the House bill after the enacting clause and inserted a substitute text.

The House recedes from its disagreement to the amendment of the Senate with an amendment which is a substitute for the House bill and the Senate amendment. The differences between the House bill, the Senate amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

SUMMARY STATEMENT OF CONFERENCE ACTIONS

The Conferees recommend authorization of appropriations for fiscal year 2007 for the Department of Defense for procurement; research and development; test and evaluation; operation and maintenance; working capital funds; military construction and family housing; and for weapons and environmental restoration programs of the Department of Energy; that have a budget authority implication of $462.8 billion for the national defense function.

The conferees recommend emergency authorization of appropriations for the Department of Defense of $70.0 billion for the costs associated with ongoing contingency operations in Iraq and Afghanistan, of which $23.8 billion is included for equipment reset costs for the Army and Marine Corps.

Summary table of authorizations

The defense authorization act provides authorizations for appropriations, but does not generally provide budget authority. Budget authority is provided in the appropriations act.

In order to relate the conference recommendations to the budget resolution, matters in addition to the dollar authorizations contained in this bill must be taken into account. A number of programs in the national defense function are authorized in other legislation.

The following table summarizes authorizations included in the bill for fiscal year 2007 and, in addition, summarizes the implications of the conference action for the budget authority totals for national defense (budget function 050).

Light Cargo Aircraft

The budget request included $109.2 million in Aircraft Procurement, Army (APA) for the procurement of three Future Cargo Aircraft (FCA) and $15.8 million in Aircraft Procurement, Air Force (APAF) for the Light Cargo Aircraft (LCA).

The House bill would authorize the budget request.

The Senate amendment would authorize a decrease of $109.2 million.

The conferees agree to authorize a decrease of $109.2 million in APA, and an increase by the same amount in APAF.

The conferees note that the Army initiated the FCA program to support an Army organic, time-sensitive cargo mission. The Air Force is also interested in procuring a similar type of aircraft and has been in the process of establishing a program office for a new intra-theater LCA. Since submission of the budget request, the Army and Air Force have signed a Memorandum of Understanding (MOU) regarding merging the two programs into a new program called the Joint Cargo Aircraft (JCA).

As part of implementing that MOU, the Air Force is conducting F-series (functional analysis) studies and an independent analysis of alternatives to define the broader requirement for the aircraft. The Air Force's LCA would provide intra-theater lift mission support for the U.S. Transportation Command (USTRANSCOM), which is the distribution process owner for the Department of Defense. The conferees note that intra-theater lift using fixed wing aircraft is performed most efficiently when it is coordinated by USTRANSCOM.

The conferees also note that the Joint Chiefs of Staff Intra-theater Lift Capabilities Study Phase 1 and the Air Mobility Command's Mobility Roadmap are currently being developed. The conferees further agree that, until these documents are complete, the right mix and number of intra-theater aircraft will not be determined. Therefore, it would be premature to procure aircraft until the Department completes these efforts and presents them to the congressional defense committees.

ITEMS OF SPECIAL INTEREST

Battleship transfer

The House report accompanying H.R. 5122 (H. Rept. 109–452) of the National Defense Authorization Act for Fiscal Year 2007 contained an item of special interest to clarify instructions to the Navy regarding the transfer of the battleships USS *Wisconsin* and USS *Iowa*, included in the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109–163). The conferees understand that: (1) the Navy will require that the USS *Wisconsin* and USS *Iowa* be preserved in their present condition through continued use of cathodic protection, dehumidification, and other methods as needed; (2) any alterations to the battleships while in the custody of entities within the Commonwealth of Virginia and State of California, respectively, could be reverted; and (3) spare parts and unique equipment, such as 16-inch gun barrels and projectiles, if donated, will include a provision in the donation agreement that they can be recalled if the battleships are returned to the Navy in the event of a national emergency. The conferees agree that these measures would meet the intent of the instructions contained in the House report.

Study on replacement of the T–38 training aircraft

The Senate report accompanying S. 2766 (S. Rept. 109–254) of the National Defense Authorization Act for Fiscal Year 2007 directed the Secretary of the Air Force to conduct a study that would determine the suitability of T–45 and Korean built KT–50 training aircraft to replace the T–38 training aircraft.

The conferees direct the Secretary to conduct a study that would determine the suitability of the T–45, and any other appropriate aircraft, to replace the T–38, and to submit a report on the results of this study to the congressional defense committees by March 15, 2007.

LEGISLATIVE PROVISIONS ADOPTED

Subtitle A—Authorization of Appropriations

Authorization of appropriations (secs. 101–104)

The House bill contained provisions (secs. 101–104) that would authorize the recommended fiscal year 2007 funding levels for Procurement Army, Navy, Marine Corps, Air Force, and Defense-wide activities.

The Senate amendment contained similar provisions (secs. 101–104).

The conference agreement includes these provisions.

Subtitle B–Army Programs

Sense of Congress on future multiyear procurement authority for the Family of Medium Tactical Vehicles (sec. 111)

The House bill contained a provision (sec. 111) that would authorize the Secretary of the Army to enter into a 3-year multiyear procurement contract, beginning with fiscal year 2008, for procurement of the Family of Medium Tactical Vehicles (FMTV).

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would express the sense of Congress on the use of a multiyear procurement contract to extend FMTV procurement beyond the current 5-year multiyear contract. The amendment would also recommend that the Army incorporate product improvements from lessons learned from Operation Enduring Freedom (OEF) and Operation Iraqi Freedom (OIF) and from product improvement programs in the area of force protection, survivability, reliability, network communications situational awareness, and safety.

The conferees recognize that the current 5-year multiyear procurement for FMTV A1R vehicles ends with fiscal year 2007 funding and calendar year 2008 deliveries. The conferees understand that 28,000 trucks have been produced to date, which falls short of the Army requirement for 85,000 trucks. The Army's Tactical Wheeled Vehicle (TWV) Modernization Strategy Report to Congress stated that "As a risk mitigator, use of contract options will be sought to permit extension of current production models to avoid any breaks in vehicle supply." The conferees note that the Army has saved approximately 6–10 percent on the costs of a 3-year multiyear contract versus single year procurement under three successive multiyear contracts. The conferees are concerned that single year contract awards would be costly because of the outstanding requirement and costly given the current savings provided by the current multiyear contract.

Furthermore, the conferees also note that a multiyear contract would potentially assure favorable, cost-effective prices for a more advanced FMTV configuration that would incorporate lessons learned from OEF and OIF, as well as ensure stability in the industrial base.

The conferees expect the Department of the Army to comply with all documentation and certifications requirements of section 2306(b) of title 10, United States Code.

Multiyear procurement authority for MH–60R helicopter and mission equipment (sec. 112)

The House bill contained a provision (sec. 112) that would authorize the Secretary of the Army, acting as the executive agent for the Department of the Navy, to enter into a 5-year, multiyear procurement contract for 144 MH–60R helicopters and associated mission equipment beginning with the fiscal year 2007 program year. Further, the provision would require that the multiyear procurement contract authority be executed in accordance with section 2306b of title 10, United States Code.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would authorize the Secretary of the Army, acting as the executive agent for the Department of the Navy, to enter into a multiyear contract, beginning with fiscal year 2007, for the procurement of MH–60R helicopters. The amendment would also authorize the Secretary of the Navy to enter into a multiyear contract for the procurement of associated mission equipment for MH–60R helicopters.

The conferees expect the Secretary of the Army and the Secretary of the Navy to submit certifications required by section 2306b before approving multiyear contracts for MH–60R helicopters and associated mission equipment. The conferees also understand that the Department of the Army and the Department of the Navy intend to procure at least 144 MH–60R helicopters and associated mission equipment.

Funding profile for modular force initiative of the Army (sec. 113)

The House bill contained a provision (sec. 113) that would require the Secretary of the Army to include the M1A2 Abrams SEP tank and Bradley A3 fighting vehicles within the Army's modularity funding profile beginning with the 2008 budget submission, in accordance with the March 2006 Army report to Congress entitled "The Army Modular Initiative."

The Senate amendment contained no similar provision.

The Senate recedes with a clarifying amendment.

Bridge to Future Networks program (sec. 114)

The House bill contained a provision (sec. 114) that would limit to not more than 70 percent, the amounts authorized to be appropriated for the bridge to Future Networks program, until the Secretary of the Army submits a report to the congressional defense committees on an analysis of the integration of the Joint Network Node (JNN) and the Warfighter Information Network-Tactical (WIN–T).

The Senate amendment contained a similar provision (sec. 111) that would withhold 50 percent of the funds authorized to be appropriated for the procurement of the JNN until the Secretary provides a report to the congressional defense committees on the Army's strategy for the convergence of the JNN, WIN–T, and the Mounted Battle Command On-the-Move communications programs.

The Senate recedes with a clarifying amendment.

Comptroller General report on the contract for the Future Combat Systems program (sec. 115)

The Senate amendment contained a provision (sec. 112) that would require the Comptroller General to submit to the congressional defense committees a report on the participation and activities of the lead systems integrator in the Future Combat Systems (FCS) program under the contract of the Army for the FCS program.

The House bill contained no similar provision.

The House recedes.

Priority for allocation of replacement equipment to operational units based on combat mission deployment schedule (sec. 116)

The Senate amendment contained a provision (sec. 114) that would establish a priority for the distribution of new and combat serviceable equipment for active and reserve component forces to units scheduled for mission deployment, employment, or both regardless of component. Priority for the distribution of new and combat serviceable equipment would then be given to Army National Guard units in States that have experienced a major disaster, as determined under the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121–5206), and may require replacement equipment to respond to future emergencies or disasters.

The House bill contained no similar provision.

The House recedes with an amendment that would expand the authority, as provided for in the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108–375), by directing the Secretary of Defense to ensure that priority for the distribution of equipment using the amounts authorized to be appropriated for the procurement of replacement equipment for the distribution of new and combat serviceable equipment, with associated support and test equipment, for active and reserve component forces be given to operational units based on combat mission deployment schedule regardless of component.

The conferees recognize that National Guard units operating in States that have experienced a major disaster, as determined under the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121–5206), may require replacement equipment to respond to future natural and manmade disasters. The conferees direct the Secretary of Defense to conduct a study on the priority distribution strategy for replacing National Guard equipment and to submit a report on the results of the study to the congressional defense committees no later than April 1, 2007. The conferees expect the Department to allocate equipment based on the priorities determined by this analysis.

Subtitle C—Navy Programs

CVN–21 class aircraft carrier procurement (sec. 121)

The Senate amendment contained a provision (sec. 121) that would authorize the Secretary of the Navy to incrementally fund procurement of CVN–21 class aircraft carriers over four year periods, commencing with CVN–78 procurement in fiscal year 2008. The provision would also authorize the Secretary to enter into a contract during fiscal year 2007 for advance procurement with respect to the CVN–21 class aircraft carriers designated CVN–79 and CVN–80.

The House bill contained no similar provision.

The House recedes with an amendment that would authorize the Secretary to incrementally fund procurement of a CVN–21 class aircraft carrier designated CVN–78, CVN–79, and CVN–80, as applicable, over four year periods, commencing with the fiscal year of the contract for construction of the applicable aircraft carrier.

Adherence to Navy cost estimates for CVN–21 class of aircraft carriers (sec. 122)

The House bill contained a provision (sec. 122) that would limit the total amount to be obligated or expended from funds appropriated or otherwise made available in Shipbuilding and Conversion, Navy, or for any other procurement account, for the detail design, non-recurring engineering and construction of the lead ship of the CVN–21 class aircraft carrier program to $10.5 billion. The provision would also limit the total amount to be obligated or expended for the construction of the follow-on ships of the CVN–21 class aircraft carrier program to $8.1 billion. The provision would allow the Secretary of the Navy to adjust the limitation amounts for: (1) economic inflation; (2) changes in Federal, State, or local laws enacted after September 30, 2006; (3) outfitting and post-delivery costs; and (4) insertion of new technology. The insertion of new technology would be limited to those technologies that could be used to either lower life cycle costs or meet an emerging threat. The provision would also require the Secretary to report any adjustment to the cost limitation with the submission of the annual budget request.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would also allow the Secretary to make adjustments for amounts of increases or decreases to cost attributable to: (1) non-recurring design and engineering pursuant to achieving compliance with the cost limitation; and (2) correction of deficiencies that affect safety of ship, safety of personnel, or otherwise preclude safe operations and crew certifications.

The amendment would not provide the Secretary authority to adjust the limitation amounts for cost increases attributable to congressional actions that impact on the shipbuilding program of record. However, the conferees understand that such action could have significant impact on program cost, and therefore direct that the Secretary include, within the annual written notice to the congressional defense committees regarding changes to the cost limitations, an assessment of any negative impact of congressional action on program costs.

The conferees understand that the CVN–21 class budget represents the Navy's risk-balanced assessment of the cost for completing design and construction of the future class of nuclear powered aircraft carriers. The conferees recognize that many uncertainties remain with regard to completion of CVN–21 design and construction, including innumerable, inestimable events which will impact cost during the next 15 years of performance on the program. Accordingly, the amendment would allow adjustment to the cost limitation for non-recurring design and engineering in order to enable the Navy to reduce this risk in the execution of the design effort.

The conferees expect that the Navy will ultimately manage program execution within the bounds of the budget estimate. Accordingly, the conferees understand that compliance with this provision will require procurement cost trade-offs to be accomplished, which could reduce the capabilities, system performance, safety, crew quality of life, future growth margin, or other important factors in the design and construction of the CVN–21 class. The conferees believe that most of these trade-offs will be within the purview of the program office and requirements office. However, the Secretary shall notify the Committees on Armed Services of the Senate and the House of Representatives not less than 30 days prior to implementing any cost-driven reduction which would unacceptably impact safety, crew quality of life, or otherwise preclude the program from meeting the requirements of the CVN–21 Operational Requirements Document. The Secretary's notification shall identify the specific characteristic proposed to be reduced and the cost avoidance provided by such reduction.

Modification of limitation on total cost of procurement of CVN–77 aircraft carrier (sec. 123)

The Senate amendment contained a provision (sec. 123) that would increase the limitation on the total cost of procurement for the CVN–77 aircraft carrier to $6.057 billion.

The House bill contained no similar provision.

The House recedes.

Construction of first two vessels under the DDG–1000 Next-Generation Destroyer program (sec. 124)

The Senate amendment contained a provision (sec. 122) that would authorize the Secretary of the Navy to enter into a contract to fund the detail design and construction of the first two DDG–1000 class destroyers in Shipbuilding and Conversion, Navy (SCN), with funding split over fiscal years 2007 and 2008.

The House bill contained a similar provision (sec. 127).

The House recedes with a technical amendment.

The conferees understand that the Secretary has requested split funding authority for the two lead ships of the DDG–1000 class as a one-time program exception to the full funding policy in order to support the competitive procurement of the follow-on ships of the program. The conferees agree that there is sufficient benefit to authorizing this one-time exception with the expectation that the Secretary will structure the DDG–1000 program so that each ship, after the first two ships, is procured using the method of full funding in a single year.

Adherence to Navy cost estimates for LHA Replacement amphibious assault ship program (sec. 125)

The House bill contained a provision (sec. 123) that would limit the total amount to be obligated or expended from funds appropriated or otherwise made available in Shipbuilding and Conversion, Navy, or for any other procurement account, for the detail design, non-recurring engineering and construction of the lead ship of the LHA Replacement amphibious assault ship, LHA–6, to $2.81 billion. The provision would allow the Secretary of the Navy to adjust the limitation amounts for: (1) economic inflation; (2) changes in Federal, State, or local laws enacted after September 30, 2006; (3) outfitting and post-delivery costs; and (4) insertion of new technology. The insertion of new technology would be limited to those technologies that could be used to either lower life-cycle costs or meet an emerging threat. The provision would require the Secretary to report any adjustment to the cost limitation with the submission of the annual budget request.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would also allow the Secretary to make adjustments for amounts of increases or decreases to cost attributable to: (1) non-recurring design and engineering pursuant to achieving compliance with the cost limitation; (2) correction of deficiencies that affect safety of ship, safety of personnel, or otherwise preclude safe operations and crew certifications; and (3) the effect of Hurricane Katrina in August 2005 or other force majeure contract modifications.

The amendment would not provide the Secretary authority to adjust the limitation amounts for cost increases attributable to congressional actions that impact on the shipbuilding program of record. However, the conferees understand that such action could have significant impact on program cost, and therefore direct that the Secretary include, within the annual written notice to the congressional defense committees regarding changes to the cost limitations, an assessment of any negative impact of congressional action on program costs.

The conferees understand that the LHA–6 budget represents the Navy's risk-balanced assessment of the cost for completing design and construction of the future LHA Replacement ship. The conferees recognize that many uncertainties remain with regard to completion of LHA–6 design and construction, including innumerable, inestimable events which will impact cost during the next 6 years of performance on the program. Accordingly, the amendment would allow adjustment to the cost limitation for non-recurring design and engineering in order to enable the Navy to reduce this risk in the execution of the design effort.

The conferees expect that the Navy will ultimately manage program execution within the bounds of the budget estimate. The conferees understand that compliance with this provision will require procurement cost trade-offs to be accomplished, which could reduce the capabilities, system performance, safety, crew quality of life, future growth margin, or other important factors in the design and construction of the LHA Replacement ship. The conferees believe that most of these trade-offs will be within the purview of the program office and requirements office. However, the Secretary shall notify the Committees on Armed Services of the Senate and the House of Representatives not less than 30 days prior to implementing any cost-driven reduction which would unacceptably impact safety, crew quality of life, or otherwise preclude the program from meeting the requirements of the LHA Replacement program Capability Development Document. The Secretary's notification shall identify the specific characteristic proposed to be reduced and the cost avoidance provided by such reduction.

Cost limitation for San Antonio (LPD–17) class amphibious ship program (sec. 126)

The House bill contained a provision (sec. 124) that would limit the total amount to be obligated or expended from funds appropriated or otherwise made available for Shipbuilding and Conversion, Navy, or for any other procurement account; for eight *San Antonio* class amphibious ships (LPD–18, LPD–19, LPD–20, LPD–21, LPD–22, LPD–23, LPD–24, and LPD–25) to the cost estimates submitted for those ships with the fiscal year 2007 budget request. The provision would allow the Secretary of the Navy to adjust the limitation amounts for economic inflation; changes in Federal, State, or local laws enacted after September 30, 2006; outfitting and post-delivery costs; and the amounts of insertion of new technology. The insertion of new technology would be limited to those technologies that could be used to either lower life cycle costs or meet an emerging threat. The provision would require the Secretary to report any adjustment to the cost limitation with the submission of the annual budget request.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would raise the amounts of the limitation for the LPD–22, LPD–23, LPD–24, and LPD–25 *San Antonio* class amphibious ships to the contract ceiling prices for those four ships. The amendment would also allow the Secretary to make adjustments for contract cost adjustments directly attributed to the effect of Hurricane Katrina or other force majeure contract modifications, and for amounts of closeout costs associated with completion of the LPD–17 class program.

Multiyear procurement authority for V–22 tiltrotor aircraft program (sec. 127)

The House bill contained a provision (sec. 125) that would authorize the Secretary of the Navy, acting as the executive agent for the Secretary of the Air Force and the Commander, U.S. Special Operations Command (USSOCOM), to enter into a multiyear contract, beginning with the fiscal year 2008 program year, for the procurement of 211 V–22 tiltrotor aircraft, of which not more than 185 would be in the MV–22 configuration and not more than 26 would be in the CV–22 configuration.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would allow the Secretary of the Navy, acting as the executive agent for the Secretary of the Air Force and the Commander, USSOCOM, to enter into a multiyear contract, beginning with the fiscal year 2008 program year, for the procurement of V–22 tiltrotor aircraft.

The conferees expect that the Secretary of the Navy will procure V–22 tiltrotor aircraft at the quantity that was requested in the budget.

Alternative technologies for future surface combatants (sec. 128)

The House bill contained a provision (sec. 128) that would express the sense of Congress that the Navy should make greater use of alternative technologies, including nuclear power, as a means of vessel propulsion for its future fleet of surface combatants.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would expand the definition of alternative technologies for propulsion of future major surface combatants to include integrated power systems and fuel cells. The amendment would also require that the Secretary of the Navy include integrated power systems, fuel cells, and nuclear power as propulsion alternatives to be evaluated within the analysis of alternatives for future major surface combatant ships.

Sense of Congress regarding the size of the attack submarine force (sec. 129)

The House bill contained a provision (sec. 121) that would amend section 5062 of title 10, United States Code, to require the Secretary of Defense to maintain a minimum force structure of 48 operational attack submarines.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would express the sense of Congress that the Secretary of the Navy should take all reasonable effort to accelerate the construction of *Virginia* class submarines to maintain the attack submarine force structure at not less than 48 submarines and (if the number of attack submarines should fall below 48), to minimize the period the attack submarine force structure remains below 48 vessels.

The conferees are aware that the earliest possible date to accelerate *Virginia* class construction to 2 boats per year is 2010, which would require advance procurement funding commencing in 2008. Therefore, the conferees direct the Secretary to submit a report to the congressional defense committees with the fiscal year 2008 budget request that would identify the necessary planning and programming required to increase *Virginia* class construction to 2 boats per year commencing in fiscal year 2010. The report shall consider program cost, shipyard workload impacts, budget implications, and other significant factors that would weigh in the decision process regarding acceleration of attack submarine construction. The report shall also identify the operational impact associated with delaying the increase in attack submarine construction until 2012 in accordance with the program of record.

Quality control in procurement of ship critical safety items and related services (sec. 130)

The Senate amendment contained a provision (sec. 809) that would require the Secretary of Defense to prescribe in regulation a quality control policy for the procurement of ship critical safety items and the procurement of modifications, repair, and overhaul of such items.

The House bill contained a similar provision (sec. 126).

The House recedes.

The conferees agree to extend the date for the submission of the Comptroller General's report to the congressional defense committees required by the Senate report accompanying S. 2766 (S. Rept. 109–254) of the John Warner National Defense Authorization Act for Fiscal Year 2007 until February 1, 2008.

The conferees expect the Comptroller General to brief the congressional defense committees on the initial findings of the report by April 1, 2007.

Subtitle D—Air Force Programs

Bomber force structure (sec. 131)

The House bill contained a provision (sec. 131) that would prohibit the Air Force from retiring any B–52 aircraft, except for the one B–52 aircraft no longer in use by the National Aeronautics and Space Administration for testing. The provision would require the Air Force to maintain a minimum of 44 B–52H combat coded aircraft until the year 2018 or until a long-range strike replacement aircraft with equal or greater capability than the B–52H model has attained initial operational capability.

The Senate amendment contained similar provisions (secs. 144–145). Section 144 would allow the Secretary of the Air Force to retire up to 18 B–52H bomber aircraft in fiscal year 2007. Section 145 would prevent the obligation or expenditure of funds for the retirement or dismantling of any of the 93 B–52H bomber aircraft in service in the Air Force as of June 1, 2006, until the Secretary submits to the Committees on Armed Services of the Senate and the House of Representatives a report on the amount and type of bomber force structure required to carry out the National Security Strategy of the United States.

The Senate recedes with an amendment that would authorize the Secretary to retire up to 18 B–52H bomber aircraft, but maintain not less than 44 combat coded B–52H bomber aircraft, beginning 45 days after the Secretary submits to the Committees on Armed Services of the Senate and the House of Representatives a report prepared by the Institute for Defense Analyses on the amount and type of bomber force structure required to carry out the National Security Strategy of the United States. The amendment would also prohibit retirement of more than 18 B–52s until a long-range strike replacement aircraft with equal or greater capability has attained initial operational capability status or until January 1, 2018, whichever occurs first.

The conferees direct the Secretary to include in the report:

(1) the plans to modernize the Air Force bomber fleets;

(2) the amount and type of bomber force required in executing two overlapping "swift defeat" campaigns involving both conventional and strategic nuclear missions;

(3) a justification of the cost and projected savings associated with any reductions to the B–52H bomber aircraft fleet;

(4) the life expectancy of each bomber aircraft to remain in the bomber force structure; and

(5) the capabilities of the bomber force structure that would be replaced, augmented, or superceded by any new bomber aircraft.

The conferees expect the Secretary to maintain all retired B–52H bomber aircraft, retired in fiscal year 2007 or later, in a condition known as "Type–1000 storage" at the Aircraft Maintenance and Regeneration Center.

Strategic airlift force structure (sec. 132)

The House bill contained a provision (sec. 132) that would require the Air Force to maintain a minimum strategic airlift force of 299 aircraft beginning in fiscal year 2009, and would repeal section 132 of the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108–136).

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would eliminate the repeal of any portion of section 132.

Limitation on retirement of U–2 aircraft (sec. 133)

The House bill contained a provision (sec. 133) that would preclude the Department of Defense from retiring U–2 aircraft in fiscal year 2007. The provision would permit retirement after fiscal year 2007 only if the Secretary of Defense were able to certify to Congress that the U–2's intelligence, surveillance, and reconnaissance (ISR) capabilities no longer contribute to mitigating any gaps in ISR capabilities identified in the 2006 Quadrennial Defense Review report.

The Senate amendment contained no similar provision.

The Senate recedes with a technical amendment.

Multiyear procurement authority for F–22A Raptor fighter aircraft (sec. 134)

The House bill contained a provision (sec. 134) that would authorize the Secretary of the Air Force, beginning in program year 2007, to enter into a 3-year multiyear contract for procurement of up to 60 F–22A Raptor fighter aircraft. The provision would allow the multiyear contract to be entered into only after the Secretary of Defense certifies that the conditions specified in subsection (a) of section 2306b of title 10, United States Code, have been met, subject to a 30-day congressional notice-and-wait period.

The Senate amendment contained similar provisions (secs. 146–147) that would prohibit the use of incremental funding for the procurement of F–22A fighter aircraft, authorize the Secretary of the Air Force to enter into a multiyear contract for the procurement of up to 60 F–22A fighter aircraft and up to 120 F119 engines, including not more than 13 spare F119 engines, beginning with the fiscal year 2007 program year.

The Senate recedes with an amendment that would:

(1) prohibit the use of incremental funding for the procurement of F–22A fighter aircraft;

(2) require the Secretary of Defense to certify to the congressional defense committees that the multiyear contract is in compliance with each of the conditions specified in subsection (a) of section 2306b, as well as the certification required in subsection (i)(1)(A) of section 2306b;

(3) require the Secretary, in certifying that the cost savings are substantial, to duly consider the historical cost savings that led to a decision to proceed with a multiyear procurement contract under section 2306b of title 10, United States Code, in the case of previous aviation-related multiyear contracts authorized by law dating back to fiscal year 1982; and

(4) require the Secretary of Defense to provide a new F–22A cost analysis, prepared by a federally-funded research and development center other than the Institute for Defense Analyses, to the congressional defense committees.

The conferees expect that the Secretary of Defense's certification of projected multiyear procurement savings will include a consideration of savings, relative to historical experience, that are attributable to economic order quantity investments, number of units procured, length of the multiyear contracts, and cost reduction initiatives.

Limitation on retirement of KC–135E aircraft during fiscal year 2007 (sec. 135)

The House bill contained a provision (sec. 135) that would prohibit the Air Force from retiring more than 29 KC–135E aircraft during fiscal year 2007. Beginning in fiscal year 2007, the provision would also require the Secretary to maintain all retired KC–135Es, after September 30, 2006, in a condition that would allow recall of that aircraft for future service in the Air Force Reserve, Guard, or regular forces aerial refueling force structure.

The Senate amendment contained a provision (sec. 143) that would authorize the Secretary to retire up to and including 29 Air Force KC–135E aircraft.

The Senate recedes.

The conferees expect the Secretary to maintain all KC–135E aircraft, retired in fiscal year 2007 or later, in a condition known as "Type–1000 storage" at the Aircraft Maintenance and Regeneration Center.

Limitation on retirement of F–117A aircraft during fiscal year 2007 (sec. 136)

The House bill contained a provision (sec. 136) that would limit the number of F–117A aircraft to be retired by the Secretary of the Air Force in fiscal year 2007 to 10 aircraft. The provision would also require the Secretary to maintain each F–117A aircraft, retired after September 30, 2006, in a condition that would allow recall of that aircraft for future service.

The Senate amendment contained no similar provision.

The Senate recedes.

The conferees expect the Secretary to maintain all F–117A aircraft, retired in fiscal year 2007 or later, in a condition known as "Type–1000 storage" at the Aircraft Maintenance and Regeneration Center.

Limitation on retirement of C–130E tactical airlift aircraft (sec. 137)

The Senate amendment contained a provision (sec. 142) that would prohibit the Secretary of the Air Force from retiring any C–130E/H tactical airlift aircraft in fiscal year 2007.

The House bill contained no similar provision.

The House recedes with an amendment that would allow the Secretary to retire up to 51 C–130E tactical airlift aircraft.

The conferees expect the Secretary to maintain all C–130E aircraft, retired in fiscal year 2007 or later, in a condition known as "Type–1000 storage" at the Aircraft Maintenance and Regeneration Center.

Procurement of Joint Primary Aircraft Training System aircraft after fiscal year 2006 (sec. 138)

The Senate amendment contained a provision (sec. 141) that would require any Joint Primary Aircraft Training System aircraft procured after fiscal year 2006 to be procured through a contract under part 15 of the Federal Acquisition Regulations (FAR), relating to acquisition of items by negotiated contract, rather than through a contract under part 12 of the FAR, relating to acquisition of commercial items.

The House bill contained no similar provision.

The House recedes.

Minuteman III intercontinental ballistic missiles modernization (sec. 139)

The Senate amendment contained a provision (sec. 149) that would restrict the Department of Defense from terminating any Minuteman III Intercontinental Ballistic Missile (ICBM) modernization program or withdraw any Minuteman III ICBM from the active force until 30 days after the Secretary of Defense submits to the congressional defense committees a report. The provision would also make available $5.0 million of the amounts available for research, development, test, and evaluation, Air Force, for Remote Visual Assessment for security of the silos housing ICBMs.

The House bill contained no similar provision.

The House recedes with an amendment that would place the findings in the statement of managers, and that would reflect the conference outcome of the amounts available for Remote Visual Assessment in the tables of this report in research, development, test, and evaluation, Air Force.

The conferees make the following findings: (1) In the statement of managers accompanying the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109–163), the conferees state that the policy of the United States "is to deploy a force of 500 ICBMs." The conferees further note "that unanticipated strategic developments may compel the United States to make changes to this force structure in the future;" (2) The Quadrennial Defense Review (QDR) Report of 2006 finds that maintaining a robust nuclear deterrent "remains a keystone of United States national power." However, notwithstanding that finding and without providing any specific justification for the recommendation, the QDR recommends reducing the number of deployed Minuteman III ICBMs from 500 to 450 beginning in fiscal year 2007. The QDR also fails to identify what unanticipated strategic developments compelled the United States to reduce the ICBM force structure; and (3) General James Cartwright, Commander, U.S. Strategic Command, testified before the Committee on Armed Services of the Senate that the reduction in deployment of Minuteman III ICBMs is required so that the 50 missiles withdrawn from the deployed force could be used for test assets and spares to extend the life of the Minuteman III ICBMs well into the future. If spares are not modernized, the Air Force may not have sufficient replacement missiles to sustain the force size.

Subtitle E—Joint and Multi-Service Matters

Clarification of limitation on initiation of new unmanned aerial vehicle systems (sec. 141)

The conferees agree to include a provision that would amend section 142 of the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109–162) to explicitly state that the section applies to the procurement of new unmanned aerial vehicle (UAV) systems, and to provide clarifying language for those systems for which an exception is made, including: any UAV system or any component thereof, as described in section 142, if as of January 6, 2006, the UAV system or any component thereof to be procured was otherwise currently under contract or had previously been procured by the Department of Defense, or funds had been appropriated but not yet obligated for the UAV system or any component thereof. The conferees also agree to authorize the Undersecretary of Defense for Acquisition, Technology, and Logistics (AT&L) to delegate this authority within the Office of AT&L.

LEGISLATIVE PROVISIONS NOT ADOPTED

Reports on Army modularity initiative

The Senate amendment contained a provision (sec. 113) that would require the Secretary of the Army to submit a report to the congressional defense committees, not later than March 15, 2007, on specific costs, funding, and equipment distribution of the Army's modularity initiative. The provision would also require that the Comptroller General conduct an annual review of the modularity initiative and the progress that the Army is making in the equipping of the active and reserve components.

The House bill contained no similar provision.

The Senate recedes.

The conferees note that the reporting requirements of this provision are incorporated elsewhere in this report.

Funding for the Call for Fire Trainer/Joint Fires and Effects Trainer System

The House bill contained a provision (sec. 115) that would authorize $4.0 million for the procurement of the Call for Fire Trainer/Joint Fires and Effects Trainer System for the Army.

The Senate amendment contained no similar provision.

The House recedes.

The conference outcome is reflected in the tables of this report in Other Procurement, Army, line number 169.

Air Force program

The House bill contained a provision (sec. 137) that would authorize an increase of $6.0 million in section 103 for Other Procurement, Air Force for Science Engineering Lab Data Integration at Ogden Air Logistics Center, Utah. This would be offset by an equal decrease in PE 62301E for Information and Communications Technology.

The Senate amendment contained no similar provision.

The House recedes.

The conference outcome is reflected in the tables of this report.

Multi-spectral imaging capabilities

The Senate amendment contained a provision (sec. 148) that would: (1) express the sense of the Senate that the Air Force should investigate ways to retain the multispectral imaging capabilities of the Senior Year Electro-optical Reconnaissance System (SYERS–2) that would otherwise be lost with the retirement of the U–2 aircraft; and (2) require that the Secretary of the Air Force provide a plan for migrating these multispectral capabilities to the Global Hawk unmanned aerial vehicle.

The House bill contained no similar provision.

The Senate recedes.

The conferees expect the Secretary to develop a plan for migrating the multi-spectral imaging capability provided by the SYERS-2 capabilities from the U–2 to the Global Hawk, and provide the results of that plan to the congressional defense committees with the submission of the fiscal year 2008 budget request.

TITLE II—RESEARCH, DEVELOPMENT, TEST, AND EVALUATION

Research, Development, Test, and Evaluation overview

The budget request included $73,156.0 million in Research, Development, Test, and Evaluation for the Department of Defense.

The House bill would authorize $74,054.6 million.

The Senate amendment would authorize $74,268.1 million.

The conferees agree to authorize $73,608.0 million.

Unless noted explicitly in the statement of managers, all changes are made without prejudice.

Sea Fighter (X-Craft)

The House bill would authorize $25.7 million in PE 63123N for modifications to Sea Fighter to improve the ship's survivability, command and control, armament, and other ship systems to make Sea Fighter an operationally deployable asset.

The Senate amendment contained no similar funding.

The conferees agree to authorize $23.0 million in PE 63123N for Sea Fighter modifications.

Of the amount authorized, the conferees direct the Secretary of the Navy to utilize the additional funding to: (1) improve aviation capabilities; (2) improve damage control and firefighting capabilities; (3) improve the quality of and increase the capacity of berthing and messing facilities for 12 additional crew; (4) provide command and control upgrades; (5) add weapons (offensive and defensive); and (6) make topside changes to reduce radiation hazards. The conferees expect the Secretary to utilize Sea Fighter in support of Navy operations and to develop and validate operational concepts for littoral warfare.

The conferees are aware that on September 6, 2006, Sea Fighter sustained significant damage while operating off of the Pacific coast. The conferees expect the Secretary to make all repairs necessary to restore Sea Fighter to previous capability and make available for operational use.

Research, Development, Test, and Evaluation, Air Force overview

The budget request included $24,396.8 million in Research Development, Test, and Evaluation, Air Force for the Department of Defense.

The House bill would authorize $24,810.0 million.

The Senate amendment would authorize $23,970.9 million.

The conferees agree to authorize $24,236.0 million.

Unless noted explicitly in the statement of managers, all changes are made without prejudice.

Transformational satellite communications

The budget request included $867.0 million in PE 63845F for transformational satellite communications (TSAT).

The House bill would authorize a decrease of $80.0 million in PE 63845F for TSAT.

The Senate amendment would authorize a decrease of $70.0 million in PE 63845F for TSAT.

The conferees agree to authorize $767.0 million in PE 63845F for TSAT, a decrease of $100.0 million due to unexecutable growth in the program budget.

While fully supportive of the restructured TSAT program, the conferees note that the budget request for fiscal year 2007 represents a 100 percent increase over fiscal year 2006 appropriated amount of $429.0 million. The Government Accountability Office questions whether the contractors associated with the space segment of the TSAT program will be able to increase development activities to the requested fiscal year 2007 budget level, hence the recommended reduction.

The conferees direct the Secretary of the Air Force to submit a report to the congressional defense committees by February 15, 2007, explaining what actions the Air Force has taken to address the remaining concerns raised by the TSAT Program Review Group and the Government Accountability Office, including: (1) the need to significantly refine requirements so that program content can be matched to budget constraints, and how the Department plans to control requirements to prevent problems associated with "requirements creep"; (2) the need to adequately staff the TSAT program office with experienced space acquisition professionals; (3) the status of refining key performance parameters so they provide specificity and validation metrics; and (4) the implications for other programs, such as Space Radar and Future Combat System, of a less capable initial block of TSAT satellites.

Space Radar

The budget request included $266.4 million in PE 63858F for Space Radar (SR) program.

The House bill would authorize a decrease of $30.0 million in PE 63858F.

The Senate amendment would authorize a decrease of $66.4 million in PE 63858F.

The conferees agree to authorize $200.0 million in PE 63858F, a decrease of $66.4 million, and recommend that the remaining funds be directed toward technology development, system engineering, and concept definition that assumes a single SR system that will meet joint requirements and employ a joint concept of operations with the intelligence community. The conferees are aware that the SR program is being restructured, and may benefit from an incremental, block approach similar to that chosen for the Transformational Satellite (TSAT) program. The conferees would welcome such an approach, however, until further definition of the program is provided, the conferees do not believe it is prudent to move beyond technology development, systems engineering, and concept definition activities. Further definition would include an agreed upon joint requirements document.

Conferees direct the Secretary of Defense and the Director of National Intelligence (DNI) to submit a joint report to the congressional defense and intelligence committees by March 1, 2007, containing the following elements: (1) a description of the respective roles and responsibilities of the intelligence community and the Department of Defense with respect to the development of the SR, including an updated Memorandum of Agreement between the Secretary and the DNI; (2) the process by which the intelligence community and the Department coordinate joint development efforts and requirements definition; (3) the plans for achieving a cost-share agreement between the intelligence community and the Department for the development and acquisition of a SR capability; and (4) a commitment from the Secretary and the DNI that SR will be a single system responsive to the requirements of each organization.

The conferees also direct the Secretary, in consultation with the DNI, to submit a report to the congressional defense committees by January 1, 2007, addressing the following: (1) the scope of the space radar architecture, including the system's interactions with other intelligence, surveillance, and reconnaissance platforms providing similar capability, as well as interactions with TSAT or alternative systems for processing and transmitting space radar data to other military applications; (2) the concept of operations, including how space radar data could be used to support defense and intelligence missions, and models for tasking, processing, exploitation, and dissemination to end users; (3) the acquisition approach that could be pursued by the SR program, including the identification of key technologies and their expected maturity at the time of program initiation; and (4) the schedule for meeting a realistic launch date, potential risks to that schedule, and potential risks of not meeting that launch date.

Combatant commanders' integrated command and control system

The budget request included $50.9 million in PE 35906F for the combatant commanders' integrated command and control system (CCIC2S).

The House bill would authorize no funds in PE 35906F.

The Senate amendment would authorize the budget request.

The conferees agree to authorize $16.3 million in PE 35906F for the CCIC2S program, a decrease of $34.6 million.

The conferees believe that the capability to warn against air, missile, and space attacks is critical to our national security and homeland defense, and support the necessary modernization and integration of the command and control systems at Cheyenne Mountain, Colorado for mission execution by North American Aerospace Defense Command, U.S. Northern Command, and U.S. Strategic Command.

In a July 2006 report on the CCIC2S program, the Government Accountability Office (GAO) found that poor past performance, inadequate management and oversight, and changing requirements resulted in significant cost overruns and an undefined delivery schedule. The report further noted that most mission critical capabilities will not be delivered in fiscal year 2006, as initially planned. While the missile warning mission is partially complete, no work has been completed on the space mission and estimated completion dates have not been determined. GAO recommended that eight actions be taken to improve management and oversight of the project.

The conferees believe that many of these recommendations are being addressed, but remain concerned about the Department's prioritization of and commitment to the CCIC2S program, as evidenced by its continued reductions in program funding. The conferees further believe that continued investments in a development program without a defined schedule and final cost risks further cost overruns and schedule delays. It is therefore prudent to reassess program requirements, cost, and schedule; and determine program affordability within the context of the Department's priorities, other acquisition programs, and long-range investment plans, prior to continuing with further development.

The conferees direct the Secretary of Defense to maintain essential operation and maintenance activities, and limit developmental activities to the completion of the missile warning system. In addition, the conferees direct the Secretary of Defense to submit a report by March 1, 2007, to the congressional defense committees that addresses all eight of the GAO recommended actions including an affordability assessment, an economic analysis, and an independent life cycle cost estimate.

The conferees would like to be clear that the reduction to the amount requested for the CCIC2S program should not be construed as a lack of support for the program, but rather a reflection of continuing concerns related to the CCIC2S acquisition approach. The conferees expect that future budget requests reflect an executable program with a defined schedule and commitment of adequate resources.

Research, Development, Test, and Evaluation, Defense-wide overview

The budget request included $20,809.9 million in Research, Development, Test, and Evaluation, Defense-wide for the Department of Defense.

The House bill would authorize $20,760.0 million.

The Senate amendment would authorize $21,488.9 million.

The conferees agree to authorize $20,930.0 million.

Unless noted explicitly in the statement of managers, all changes are made without prejudice.

National Defense Education Program

The budget request included $19.5 million in PE 61120D8Z for the National Defense Education Program (NDEP). The House bill would authorize the budget request.

The Senate amendment would authorize an increase of $5.0 million in PE 61120D8Z.

The conferees agree to authorize $19.5 million in PE 61120D8Z, specifically for Science, Mathematics, and Research for Transformation scholarships and for other authorized NDEP activities; but authorize no funding for institutional scholarships, fellowships, and traineeships. The conferees recommend that the Department provide information on the need for this activity along with a request for legislative authority to conduct it.

Printed circuit board supply chain

The budget request included $23.4 million in PE 63712S for generic logistics research and development technology demonstrations.

The House bill would authorize an increase of $10.0 million in PE 63712S for the emerging critical interconnection technology program to address reliable printed circuit board manufacturing in the United States.

The Senate amendment would authorize an increase of $4.0 million in PE 63712S for the emerging critical interconnection technology program.

The conferees agree to authorize an increase of $4.3 million in PE 63712S for the emerging critical interconnection technology program.

The conferees direct the Secretary of Defense to submit to the Committees on Armed Services of the Senate and the House of Representatives a report on the implementation of the recommendations of the National Research Council (NRC) Committee on Manufacturing Trends in Printed Circuit Board Technology. This report should be submitted not later than 9 months after the date of the enactment of this Act. The report should, at a minimum, provide an analysis of each finding and a detailed description of the response by the Department of Defense to each recommendation of the NRC Committee, including a schedule with specific milestones and required funding for completing the implementation of the recommendation or the reasons for a decision not to implement the recommendation.

Joint modeling, simulation, and experimentation

The budget request included $115.7 million in PE 63828D8Z for joint experimentation, modeling, and simulation technologies.

The House bill would authorize the budget request.

The Senate amendment would authorize an increase of $10.0 million in PE 63828D8Z to further develop joint, interagency, and coalition modeling, simulation, and experimentation.

The conferees agree to authorize the budget request and an increase of $8.0 million in PE 63828D8Z in order to fund joint effects-based modeling and simulation that effectively incorporates political, economic, infrastructure, information, societal, and diplomatic factors, as well as coalition warfare, at the tactical level of operations.

As mentioned in the Senate report accompanying S. 2766 (S. Rept. 109–254) of the National Defense Authorization Act for Fiscal Year 2007, the 2006 Quadrennial Defense Review (QDR) Report noted that the Department of Defense must shift its emphasis from Department-centric approaches toward interagency solutions that incorporate all elements of national power. Cooperation across the Federal Government is essential and can be facilitated efficiently by enhanced modeling, simulation, and experimentation. Of the amount authorized, the conferees recommend that $4.0 million be utilized to carry out an East Coast Asymmetric Warfare Initiative (AWI). The East Coast AWI is designed to enhance our nation's coordination and response capabilities to a Weapon of Mass Destruction (WMD) event through a complex, scenario-based exercise utilizing the experience and unique capabilities of the Navy's Center for Asymmetric Warfare and involving the Commonwealth of Virginia and the State of Maine. This multi-agency exercise involving the Department of Defense, the Department of Homeland Security, other Federal agencies, State and local government entities, as well as the private sector will greatly enhance U.S. response capability to a WMD event and provide a template for future exercises designed to further strengthen our nation's ability to respond to a WMD event.

Ballistic Missile Defense

Ground-based Midcourse Ballistic Missile Defense

The budget request included $2.9 billion in PE 63882C for the Ballistic Missile Defense midcourse defense segment to cover continued development, ground and flight testing, fielding, and support for the Ground-based Midcourse Defense (GMD) system.

The House bill would authorize a decrease of $35.8 million in PE 63882C, which includes the elimination of all funding, $55.8 million, for the third GMD site in Europe.

The Senate amendment would authorize an increase of $245.0 million in PE 63882C.

The conferees agree to authorize $3.1 billion in PE 63882C, an increase of $225.0 million for the BMD midcourse defense segment. The increase is directed as follows: $60.0 million for efforts to accelerate the ability of the GMD system to conduct concurrent test and operations; $140.0 million for enhanced testing and to increase the pace of GMD flight testing; and $25.0 million for advanced procurement of an additional six flight test missiles. The Missile Defense Agency (MDA) is expected to budget for the completion of these tasks over fiscal years 2008 to 2011.

The conferees also agree to provide $32.8 million for the third GMD site in Europe, a decrease of $23.0 million, and note that a ground-based interceptor site in Europe could provide future protection for the United States and Europe against longer-range ballistic missiles launched from the Middle East. The conferees also direct the Secretary of Defense to report to the congressional defense committees within 30 days of the completion of planned intercept tests FTG–04 and FTG–05. The report should include an assessment of whether the test objectives for these intercept tests have been met. In the event that these test objectives are not met, the Secretary should provide in this report a determination as to whether the remaining block 2008 funds should be reallocated for additional testing of the block 2004/2006 configuration.

Aegis Ballistic Missile Defense

The budget request included $1.0 billion in PE 63892C for the sea-based Aegis Ballistic Missile Defense system.

The House bill would authorize an increase of $40.0 million in PE 63892C.

The Senate amendment would authorize an increase of $100.0 million in PE 63892C.

The conferees agree to authorize $1.1 billion in PE 63892C, an increase of $100.0 million. The increase is directed as follows: $10.0 million for continued S-band advanced radar algorithm work; $20.0 million for Aegis BMD signal processor, 2–color seeker development, and acceleration of the open architecture program; and $70.0 million to support the procurement of 24 additional SM–3 block 1B missiles over fiscal years 2008 to 2011. MDA is expected to budget for the completion of these tasks over fiscal years 2008 to 2011.

The conferees are aware that the MDA and the Department of the Navy are exploring the feasibility of modifying 100 SM–2 Block IV missiles to obtain a near-term sea-based terminal ballistic missile defense capability starting in fiscal year 2007 with conversion of all missiles completed by the end of fiscal year 2009. According to briefings by the MDA and Department of the Navy, such a capability could afford protection for ships and other critical assets against short-range ballistic missiles in the Scud A/B class. This proposed development would cost approximately $130.0 million over fiscal years 2007 to 2009, with the Navy share estimated at approximately $20.0 million in fiscal year 2007. The conferees, while supportive of efforts to provide near-term missile defense capability, require further information before authorizing this development effort to proceed. Therefore, the conferees encourage the Department of Defense to submit to Congress a reprogramming request in fiscal year 2007 to pursue a sea-based terminal missile defense capability, should such a step be consistent with Department requirements and resource constraints. If submitted, the reprogramming request should be accompanied by documentation that: (1) explains the need for such a capability; (2) indicates Department of the Navy endorsement of this program; and (3) includes a Navy-MDA cost-share agreement through completion of the effort.

Arrow Ballistic Missile Defense System

The budget request included $1.0 billion in PE 63881C for Ballistic Missile Defense Terminal Defense Segment, of which $13.0 million was for Arrow missile production and $56.2 million was for the Arrow System Improvement Program.

The House bill would authorize the budget request.

The Senate amendment would authorize an increase of $8.0 million for the Arrow System Improvement Program and an increase of $52.0 million for Arrow co-production in PE 63881C.

The conferees agree to authorize a total of $63.0 million in PE 63881C for Arrow co-production, an increase of $50.0 million.

Kinetic Energy Interceptor

The budget request included $405.5 million in PE 63886C for Ballistic Missile Defense System Interceptors for continued development of the Kinetic Energy Interceptor.

The House bill would authorize a decrease of $100.0 million in PE 63886C.

The Senate amendment would authorize a decrease of $200.0 million in PE 63886C.

The conferees agree to authorize $245.5 in PE 63886C, a decrease of $160.0 million. The conferees further recommend that no additional funds be reprogrammed into this program element over the course of fiscal year 2007.

Space Tracking and Surveillance System

The budget request included $390.6 million in PE 63893C for the Space Tracking and Surveillance System.

The House bill and Senate amendment would authorize the budget request.

The conferees agree to authorize $223.6 million in PE 63893C, a decrease of $67.0 million.

Products

The budget request included $506.8 million in PE 63889C for Ballistic Missile Defense (BMD) Products.

The House bill and would authorize the budget request.

The Senate amendment would authorize a decrease of $40.0 million in PE 63889C.

The conferees agree to authorize $478.8 million in PE 63889C, a decrease of $28.0 million.

Systems Core

The budget request included $473.1 million in PE 63890C for Ballistic Missile Defense Systems Core.

The House bill would authorize a decrease of $10.0 million in PE 63890C.

The Senate amendment would authorize a decrease of $40.0 million in PE 63890C.

The conferees agree to authorize $348.1 million in PE 63890C, a decrease of $25.0 million.

Special Programs

The budget request included $374.5 million in PE 63891C for Special Programs—MDA.

The House bill would authorize the budget request.

The Senate amendment would authorize a decrease of $20.0 million in PE 63891C.

The conferees agree to authorize $348.1 million in PE 63891C, a decrease of $26.4 million.

Multiple Kill Vehicle

The budget request included $165.0 million in PE 63894C for Multiple Kill Vehicle.

The House bill would authorize a decrease of $65.0 million in PE 63894C.

The Senate amendment would authorize the budget request.

The conferees agree to authorize $125.0 million in PE 63894C, a decrease of $40.0 million, and note the importance of this program as a future spiral improvement for the ground-based interceptor.

Operationally responsive space capabilities

The budget request included $20.4 million in PE 65799D8Z for the Office of Force Transformation (OFT) in the Office of the Secretary of Defense, but included no funding for operationally responsive space capabilities.

The House bill would authorize the budget request in PE 65799D8Z, and would authorize an increase of $20.0 million in PE 64857F for operationally responsive space capabilities.

The Senate amendment would authorize an increase of $25.0 million in PE 65799D8Z for development of operationally responsive space capabilities.

The conferees agree to authorize $48.9 million in PE 65799D8Z, an increase of $23.5 million for operationally responsive space capabilities. Of this amount, $20.0 million is for payloads, satellite busses, integration, command and control, and joint warfighter experimentation; and $3.5 million is to support adapting existing airborne reconnaissance sensor capabilities for use in responsive space missions.

The conferees expect future operationally responsive space budget requests would be in support of the Operationally Responsive Space Program Office, to the extent applicable, pursuant to guidance in the Operationally Responsive Space provision (sec 913) of this Act.

Operational Test and Evaluation, Defense overview

The budget request included $181.5 million in Operational Test and Evaluation, Defense for the Department of Defense.

The House bill would authorize $181.5 million.

The Senate amendment would authorize $181.5 million.

The conferees agree to authorize $181.5 million.

Unless noted explicitly in the statement of managers, all changes are made without prejudice.

ITEM OF SPECIAL INTEREST

Proposed realignment of Air Force test and evaluation facilities

The conferees are concerned about a proposed realignment of Air Force test and evaluation facilities and personnel that could have significant impacts beginning in fiscal year 2007 and continuing into the out years. The conferees believe that additional information and analysis of the impacts of the proposed action is required before any implementation of the plan proceeds. The conferees direct the Secretary of the Air Force, jointly with the Under Secretary of Defense for Acquisition, Technology, and Logistics (USD (AT&L)), and the Director of the Test Resource Management Center (TRMC) to submit separate reports to the congressional defense committees analyzing the proposed actions.

The impact report prepared by the Air Force and USD (AT&L) should include an analysis of the following for proposed personnel relocations and for the facilities proposed closure or realignment: (1) missions served; (2) Department of Defense acquisition programs affected, including an analysis of impacts on risk, cost, and schedule; (3) costs to the Air Force and to the Department, including costs to close or realign test and evaluation capabilities and reconstitute or acquire required capabilities, including personnel, contract termination, military construction, housing costs, installation operations and maintenance, and other costs; (4) a detailed analysis and disclosure of the estimated net cost or savings to the Department derived from the actions and payback period of such actions; (5) developmental and operational test programs impacted; (6) the extent to which the recommendations of the 2005 Defense Base Closure and Realignment Commission support or contradict the findings of this analysis; (7) impacts on the test and evaluation workforce and on the ability to recruit and retain skilled personnel at affected facilities; and (8) alternatives considered. The impact report should also include a joint statement by the Secretary of the Air Force and the USD (AT&L) on changes, if any, to the proposed course of action as a result of the conclusions of the analysis, subsequent actions required as a result of the analysis, and an explanation of the criteria used to determine the level of acceptable risk to the Department in proceeding with the proposed action.

The TRMC report should include an assessment of how the proposed closures or realignments of Air Force research, development, test, and evaluation activities may impact the strategic plan for Department of Defense test and evaluation resources, as required by section 196 of title 10, United States Code. The assessment should focus on whether the Air Force test and evaluation facilities, resources, and budgets will meet the test and evaluation requirements and satisfy performance measures included in the strategic plan.

The conferees direct the Secretary of the Air Force to undertake no action to realign or close any test and evaluation activities, other than those specifically included in the final decisions of the 2005 Defense Base Realignment and Closure round, until 60 days after the two required reports are received by the congressional defense committees.

LEGISLATIVE PROVISIONS ADOPTED

SUBTITLE A—AUTHORIZATION OF APPROPRIATIONS

Authorization of appropriations (sec. 201)

The House bill contained a provision (sec. 201) that would authorize the recommended fiscal year 2007 funding levels for the Research, Development, Test, and Evaluation accounts for the Army, Navy, Marine Corps, Air Force, Defense-wide activities, and the Director of Operational Test and Evaluation.

The Senate amendment contained a similar provision (sec. 201).

The conference agreement includes this provision.

Amount for defense science and technology (sec. 202)

The House bill contained a provision (sec. 202) that would authorize $11.7 billion for Department of Defense science and technology programs in fiscal year 2007.

The Senate amendment contained a similar provision (sec. 202) that would authorize $11.5 billion.

The conferees agree to authorize $11.7 billion for Department of Defense science and technology programs in fiscal year 2007.

SUBTITLE B—PROGRAM REQUIREMENTS, RESTRICTIONS, AND LIMITATIONS

Acquisition of, and independent cost analyses for, the Joint Strike Fighter propulsion system (sec. 211)

The Senate amendment contained a provision (sec. 254) that would direct the Secretary of Defense to provide for the development of the propulsion system for the Joint Strike Fighter (JSF) through either: (1) the continuing development and sustainment of two interchangeable propulsion systems by two separate contractors throughout the life cycle of the aircraft, or (2) a one-time firm-fixed-price contract for a selected propulsion system for the life cycle of the aircraft following the initial service release of the aircraft propulsion system in fiscal year 2008.

The House bill contained no similar provision.

The House recedes with an amendment that would:

(1) require the Secretary to provide for the continuing development and sustainment of two interchangeable propulsion systems by two separate contractors throughout the life cycle of the aircraft;

(2) prohibit the Secretary from carrying out any modification to the development and sustainment of two interchangeable engines until:

(a) the Secretary notifies the congressional defense committees of any modification to the acquisition program for the JSF propulsion systems,

(b) three independent, comprehensive, and detailed cost analyses have been submitted, and

(c) funds are appropriated for that purpose pursuant to an authorization of appropriations;

(3) require independent cost analyses be completed by the Secretary, acting through the Cost Analysis Improvement Group of the Office of the Secretary of Defense, the Comptroller General, and a federally-funded research and development center, which would be selected by the Secretary, and be submitted to the congressional defense committees not later than March 15, 2007; and

(4) include a one-time firm-fixed-price contract as part of the independent cost analyses.

Expansion and extension of authority to award prizes for advanced technology achievements (sec. 212)

The Senate amendment contained a provision (sec. 252) that would extend the authority to award prizes for advanced technology achievements to September 30, 2011. The provision would also elevate the authority to the Director, Defense Research and Engineering (DDRE) and expand the authority to include the military departments.

The House bill contained a similar provision (sec. 212) that would extend the authority to September 30, 2010, but would not elevate or expand the authority.

The House recedes with an amendment that would extend the authority to September 30, 2010, and would suspend the authority for failure to provide the report as required in subsection (e) of section 2374a of title 10, United States Code.

The conferees recognize the efforts of the Defense Advanced Research Projects Agency (DARPA) to utilize the prize authority to spur innovation and to engage nontraditional organizations in defense research. The amendment would continue to allow use of the prize authority by DARPA and other components under DDRE.

The conferees have been informed that DARPA has independently decided to withdraw its support of the X PRIZE Foundation's 2006 space technology competitions, but plans to continue work on the advancement of unmanned ground vehicle technology through the Urban Challenge competition. The conferees note that both activities may hold promise for the development of technologies to support defense missions, and therefore encourage the DDRE to evaluate potential benefits of such activities and the use, if appropriate, of the authority provided by this section. The conferees believe that such evaluations could be conducted in a manner that ensures seamless planning and execution for existing programs.

Defense Acquisition Challenge Program extension, enhancement, and modification to address critical cost growth threshold breaches in major defense acquisition programs (sec. 213)

The House bill contained a provision (sec. 213) that would permanently extend the Defense Acquisition Challenge Program (DACP), and protect the identity of those submitting challenge proposals during the proposal evaluation process. The House bill also contained a provision (sec. 805) that would: (1) modify section 2359b of title 10, United States Code, to establish requirements for a DACP proposal solicitation in the event of a critical cost growth threshold breach for a major defense acquisition program, and (2) modify section 2433 of title 10, United States Code, to require that, in the event of a critical cost growth threshold breach, the Secretary of Defense perform certain additional assessments, certifications, and reporting.

The Senate amendment contained a provision (sec. 802) that would extend the DACP through 2012 and would provide the Under Secretary of Defense for Acquisition, Technology, and Logistics (USD (AT&L)) with the authority to establish procedures to ensure that the program is focused on small and medium-sized businesses, and nontraditional defense contractors.

The Senate recedes with an amendment that would consolidate the three provisions into a single provision. The amendment would: (1) modify section 2433 to require the Secretary to perform certain assessments; (2) require USD (AT&L), in coordination with service acquisition executives, to evaluate current challenge proposal transition initiatives and identify additional incentives or authorities; (3) establish procedures to give priority to proposals from nontraditional defense contractors; (4) extend the DACP until September 30, 2012; and (5) clarify amendments to section 2359b regarding requirements for challenge proposal solicitations for acquisition programs that experience critical cost growth threshold breaches, funding guidelines for such challenge proposals, the procedures for disposition of proposals that receive favorable preliminary reviews but unfavorable full evaluations, and measures to ensure confidentiality of challenge proposal submissions.

Future Combat Systems milestone review (sec. 214)

The House bill contained a provision (sec. 214) that would require the Secretary of Defense to conduct a Future Combat Systems (FCS) milestone review, following the preliminary design review, by September 30, 2008, and to submit a report on the results of the FCS milestone review not later than February 13, 2009.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would change the submission date of the required report to 120 days after completion of the preliminary design review of FCS. Although the amendment withholds the obligation of FCS procurement funds beginning in fiscal year 2009 until the Secretary submits the required report, the amendment allows the Department of the Army to obligate funds for the non-line-of-sight cannon and for the costs attributable to insertion of new technology into the current force, if the insertion is approved by the Under Secretary of Defense for Acquisition, Technology, and Logistics. The conferees strongly endorse a program strategy that will enable early spin out of FCS technologies into the current force, a top priority of the Chief of Staff of the Army.

Dedicated amounts for implementing or evaluating Navy shipbuilding technology proposals under Defense Acquisition Challenge Program (sec. 215)

The House bill contained a provision (sec. 216) that would require the Secretary of Defense to provide an additional $4.0 million for the Defense Acquisition Challenge Program to evaluate or implement challenge proposals specifically for the DD(X) next-generation destroyer and the CVN-21 next-generation aircraft carrier programs.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would authorize up to $4.0 million to evaluate or implement challenge proposals that relate to technology directly contributing to combat systems and open architecture design for Navy ship platforms.

Independent estimate of costs of the Future Combat Systems (sec. 216)

The Senate amendment contained a provision (sec. 211) that would withhold $500.0 million from the amount of funds authorized to be appropriated for the development of the Future Combat Systems (FCS) until the Secretary of Defense submits a report of an independent cost estimate for FCS conducted by a federally-funded research and development center.

The House bill contained no similar provision.

The House recedes with an amendment that would remove the withhold of $500.0 million and change the submission date of the required report to April 1, 2007.

The conferees are disappointed with the response by the Department of Defense to reports required in section 211 of the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108-375) and section 213 of the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109-163). The conferees expect the Department to share the details of the independent cost estimate prepared by the Department's Cost Analysis Improvement Group (CAIG) with the organization selected to conduct the independent cost estimate.

The conferees understand that the Army disagrees with the analysis by CAIG of the Army's FCS cost estimate. It would be useful for the organization selected to perform the independent cost estimate to review and comment on the discrepancies between the cost estimates of the Army and the CAIG.

Funding of defense science and technology programs (sec. 217)

The Senate amendment contained a provision (sec. 212) that would extend the funding objective for science and technology programs, established in section 212 of the National Defense Authorization Act for Fiscal Year 2000 (Public Law 107-107), to fiscal year 2012, and would require submission of two reports if the Department of Defense fails to meet the outlined funding objective in any single fiscal year budget request.

The House bill contained no similar provision.

The House recedes with an amendment that would make technical changes and would consolidate submission of the required information along with budget requests.

Hypersonics development (sec. 218)

The Senate amendment contained a provision (sec. 213) that would direct the Secretary of Defense to establish a joint technology office (JTO) to coordinate and integrate hypersonics research, development, and demonstration programs and budgets.

The House bill contained no similar provision.

The House recedes with an amendment that would clarify certain responsibilities of the JTO and ensure consideration of test and evaluation resources and facilities in hypersonics programs and plans.

The conferees expect the Department of Defense to fully utilize existing management and coordination functions in fulfilling the requirements of this section and to consider virtual structures and organizations, as appropriate, to minimize any administrative burdens associated with a new JTO while maximizing program outcomes.

Report on program for replacement of nuclear warheads on certain Trident sea-launched ballistic missiles with conventional warheads (sec. 219)

The Senate amendment contained a provision (sec. 214) that would prohibit $95.0 million of the funds authorized to be appropriated for the Conventional Trident Modification (CTM) program from being obligated or expended until the Secretary of Defense, in consultation with the Secretary of State, submits a report to the congressional defense committees.

The House bill contained no similar provision, but would authorize $30.0 million in Research, Development, Test, and Evaluation.

The House recedes with an amendment that would strike the limitation on funding while maintaining the reporting requirement. The conference outcome with respect to funding for the CTM program is reflected in the tables of this report under Research, Development, Test, and Evaluation, Navy; Weapons Procurement, Navy; and Other Procurement, Navy.

The conferees continue to believe it is important for the Department of Defense to explore a wide range of capabilities for responding rapidly to emerging threats to the United States and its strategic interests. The conferees encourage the Department to expedite consideration of mid-term options for prompt global strike, and to propose to the congressional defense committees as soon as possible those activities that may be required during fiscal year 2007 to make progress toward developing those concepts the Congress and the Department deem appropriate, including reprogramming actions.

Subtitle C—Missile Defense Programs

Fielding of ballistic missile defense capabilities (sec. 221)

The House bill contained a provision (sec. 221) that would allow funds authorized to be appropriated for fiscal years 2007 and 2008 for research, development, test, and evaluation for the Missile Defense Agency to be used for the development and fielding of ballistic missile defense capabilities.

The Senate amendment contained a similar provision.

The Senate recedes.

Limitation on use of funds for space-based interceptor (sec. 222)

The House bill contained a provision (sec. 222) that would prevent the Department of Defense from obligating funds for the testing or deployment of a space-based interceptor program until 90 days after submitting a report to Congress describing the program and its national security implications.

The Senate amendment contained no similar provision.

The Senate recedes.

Policy of the United States on priorities in the development, testing, and fielding of missile defense capabilities (sec. 223)

The Senate amendment contained a provision (sec. 232) that would make it the policy of the United States to accord a priority within the missile defense program to the development, testing, fielding, and improvement of effective near-term missile defense capabilities, including the Ground-based Midcourse Defense (GMD) system, the Aegis Ballistic Missile Defense (BMD) system, additional Patriot PAC-3 units, the Terminal High Altitude Area Defense (THAAD) system, and sensors based on land, sea, and in space that support these interceptor systems.

The House bill contained no similar provision.

The House recedes with an amendment that would update the findings to take into account the North Korean ballistic missile test launches of July 2006.

On July 4, 2006, the United States detected the launch of six ballistic missiles from North Korea, followed by an additional launch on July 5, 2006. These missiles varied in range from the short-range Scud to the medium-range No-Dong and included the firing of a Taepo-Dong 2 missile, which intelligence agencies believe could eventually reach United States territory. The conferees believe these North Korean launches, as well as activities related to the development and testing of Iranian ballistic missiles, reinforce congressional direction provided to the Department of Defense over the past 2 years to focus its efforts on those initial missile defense systems that are now providing, or starting to provide, a measure of protection for the United States and its deployed forces.

The Department's excessive focus on and investment in the development of long-term technologies has made it difficult for the Missile Defense Agency to successfully develop, test, and field—in sufficient numbers—the initial missile defense capabilities necessary to address the current threat. For example, the Department has reduced planned deliveries of the highly successful sea-based Standard-Missile 3 from 120 to 96 over the future years defense program and is programming to procure only 48 THAAD missiles. Also, the Department is not funding enough PAC-3 missiles to meet the needs of combatant commanders in areas where forward deployed U.S. forces are currently within range of short- and medium-range ballistic missiles. The budget request for the GMD system also leads conferees to believe that inadequate resources have been applied toward ensuring the GMD system is fully tested and is able to stand alert even while testing is underway.

The conferees believe that the emphasis of our missile defense efforts should be on the current generation of missile defense capabilities—even if this comes at the expense of longer-term development efforts. Based on congressional testimonies by combatant commanders, who inform Congress that they require more missile defense inventory to keep pace with the threat, and mindful of recent developments in North Korea and Iran, the conferees believe that priority should be given to developing, testing, fielding, and improving effective near-term missile defense capabilities, including GMD, Aegis BMD, Patriot PAC-3, and THAAD. The conferees expect the Department to reflect this policy in their fiscal year 2008 budget submission.

One-year extension of Comptroller General assessments of ballistic missile defense programs (sec. 224)

The Senate amendment contained a provision (sec. 233) that would extend until fiscal year 2008 the requirement for the Comptroller General to provide an assessment of the extent to which the Missile Defense Agency achieved the goals established for that fiscal year for each ballistic missile defense program of the Department of Defense.

The House bill contained no similar provision.

The House recedes.

Submittal of plans for test and evaluation of the operational capability of the Ballistic Missile Defense System (sec. 225)

The Senate amendment contained a provision (sec. 234) that would require each plan approved by the Director of Operational Test and Evaluation to test and evaluate the operational capability of the ballistic missile defense system, as required by section 234(a) of the National Defense Authorization Act for Fiscal Year 2006 (Public Law 109-163; 10 U.S.C. 2431 note), to be submitted to the congressional defense committees within 30 days of such approval.

The House bill contained no similar provision.

The House recedes.

Annual reports on transition of ballistic missile defense programs to the military departments (sec. 226)

The Senate amendment contained a provision (sec. 235) that would require the Under Secretary of Defense for Acquisition, Technology, and Logistics to submit a report to the congressional defense committees, not later than March 1, 2007, and annually thereafter through 2013, on the plans of the Department of Defense for the transition of missile defense programs from the Missile Defense Agency to the military departments.

The House bill contained no similar provision.

The House recedes with an amendment that would include the requirement to report on any agreement on the operational test criteria that must be achieved before the transition of a missile defense program to the military departments.

Subtitle D—Other Matters

Policies and practices on test and evaluation to address emerging acquisition approaches (sec. 231)

The House bill contained a provision (sec. 231) that would require a review of test and evaluation policies and practices, and modify reporting requirements of the Director of Operational Test and Evaluation (DOTE) under section 2399(b)(2) of title 10, United States Code.

The Senate amendment contained a similar provision (sec. 253) that would require the Under Secretary of Defense for Acquisition, Technology, and Logistics (USD (AT&L)) and the DOTE to review and revise policies and practices on test and evaluation in light of emerging approaches to acquisition. The provision would also amend section 2399(b) of title 10, United States Code, to address deficient testing information on rapid acquisition programs purchased prior to a decision to proceed to low rate initial production

The House recedes with an amendment that would include elements of both provisions, and add a new section to clarify the responsibilities of the DOTE with respect to force protection equipment. The amendment would: (1) update reporting requirements of the DOTE to allow for submission of relevant information on operational capabilities of tested items; (2) require submission of testing information to Congress on major defense acquisition programs that do not move beyond low rate initial production, but that proceed to operational use or make use of procurement funds; (3) require a review, and revision if necessary, of policies and practices on test and evaluation; and (4) update the responsibilities of the DOTE under section 139 of title 10, United States Code, to include advice and consultation to the Secretary of Defense, USD (AT&L), and Secretaries of the military departments on operational test and evaluation and survivability testing of force protection equipment.

The conferees do not intend this section to modify existing authorities of the DOTE with respect to major defense acquisition programs, as defined in section 139(a)(2)(B) of title 10, United States Code, or operational test and evaluation in general. The conferees direct the Secretaries of the military departments to ensure that the DOTE is made aware of force protection equipment programs.

The Senate amendment contained a provision (sec. 251) that would extend the requirement for the Global Research Watch program.

The House bill contained no similar provision.

The House recedes.

The conferees expect the Secretary of Defense to provide to the entity selected to perform the independent assessment the documentation and findings of all related studies of active protection systems conducted by the Department of Defense within the last 3 years or deemed relevant by the Secretary.
